## KOMITMEN KEUANGAN KEBERLANJUTAN

Indonesia telah menyatakan komitmennya dalam mendukung upaya pencapaian rumusan Tujuan Pembangunan Berkelanjutan (TPB) atau *Sustainable Development Goals* (SDGs). Bank Muamalat Indonesia turut mengambil peran dan bagian dalam mewujudkan tercapainya rumusan tujuan keberlanjutan sebagai wujud dukungan kepada Pemerintah Indonesia.

Kami menerapkan strategi pencapaian tujuan keberlanjutan yang mencakup pengembangan kompetensi SDM terkait keberlanjutan, sinergi antara kebijakan dan prosedur kerja, serta pengembangan produk dan jasa yang selaras dengan pencapaian tujuan keberlanjutan. Selain itu, Bank meningkatkan upaya efisiensi konsumsi energi, mereduksi emisi gas rumah kaca (GRK), dan meningkatkan efisiensi konsumsi air bagi tercapainya perbaikan kualitas lingkungan sebagai bagian dari tujuan keberlanjutan.

Sebagai salah satu anggota "First Movers on Sustainable Banking", Bank Muamalat Indonesia telah menerapkan prinsip *Sustainable Banking* dalam memberikan pembiayaan, beroperasi, dan memberikan layanan bagi para nasabah. Kami menyadari bahwa untuk mencapai tujuan keberlanjutan maka diperlukan komitmen dan kebijakan dalam pembiayaan yang memperhatikan kelestarian lingkungan dan bermanfaat untuk masyarakat.

Kami telah menyusun dan menerapkan Rencana Aksi Keuangan Berkelanjutan (RAKB) yang disajikan dalam periode satu tahun dan lima tahun untuk mengembangkan kegiatan bisnis yang bertanggung jawab dan berkelanjutan, termasuk merintis penyesuaian pola Pengelolaan kegiatan operasional dan menyusun laporan. Kami menyusun langkah-langkah strategis dalam menjalankan kegiatan bisnis yang tidak hanya memperhatikan aspek ekonomi, tetapi juga aspek lingkungan dan sosial. Seperti peningkatan kapabilitas SDM, sinergi kebijakan dan prosedur termasuk pengembangan teknologi, pengembangan produk dan jasa perbankan, serta pemantauan dan evaluasi berkala.

## SUSTAINABLE FINANCE COMMITMENT

Indonesia has announced its commitment to supporting efforts to achieve the Sustainable Development Goals (SDGs). As a form of support for the Indonesian government, Bank Muamalat Indonesia also plays a role and contributes to the attainment of sustainability goals.

We apply a plan to achieve sustainability goals, which includes establishing HR competences relevant to sustainability, ensuring synergy between work policies and procedures, and providing products and services that align with sustainability goals. Furthermore, as part of its sustainability aims, the Bank is stepping up its efforts to improve environmental quality by enhancing energy consumption efficiency, lowering greenhouse gas (GHG) emissions, and increasing water consumption efficiency.

Bank Muamalat Indonesia, a member of the "First Movers on Sustainable Banking", has integrated Sustainable Banking principles in its financing, operations, and delivering services to customers. We recognize that in order to attain sustainability goals, we need financial commitments and policies that prioritize environmental sustainability while also benefiting society.

We have prepared and implemented a Sustainable Financial Action Plan (RAKB) which is presented over a one-year and five-year period to develop responsible and sustainable business activities, including pioneering adjustments to operational activity management patterns and preparing reports. Such as increasing human resource capabilities, synergy of policies and procedures including technology development, development of banking products and services, as well as regular monitoring and evaluation.

Bank juga berpartisipasi dalam *Task Force* Keuangan Berkelanjutan di Sektor Jasa Keuangan yang ditetapkan oleh Dewan Komisiner OJK. Untuk memastikan komitmen tersebut dapat terwujud, Bank telah menetapkan unit-unit kerja yang bertugas merancang kebijakan, menjalankan, mengevaluasi, dan melaporkan pelaksanaan seluruh program-program keuangan berkelanjutan.

## DINAMIKA PENERAPAN KEUANGAN BERKELANJUTAN

Dalam menerapkan keuangan berkelanjutan, kami tentu menghadapi dinamika dan tantangan. Seperti dinamisnya perkembangan terkait ketentuan/peraturan keuangan berkelanjutan sehingga penyusunan materi pelatihan harus terus disesuaikan agar relevan, terbatasnya akses untuk koordinasi dengan nasabah dalam melakukan penilaian kriteria yang sesuai dengan nilai keberlanjutan dan kesulitan dalam memahami perbedaan kriteria tersebut secara keseluruhan di tiap-tiap sektor, serta minim dan belum meratanya pemahaman dan pengetahuan karyawan terkait penerapan kegiatan operasional yang ramah lingkungan.

Meski demikian, kami mengambil langkah strategis dan kebijakan untuk menghadapi dinamika tersebut, sehingga seluruh program-program keuangan berkelanjutan dapat berjalan baik dan bisa memberi hasil optimal. Oleh karena itu, kami memprioritaskan penanganan berbagai masalah mendasar tersebut dalam program-program yang dicantumkan dalam dokumen RAKB Bank Muamalat Indonesia.

## PENCAPAIAN KEUANGAN BERKELANJUTAN

Secara umum, kinerja keuangan Bank pada tahun 2023 mencatatkan hasil yang positif. Total aset Bank naik 9,11% menjadi Rp66,95 triliun dari Rp61,36 triliun di tahun sebelumnya. Sementara total penghimpunan Dana Pihak Ketiga (DPK) dan Dana Pihak Kedua (DP2) mencapai Rp50,27 triliun, tumbuh 3,96% (yoy). Jumlah *outstanding* pembiayaan yang diberikan juga meningkat 19,35% menjadi sebesar Rp22,46 triliun dari senilai Rp18,82 triliun pada tahun 2022.

Kemudian, kami mencatatkan penurunan laba bersih sebesar 49,99% menjadi sebesar Rp13,29 miliar dari tahun 2022 yang sebesar Rp26,58 miliar.

The Bank also participates in the Sustainable Finance Task Force in the Financial Services Sector established by the OJK Board of Commissioners. To ensure that this commitment can be realized, the Bank has established work units tasked with designing policies, implementing, evaluating and reporting on the implementation of all sustainable finance programs.

## DYNAMICS OF SUSTAINABLE FINANCE IMPLEMENTATION

There will undoubtedly be dynamics and obstacles while implementing sustainable finance. Such as dynamic developments related to sustainable finance provisions/regulations so that the preparation of training materials must continue to be adjusted to make them relevant, limited access to coordinate with customers in assessing criteria in accordance with sustainability values and difficulties in understanding the differences in these criteria as a whole in each sector, as well as minimal and uneven employee understanding and knowledge regarding the implementation.

However, we are taking strategic and policy initiatives to address these issues, ensuring that all sustainable finance projects run smoothly and achieve optimal results. Therefore, we prioritize handling these various basic problems in the programs listed in the Bank Muamalat Indonesia RAKB document.

## SUSTAINABLE FINANCIAL ACHIEVEMENT

Overall, the Bank's financial performance in 2023 was positive. The Bank's total assets increased 9.11% to Rp66.95 trillion from Rp61.36 trillion the previous year. Meanwhile, the total collection of Third Party Funds (DPK) and Second Party Funds (DP2) reached IDR 50.27 trillion, growing by 3.96% (yoy). The amount of outstanding financing disbursed grew by 19.35% to Rp22.46 trillion from Rp18.82 trillion in 2022.

However, we recorded a 49.99% fall in net profit to Rp13.29 billion from 2022, which was Rp26.58 billion.

Pada aspek keuangan berkelanjutan, kami berupaya mendorong industri kelapa sawit yang berkelanjutan. Bank telah membentuk Plasma Specialist Unit yang berfokus untuk membiayai petani-petani plasma yang tergabung di dalam bentuk badan koperasi yang diinisiasi sejak tahun 2017. Bank berkomitmen untuk membiayai koperasi plasma yang dibina oleh grup perusahaan yang telah memiliki sertifikasi atau merupakan anggota *The Roundtable on Sustainable Palm Oil* (RSPO) dan/atau *Indonesian Sustainable Palm Oil System* (ISPO), yang telah memperhatikan aspek Lingkungan, Sosial dan Tata Kelola.

Total nilai portofolio pembiayaan korporasi Bank per akhir tahun 2023 sebesar Rp14 triliun, sebanyak Rp715 miliar atau 5,11% adalah pembiayaan yang disalurkan untuk mendukung pengembangan khususnya industri pengolahan kelapa sawit. Adapun jumlah perusahaan sawit yang berkinerja baik dan dikelola oleh Bank adalah sekitar 34 nasabah termasuk 21 di antaranya adalah Koperasi Binaan dengan pola kemitraan inti plasma. Dari 21 portofolio pembiayaan pola kemitraan inti plasma, tersebut yang memiliki kewajiban pemenuhan aspek keberlanjutan, keseluruhan nasabah aktif memberikan jawaban atas isu-isu LST dan berdasarkan penilaian didapatkan kesimpulan usaha nasabah termasuk kegiatan usaha berkelanjutan.

Pada aspek lingkungan khususnya operasional perbankan, Bank telah menerapkan prinsip operasional ramah lingkungan melalui berbagai upaya di lingkungan kerja. Seperti penggunaan kaca khusus *double glass* sebagai penutup *facade* gedung Kantor Pusat Bank Muamalat Indonesia yang dapat menghemat penggunaan listrik pada bangunan dengan memaksimalkan pencahayaan matahari.

Kami juga berupaya melakukan upaya efisiensi energi di setiap kegiatan operasional. Berbagai inisiatif efisiensi yang diterapkan oleh Bank telah membantu menekan jumlah konsumsi energi meskipun masih sedikit lebih tinggi dibanding dengan tahun sebelumnya dikarenakan kebutuhan yang memang meningkat seiring aktivitas dan mobilitas yang juga meningkat pasca pencabutan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) di awal tahun 2023 oleh pemerintah.

Pada aspek sosial, kami berupaya meningkatkan kompetensi dan memberikan manfaat kepada internal seperti karyawan dan eksternal seperti masyarakat secara umum. Pada lingkup internal, kami berkomitmen menghadirkan lingkungan kerja yang kondusif, aman dan menyenangkan, memberi paket remunerasi yang kompetitif, serta menyediakan kesempatan setara bagi pengembangan pribadi dan karier para karyawan sebagai mitra strategis.

In the aspect of sustainable finance, we strive to encourage a sustainable palm oil industry. The Bank has formed a Plasma Specialist Unit which focuses on financing plasma farmers who are members of a cooperative body which was initiated in 2017. The Bank is committed to financing plasma cooperatives fostered by a group of companies that have certification or are members of The Roundtable on Sustainable Palm Oil (RSPO) and/or Indonesian Sustainable Palm Oil System (ISPO), which has paid attention to Environmental, Social and Governance aspects.

The total value of the Bank's corporate financing portfolio as of the end of 2023 was Rp14 trillion, of which Rp715 billion, or 5.11%, was financing channeled to support development, especially the palm oil processing industry. In environmental aspects, especially banking operations, the Bank has implemented environmentally friendly operational principles through various efforts in the work environment. This include the use of special double glass as a cover for the facade of the Bank Muamalat Indonesia Head Office building which can save electricity usage in the building by maximizing sunlight.

We also strive to make energy efficiency efforts in every operational activity. Various efficiency initiatives implemented by the Bank have helped reduce energy consumption, although it is still slightly higher compared to the previous year due to demand which has indeed increased along with activity and mobility which has also increased following the lifting of the Implementation of Community Activity Restrictions (PPKM) in early 2023 by the government.

In the social aspect, we strive to improve competence and provide benefits to internal employees such as employees and external parties such as society in general. Internally, we are committed to providing a conducive, safe and enjoyable work environment, providing competitive remuneration packages, and providing equal opportunities for employees' personal and career development as strategic partners.

BMI terus berinovasi dengan mengeluarkan produk-produk keuangan syariah seperti Sukuk Subordinasi Mudharabah, Asuransi Syariah (Asuransi Takaful), Dana Pensiun Lembaga Keuangan Muamalat (DPLK Muamalat) dan *multifinance* syariah (Al-Ijarah Indonesia Finance) yang seluruhnya menjadi terobosan baru di Indonesia. Selain itu, produk Shar-e yang diluncurkan pada 2004 merupakan tabungan instan pertama di Indonesia.

Produk Shar-e Gold Debit Visa yang diluncurkan pada 2011 berhasil memperoleh penghargaan dari Museum Rekor Indonesia (MURI) sebagai Kartu Debit Syariah dengan teknologi *chip* pertama di Indonesia serta layanan e-channel seperti *internet banking*, *mobile banking*, *ATM*, dan *cash management*. Seluruh produk-produk itu menjadi pionir produk syariah di Indonesia dan menjadi tonggak sejarah penting di industri perbankan syariah. Seiring kapasitas Bank yang semakin besar dan diakui, BMI kian melebarkan sayap dengan terus menambah jaringan kantor cabangnya tidak hanya di seluruh Indonesia, akan tetapi juga di luar negeri. Pada 2009, Bank mendapatkan izin untuk membuka kantor cabang di Kuala Lumpur, Malaysia dan menjadi bank pertama di Indonesia serta satu-satunya yang mewujudkan ekspansi bisnis di Malaysia. Hingga saat ini, Bank telah memiliki 235 kantor layanan termasuk 1 (satu) kantor cabang di Malaysia. Operasional Bank juga didukung oleh jaringan layanan yang luas berupa 564 unit ATM Muamalat, 90.000 jaringan ATM Prima, 77.000 ATM Bersama, dan 55 unit Mobil Kas Keliling.

BMI kemudian melakukan *rebranding* pada logo Bank untuk semakin meningkatkan *awareness* terhadap *image* sebagai Bank Syariah Islami, Modern dan Profesional. Bank pun terus merealisasikan berbagai pencapaian serta prestasi yang diakui, baik secara nasional maupun internasional. Kini, dalam memberikan layanan terbaiknya, BMI beroperasi bersama beberapa entitas asosiasi dan afiliasinya yaitu Al-Ijarah Indonesia Finance (ALIF) yang memberikan layanan pembiayaan syariah, (DPLK Muamalat) yang memberikan layanan dana pensiun melalui Dana Pensiun Lembaga Keuangan, Muamalat Institute yaitu lembaga yang mengembangkan, mensosialisasikan dan memberikan pendidikan mengenai sistem ekonomi syariah kepada masyarakat, dan Baitulmaal Muamalat yang memberikan layanan untuk menyalurkan dana Zakat, Infak, dan Sedekah.

Based on the Decree of the Minister of Finance No. S-9383/MK.5/2006 dated December 28, 2006, the Company obtained the Perception Bank status, allowing the Company to receive tax deposits. Then on July 25, 2013, the Company became a participant of the Deposit Insurance Corporation guarantee program as stated in the Deposit Insurance Corporation Letter No. S.617/DPMR/VII/2013 on the Participation of Deposit Insurance Corporation. The Company was then designated as the Hajj Deposit Receiving Bank based on the Decree of the Hajj Financial Management Agency No. 4/BPKH.00/2018, dated February 28, 2018.

BMI continues to innovate by introducing new sharia financial products, such as Mudharabah Subordinated Sukuk, Sharia Insurance (Takaful Insurance), Pension Fund of Muamalat Financial Institution (DPLK Muamalat), and Sharia Multifinance (Al-Ijarah Indonesia Finance), all of which are breakthrough products in Indonesia. Furthermore, the Bank's Shar-e, launched in 2004, is the first instant savings in Indonesia.

The Shar-e Gold Debit Visa, launched in 2011, was awarded by the Indonesian Museum of Records (MURI) as the first Sharia Debit Card with chip technology in Indonesia, as well as e-channel services, including internet banking, mobile banking, ATM, and cash management. All of these products pioneering sharia products in Indonesia, marking important milestones in the Islamic banking industry. As the Bank's capacity became larger and gained more recognition, BMI continued to expand its branch office network not only throughout Indonesia, but also overseas. In 2009, the Bank obtained permission to open a branch office in Kuala Lumpur, Malaysia, becoming the first bank in Indonesia and the only one to realize business expansion in Malaysia. To date, the Bank has 235 service offices including 1 (one) branch office in Malaysia. An extensive service network of 564 Muamalat ATM units, 90,000 ATM Prima, 77,000 ATM Bersama networks, and 55 Mobile Cash Cars supports the Bank's operations.

BMI then rebranded the Bank's logo to further increase awareness of its image as an Islamic, Modern, and Professional Sharia Bank. The Bank also continues to realize various achievements that gained recognition, both nationally and internationally. ### PRODUK

Bank Muamalat Indonesia membagi produk perbankan syariah ke dalam 2 (dua) kategori besar, yakni produk penghimpunan dana dan produk pembiayaan. Produk penghimpunan dana terdiri dari beragam produk yang disesuaikan dengan tujuan dan preferensi nasabah. Dalam rangka menjaga posisi likuiditas jangka pendek, BMI melakukan penempatan dana pada bank lain serta pembelian surat-surat berharga berdasarkan prinsip syariah. Selain itu, Bank meningkatkan intensitas pembiayaan yang ditujukan pada pasar yang selama ini mempunyai kinerja pembiayaan yang baik dengan mengalokasikan porsi yang lebih besar kepada UMKM dalam realisasi portofolio pembiayaan. Adapun uraian dari produk penghimpunan dana dan produk pembiayaan diuraikan dalam tabel sebagai berikut:

### PRODUCTS

Bank Muamalat Indonesia divides Sharia banking products into 2 (two) major categories, namely fund collection products and financing products. Fund collection products consist of various products tailored to the goals and preferences of customers. Meanwhile, financing products serve as a means of channeling funds collected by the Bank in the form of financing, both for productive activities and consumptive purposes.

BMI also places funds in cooperation with strategic partners through channeling financing and executing through micro-small financial institutions, namely, BMT (Baitul Maal Wa-Tamwil), Sharia People's Credit Banks (BPRS), and financing companies.

In order to maintain short-term liquidity positions, BMI places funds in other banks and purchases securities based on Sharia principles. Additionally, the Bank increases the intensity of financing aimed at markets that have traditionally shown strong financing performance by allocating a larger portion to MSMEs in financing portfolio realization. The description of fund collection products and financing products is outlined in the table below:

## KOMITMEN TERHADAP KEBERLANJUTAN [GRI 2-23]

Indonesia telah menyatakan komitmennya dalam mendukung upaya pencapaian rumusan tujuan pembangunan berkelanjutan skala global pada SDGs tersebut. Pemerintah Indonesia menunjukkan komitmennya melalui penerapan agenda pembangunan berkelanjutan yang disusun dalam Peraturan Presiden (PerPres) No.59 tahun 2017 tentang "Pelaksanaan Pencapaian Tujuan Pembangunan Berkelanjutan". PerPres ini diikuti dengan pembuatan Rencana Aksi Nasional (RAN) Tujuan Pembangunan Berkelanjutan (TPB/SDGs) – RAN TPB, maupun Rencana Aksi Daerah (RAD) Tujuan Pembangunan Berkelanjutan (TPB/SDGs) – RAD TPB.

RAN TPB dan RAD TPB merupakan dokumen yang memuat program dan rencana kerja lima tahunan bagi pelaksanaan berbagai kegiatan yang secara langsung dan tidak langsung mendukung pencapaian TPB sesuai dengan potensi masing-masing daerah. Sebagai bagian dari implementasi program RAN TPB dan RAN TPB, Kementerian Keuangan mendeklarasikan SDG Indonesia One pada awal kuartal IV-2018, suatu rencana kerja yang dapat dilakukan untuk mendukung pencapaian rumusan tujuan TPB, melalui ketersediaan akses pendanaan.

## COMMITMENT TO SUSTAINABILITY [GRI 2-23]

Indonesia has stated its commitment to supporting efforts to achieve the formulation of global scale sustainable development goals in the SDGs. The Indonesian government demonstrates its commitment by implementing the sustainable development agenda that have been prepared in the Presidential Regulation (PerPres) No. 59 of 2017 on "Implementation of the Achieving Sustainable Development Goals". This Presidential Regulation was followed by the creation of a National Action Plan (RAN) for Sustainable Development Goals (TPB/SDGs) – RAN TPB, as well as a Regional Action Plan (RAD) for Sustainable Development Goals (TPB/SDGs) – RAD TPB.

## 1. Kebijakan Khusus Penerapan Aspek Lingkungan dan Sosial dalam Kegiatan Perbankan

Bank berkomitmen melakukan kebijakan penerapan kriteria aspek lingkungan dan sosial demi mewujudkan keberlanjutan bisnis. Langkah tersebut diimplementasikan Bank dengan mengaplikasikan Petunjuk Teknis Formulir Pembiayaan Berkelanjutan yang mewajibkan Officer pada segmen pembiayaan *Corporate* dan *Commercial* (saat ini *Enterprise Banking*), mengisi formulir Pembiayaan Berkelanjutan guna melakukan penilaian atas risiko Lingkungan, Sosial dan Tata Kelola nasabah pada saat pengajuan fasilitas pembiayaan.

Implementasi Petunjuk Teknis tersebut diinisiasi sejak tahun 2021, sebelumnya ketentuan *assessment* risiko ini tercantum dalam SE Direksi yang dikhususkan untuk pembiayaan sektor industri kelapa sawit. Selain itu, Bank juga menerapkan ketentuan-ketentuan spesifik dalam Kebijakan Umum Pembiayaan, perihal Pedoman dan Prosedur Pembiayaan, dimana ditegaskan Bank Muamalat Indonesia menghindari pembiayaan yang merusak lingkungan dengan mensyaratkan pemenuhan dokumen AMDAL bagi pemberian pembiayaan pada berbagai industri.

Petunjuk Teknis Formulir Pembiayaan Berkelanjutan tersebut disetujui oleh *Head of Integrated Risk Management* dengan diketahui oleh Direktur Terkait. ## 1. Specific Policy on Implementing Social and Environmental Aspects to Banking Activities

The Bank is committed to implementing a policy of implementing environmental and social aspect criteria in order to realize business sustainability. This step was implemented by the Bank by applying the Technical Instructions for Sustainable Financing Forms which require officers in the Corporate and Commercial financing segments (currently Enterprise Banking), to fill out a Sustainable Financing form in order to assess customers' Environmental, Social and Governance risks when applying for financing facilities.

The Technical Instructions implementation was initiated in 2021, previously this risk assessment provision was stated in the Board of Directors' Circular, which was specifically for financing the palm oil industry sector. In addition, the Bank also implements specific provisions in the General Financing Policy, regarding Guidelines and Procedures for Financing, emphasizing that Bank Muamalat Indonesia avoids financing that harms the environment by requiring the fulfillment of AMDAL documents for providing financing to various industries.

The Head of Integrated Risk Management, with the knowledge of the Risk Director, approves the Technical Instructions for the Sustainable Financing Form. The Business Unit, Analyst, and Financing Risk all review these Technical Guidelines. This Technical Guideline is part of the Sustainable Banking policy's implementation as a form of support for achieving the SDGs' sustainability goals. The Generating Positive Economic Performance Chapter contains the complete discussion on Sustainable Banking.

The special policy for Environmental and Social aspect implementation is an effort by the Bank to commit to government policies, namely the Green Taxonomy 1.0 of 2022, and Presidential Regulation No. 44 of 2020 on the Indonesian Sustainable Palm Oil Plantation Certification System.

The Financing Committee must use the four-eyes principle to determine the covenants for the financing approval decisions.

- Selanjutnya, *Financial Admin* melakukan pengecekan atas persyaratan pencairan dana pembiayaan yang telah disetujui dan diteruskan ke bagian operasional yang melakukan pencairan. Adapun pengawasan kualitas pembiayaan dilakukan oleh QA dan Audit Internal maupun Eksternal dan oleh regulator, dalam hal ini pengawasan oleh OJK.

## FINANCING BY BUSINESS SECTOR AND SEGMENT

### Financing by Business Sector

Bank Muamalat Indonesia continuously innovates and optimizes operational activities and implements strategic policies related to appropriate and efficient management to ensure that economic performance can be maintained and grow amidst the challenges of dynamic and competitive industrial competition.

In implementing business sector financing, the Bank is committed to continuing to be useful and contributing to national development and industrial development through a commitment to financing support in 18 economic business sectors. The implementation of Bank financing support focuses on sectors that have a multiplier effect on society in order to encourage national economic growth. The various industrial sectors that are currently the focus of the Bank are the processing industry, the infrastructure sector (telecommunications, toll roads, other means of transportation), and the household consumption sector.

Tidak hanya pembiayaan pada berbagai proyek infrastruktur, Bank juga menyalurkan pembiayaan untuk pengembangan industri kelapa sawit yang merupakan salah satu sektor unggulan Indonesia yang menyerap banyak tenaga kerja. Pembiayaan pada industri kelapa sawit terdiri dari pembiayaan perusahaan non-plasma (perkebunan kelapa sawit, pengolahan CPO, dan industri minyak goreng dari kelapa sawit) dan pembiayaan pada koperasi plasma atau perkebunan kelapa sawit.

In addition to financing various infrastructure projects, the Bank also disburses financing for the development of the palm oil industry, which is one of Indonesia's leading sectors that absorbs a large number of manpower. Financing for the palm oil industry consists of financing for non-plasma companies (oil palm plantations, CPO processing, and the palm oil cooking industry) and financing for plasma plantations or cooperatives.

## BANK MUAMALAT INDONESIA ON ITS POLICY RELATED TO SUSTAINABLE FINANCE

The Bank is committed to avoiding financing that has the potential to harm the environment by implementing the General Financing Policy since 2019. This is implemented by the Bank through Financing Procedures for Corporate and Commercial Clients (Enterprise Segment), the Bank requires AMDAL (Environmental Impact Analysis) as one of the

Lingkungan) sebagai salah satu syarat dalam pembiayaan proyek yang berdampak pada lingkungan. Ketentuan standar untuk pembiayaan proyek tersebut juga didokumentasikan dalam perjanjian pembiayaan antara Bank dan nasabah.

Melalui Kebijakan Umum yang ketat, Bank berkomitmen untuk senantiasa patuh dan taat terhadap peraturan perundang-undangan yang berlaku dalam rangka menghindari pembiayaan pada proyek-proyek yang membahayakan lingkungan ataupun mengganggu kawasan yang dilindungi. Meskipun Bank belum memiliki aturan bagi nasabah terkait kategori risiko geografis tinggi agar membuat penilaian risiko secara berkala dan melaksanakan kegiatan konservasi air, tetapi dalam upaya mitigasi risiko geografis, Bank menerapkan aturan asuransi aset nasabah.

Terkait segmentasi Enterprise Bank berkomitmen menerapkan kebijakan khusus dalam rangka penilaian aspek Lingkungan, Sosial dan Tata Kelola atas portfolio pembiayaan. Kebijakan yang diterbitkan dalam bentuk Petunjuk Teknis Formulir Pembiayaan Berkelanjutan dan telah disusun sejak tahun 2020 serta disetujui oleh Financing Business Risk Director, memiliki tujuan sebagai berikut:

1. Menjadi standar dan acuan dalam memberikan pembiayaan berkelanjutan atau pembiayaan yang juga memperhatikan aspek lingkungan, sosial dan tata kelola.
2. Memastikan implementasi pemberian pembiayaan berkelanjutan yang sehat dan menerapkan prinsip kehati-hatian.
3. Menjadi panduan bagi unit kerja terkait dalam penggunaan formulir pembiayaan berkelanjutan.

Ketentuan tersebut berfungsi untuk mengelola dan memitigasi dampak risiko terhadap lingkungan atas pembiayaan yang diberikan khususnya sektor-sektor industri yang ditentukan oleh bank termasuk di antaranya:

1. Industri Kelapa Sawit
2. Listrik, Gas dan Air Panas
3. Angkutan Air
4. Industri Makanan dan Minuman
5. Industri Tekstil
6. Industri Kimia dan Farmasi
7. Kehutanan
8. Konstruksi
9. Pertambangan

Bank senantiasa berkomitmen untuk melakukan kajian berkala terhadap kebijakan mitigasi LST ini agar relevan dengan kondisi perkembangan industri terkait dan aturan perundangan terkait. Review yang dilakukan atas kebijakan tersebut dilakukan oleh antara lain Unit penyusun kebijakan yaitu Unit Risk Management, Unit Reviewer yang termasuk di antaranya Unit Business Banking Development (termasuk di dalamnya Unit Financing Analyst), dan Unit Financing Risk.

standard covenants in financing projects that has potential issues related to the environment. Such standard covenants for project financing are also documented in the financing agreement between the Bank and the customer.

Through strict General Policies, the Bank is committed to always complying with and adhering to applicable laws and regulations in order to avoid financing projects that endanger the environment or disturb protected areas. Even though the Bank has yet to have regulations requiring customers in the category of high geographical risk to conduct periodic risk assessments and participate in water conservation activities, to mitigate geographic risks, the Bank implemented rules requiring customers to insure their financing customers' assets.

In terms of Enterprise segmentation, the Bank is committed to implementing special policies in the context of assessing the Environmental, Social, and Governance aspects of the financing portfolio. The policy, which was issued in the form of Technical Guidelines for Sustainable Financing Forms and has been prepared since 2020 and approved by the Financing Business Risk Director, has the following objectives:

1. Become a standard and reference in providing sustainable financing or financing that also takes into account environmental, social and governance aspects.
2. Ensure the implementation of sound sustainable financing and apply the prudence principle.
3. Serve as a guideline for related work units in using the sustainable financing forms.

These provisions function to manage and mitigate the impact of risks on the environment for financing facilities, especially for industrial sectors determined by the Bank, including:

1. Palm Oil Sector
2. Electricity, Gas, and Geothermal
3. Water Transport
4. Food and Beverage Industry
5. Textile Industry
6. Chemical and Pharmaceutical Industry
7. Forestry
8. Construction
9. Mining

The Bank is always committed to conducting regular reviews of the ESG mitigation policy to ensure that it is relevant to the development conditions of the relevant industry and related laws and regulations. The review carried out on this policy is carried out by, among others, the policy drafting unit, namely the Risk Management Unit, the Reviewer Unit, which includes the Business Banking Development Unit (including the Financing Analyst Unit), and the Financing Risk Unit.

Assessment dilakukan setidaknya setiap tahun sekali pada saat pengajuan pembiayaan baru, dan saat pelaksanaan *annual review* pembiayaan nasabah. Apabila terdapat hasil yang belum memenuhi standar maka pihak-pihak yang terlibat dalam proses analisis pembiayaan dapat membuat atau memberikan tambahan persyaratan kepada nasabah agar dilakukan langkah mitigasi dan meningkatkan pemenuhan terhadap standar internal.

Ringkasan peran masing-masing unit yang terlibat dalam proses pemberian pembiayaan nasabah dengan risiko LST pada Petunjuk Teknis Formulir Pembiayaan Berkelanjutan adalah sebagai berikut: [FS2]

- *Business Unit*: Melakukan penilaian risiko LST calon nasabah menggunakan formulir pembiayaan berkelanjutan.
- *Financing Analyst*: Melakukan pemeriksaan ulang atas hasil penilaian unit bisnis pada formulir pembiayaan berkelanjutan dan menambahkan catatan atau *covenant* tambahan bagi nasabah terkait dengan risiko LST jika diperlukan.
- *Financing Risk Unit*: Melakukan *acknowledge* terhadap hasil penilaian risiko LST dan menambahkan catatan atau *covenant* tambahan bagi nasabah terkait, jika diperlukan.

Melalui kebijakan penilaian aspek LST tersebut, setiap pemberian fasilitas pembiayaan kepada sektor-sektor yang memiliki risiko LST tinggi, maka setiap unit di segmen *Enterprise Banking* dan bertugas menganalisis permohonan pembiayaan akan memperhatikan risiko tersebut dan menyiapkan syarat dan kondisi guna memitigasi risiko LST yang melekat pada bisnis nasabah.

Sebagai salah satu bukti kepatuhan nasabah dalam memitigasi risiko LST, dalam Teknis Form Pembiayaan Keberlanjutan untuk nasabah Enterprise Banking, Bank meminta SOP atau Kebijakan Nasabah dalam mengatasi risiko Lingkungan Sosial dan Tata Kelola dalam kegiatan operasional.

Saat ini, Bank baru sampai pada tahap identifikasi dan penilaian apakah kegiatan usaha nasabah memiliki risiko LST tinggi atau tidak. Bank juga belum memiliki aturan untuk membuat nasabah yang bergerak di sektor yang rawan menimbulkan dampak konversi ekosistem (seperti: komoditas, infrastruktur, dan industri ekstraktif) menerapkan komitmen "*no conversion*" baik pada kegiatan operasional maupun pada rantai pasoknya, sesuai dengan prinsip-prinsip *Accountability Framework Initiative*. Hal yang sama berlaku untuk nasabah yang bergerak di industri maritim/kelautan. Dalam hal ini Bank akan melakukan *review* secara berkala untuk menentukan sektor mana saja yang dianggap memiliki risiko LST tinggi.

Assessments are carried out at least once a year when applying for new financing, and during the annual review of customer financing. In the event of failures to meet the standards, the parties involved in the financing analysis process can formulate or provide additional requirements to customers to ensure that mitigative measures can be taken and increased compliance with internal standards.

The following is a summary of the role of each unit involved in the process of providing customer financing with ESG risks in the Technical Guidelines for Sustainable Financing Forms: [FS2]

- *Business Unit*: Conduct an ESG risk assessment of potential customers using the sustainable financing form.
- *Financing Analyst*: Re-examine the results of the business unit assessment on the sustainable financing form and add additional notes or covenants for customers in regards to ESG risk if necessary.
- *Financing Risk Unit*: acknowledge the results of the ESG risk assessment and add additional notes or covenants for the customers if necessary.

Through the ESG aspect assessment policy, each financing facility is provided to sectors that have high ESG risk, and then each unit in the Enterprise Banking segment assigned with analyzing financing applications will consider this risk and prepare terms and conditions to mitigate the ESG risk attached to the customer's business.

One of the evidences of customer compliance in mitigating ESG risks, in the Technical Guidelines for Sustainability Financing Form for Enterprise Banking customers, the Bank requests for SOPs or Customer Policy in handling Environmental Social and Governance risks in their operational activities.

Currently, the Bank has only identified and assessed whether or not the customer's business activities pose a high ESG risk. In terms of implementing a "*no conversion*" commitment to both operational and supply chain activities in accordance with the principles of the Accountability Framework Initiative, the Bank does not have regulations either for customers operating in sectors prone to ecosystem conversion impacts (such as commodities, infrastructure, and extractive industry). The same is applied for customers in the maritime/marine industry. In this case, the Bank will conduct periodic reviews to determine which sectors are deemed to be high in terms of ESG risk.

## Pemantauan Ketaatan Nasabah dengan Risiko LST [FS3]

Bentuk komitmen dalam aspek risiko LST, Bank menjalankan pemantauan ketaatan nasabah dalam memenuhi *covenant* aspek LST yang ditetapkan dalam Perjanjian Pembiayaan, antara lain dengan:

- Pemantauan pembiayaan melalui kunjungan ke lokasi usaha nasabah
- Pemantauan pemenuhan *covenant* dan syarat pembiayaan yang tercantum dalam akad pembiayaan antara Bank dengan nasabah.
- *Annual review* dan analisis *watchlist* yang dilakukan secara berkala.

Upaya Bank agar para nasabah senantiasa melakukan pemenuhan terhadap ketentuan perbaikan kondisi LST, Bank menerapkan metoda, mencakup:

- Kunjungan ke lokasi usaha nasabah yang dituangkan dalam *call report*.
- Analisis secara *on desk* atas laporan dan atau pemenuhan dokumen yang diterima dari nasabah
- Analisis secara *on desk* atas laporan dari konsultan (jika ada)
- Komunikasi melalui telepon.

Adapun frekuensi pemantauan terhadap nasabah dengan risiko LST, ditetapkan sebagai berikut.

- Kunjungan ke lokasi usaha nasabah dilakukan minimal 1 (satu) tahun sekali atau sesuai kebutuhan Bank
- Analisis *annual review* nasabah dilakukan 1 (satu) tahun sekali
- Pemantauan melalui telepon/*on desk* dilakukan minimal 3 (tiga) kali dalam setahun
- Analisis *watchlist* dilakukan sebulan sekali

Jika ditemukan ketidakpatuhan terhadap *covenant* perjanjian pembiayaan yang telah ditetapkan dan disepakati bersama, maka Bank akan melakukan komunikasi dengan nasabah dalam beberapa tahapan, termasuk di antaranya memberikan Surat Peringatan kepada Nasabah jika diperlukan. Selain itu, Bank dapat memasukkan nasabah ke dalam *watchlist* yang akan dipantau setiap bulan. Bank telah menetapkan klausul spesifik untuk memitigasi nasabah dengan risiko LST, yakni:

- Dalam standar perjanjian pembiayaan, Bank mencantumkan syarat umum pembiayaan dengan klausa sebagai berikut:  
"Pembiayaan hanya dapat ditarik oleh Nasabah jika menurut pendapat Bank persyaratan di bawah ini telah dipenuhi secara baik dan benar: poin e. Hasil Analisis Mengenai Dampak Lingkungan (AMDAL) (jika disyaratkan) atas usaha Nasabah yang dapat diterima baik oleh Bank."
- Khusus pada pembiayaan sektor kelapa sawit, apabila hasil *assessment* form pembiayaan berkelanjutan atas calon nasabah belum memiliki sertifikat ISPO atau RSPO,

## Monitoring Customer Compliance with ESG Risk [FS3]

As a form of commitment in the ESG risk aspect, the Bank carries out monitoring of customer compliance in fulfilling the ESG aspect covenants stipulated in the Financing Agreement, including by:

- Monitoring of financing through visits to the customer's business location
- Monitoring the fulfillment of the financing covenants and requirements stipulated in the financing agreement between the Bank and the customer.
- Annual review and analysis of watchlists that are conducted periodically.

The Bank's efforts to ensure that customers constantly comply with the provisions for improving ESG conditions, the Bank applies the following methods, including:

- A visit to the customer's business location as stated in the call report.
- On desk analysis of reports and/or fulfillment of documents received from customers
- On desk analysis of reports from consultants (if any)
- Telephone communication.

The following are the occurrences of monitoring customers with ESG risk.

- A visit to the customer's business location is made at least once a year, or as needed by the Bank
- The customer's annual review analysis is conducted once a year
- Monitoring by phone/*on desk* occurs at least 3 (three) times a year
- Watchlist analysis is done once a month

If the Bank learns that there is non-compliance in a financing agreement that is determined and mutually agreed upon, the Bank will communicate with the customer in several stages, including sending out a warning letter if necessary. Moreover, the Bank can add customers to a watchlist that will be monitored every month. The Bank has set specific clauses for mitigating customer ESG risk:

- In the regular financing agreement, the Bank includes the financing general terms with the following clauses:  
"Financing can only be withdrawn by the customer if, in the Bank's opinion, the following requirements have been properly and correctly fulfilled: point e. Results of the Environmental Impact Analysis (AMDAL) (if required) for the customer's efforts that are well accepted by the Bank."
- Specific to the palm oil sector, if the results of the sustainable financing assessment form show that the prospective customer does not yet have an ISPO or

maka secara *case by case*, Bank berhak memberikan tambahan persyaratan pemenuhan sertifikat tersebut dalam jangka waktu yang disepakati bersama dengan nasabah dan dituangkan dalam *Offering Letter* dan/atau perjanjian/akad pembiayaan.

Begitu persyaratan tersebut telah dituangkan dalam *covenant* (syarat pembiayaan) maka persyaratan tersebut menjadi mengikat Nasabah. Oleh karenanya Bank juga menjadwalkan pemantauan pemenuhan *covenant* dimaksud secara periodik, seperti disinggung pada uraian sebelumnya, dengan persetujuan nasabah.

## PEMBIAYAAN INDUSTRI KELAPA SAWIT RAMAH LINGKUNGAN

Pada khususnya segmen Enterprise, Bank Muamalat Indonesia memiliki komitmen yang tinggi untuk mengelola risiko Lingkungan Sosial dan Tata Kelola (LST) dalam pembiayaan kepada sektor Industri Kelapa Sawit. Bank telah memulai untuk mengidentifikasi risiko LST melalui kebijakan yang diterbitkan pada tahun 2016 dalam bentuk Surat Edaran Direksi yang kemudian mengalami beberapa kali review dan pembaruan di tahun 2018 dan terakhir di tahun 2020.

Ketentuan tersebut mencakup untuk mengidentifikasi atas adanya risiko yang timbul dari risiko lingkungan seperti: perubahan iklim, deforestasi, emisi Gas Rumah Kaca, kebakaran lahan/hutan, risiko sosial seperti sengketa lahan serta risiko terkait perizinan. Saat ini, Bank belum mencantumkan ketentuan agar nasabah mematuhi standar perburuan sebagaimana terdapat dalam ILO Fundamental Convention. Pertama, pemberlakuan kebijakan pembiayaan korporasi ramah lingkungan. Kedua, implementasi pendanaan ramah lingkungan, dan Ketiga, implementasi kebijakan operasional ramah lingkungan.

Ketiga pendekatan tersebut dapat dilihat secara lebih rinci dalam dokumen Rencana Aksi Keuangan Berkelanjutan (RAKB) Bank Muamalat Indonesia 2022-2025. Dokumen RAKB yang telah disusun menjadi bukti dari komitmen Bank Muamalat Indonesia dalam mendukung pencapaian tujuan keberlanjutan di setiap kegiatan operasional maupun bisnis.

Pada implemenasinya, Bank telah mempunyai berbagai Kebijakan dan *Standard Operating Procedure* (SOP) pemberian pembiayaan industri ramah lingkungan melalui penerbitan beberapa ketentuan, yakni:

- Kebijakan Umum Pembiayaan No.ERM/B/I/020/2019 tahun 2019, beserta perubahannya.
- Pedoman Pembiayaan Segmen Corporate dan Commercial No.EDM.PDM.088.2016 tahun 2016, beserta perubahannya.

Komitmen mewujudkan keuangan berkelanjutan telah diinisiasi Bank Muamalat Indonesia sejak tahun 2015, dimana bersama dengan 7 (tujuh) bank lokal lain yang merepresentasikan 46% aset perbankan nasional pada tahun tersebut, secara sukarela berinisiatif menjadi "*First Movers on Sustainable Banking*", sebuah proyek percontohan yang diprakarsai oleh Otoritas Jasa Keuangan (OJK). Didukung WWF Indonesia, kedelapan bank tersebut berpartisipasi dalam rangkaian program peningkatan kapasitas dan asistensi teknis terkait integrasi aspek Environmental, Social, and Governance (ESG) serta menyempurnakan kebijakan pembiayaan kelapa sawit berkelanjutan.

Dengan komitmen Bank menjalankan kegiatan operasional ramah lingkungan secara konsisten, Bank tidak menerima

implementation of environmentally friendly corporate financing policies. Second, implementing environmentally friendly funding, and third, implementing environmentally friendly operational policies

These three approaches are presented in more detail in the Bank Muamalat Indonesia 2022-2025 Sustainable Financial Action Plan (RAKB) document. The RAKB document that has been prepared is proof of Bank Muamalat Indonesia's commitment to supporting the achievement of sustainability goals in every operational and business activity.

In practice, the Bank has various Policies and Standard Operating Procedures (SOPs) for providing environmentally friendly industrial financing through the issuance of several provisions, namely:

- General Policy on Financing No. ERM/B/I/020/2019 of 2019 and its amendments.

The commitment to realizing sustainable finance has been initiated by Bank Muamalat Indonesia since 2015, where together with 7 (seven) other local banks, which represented 46% of national banking assets in that year, voluntarily took the initiative to become "*First Movers on Sustainable Banking*", a pilot project that was initiated by the Financial Services Authority (OJK). Supported by WWF Indonesia, the eight banks participated in a series of capacity building programs and technical assistance related to the integration of Environmental, Social, and Governance (ESG) aspects as well as improving sustainable palm oil financing policies.

Moreover, the Bank's commitment to always implementing an environmentally friendly banking system is also realized through the implementation of various programs, among others:

## GREEN BUILDING

Bank telah menerapkan prinsip operasional ramah lingkungan melalui berbagai upaya di lingkungan kerja. Seperti penggunaan kaca khusus *double glass* sebagai penutup *facade* gedung Kantor Pusat Bank Muamalat Indonesia yang dapat menghemat penggunaan listrik pada bangunan dengan memaksimalkan pencahayaan matahari.

Upaya lain yang dilakukan Bank yaitu area kantor pusat juga dilengkapi dengan berbagai jenis tumbuhan yang menghasilkan O<sub>2</sub> dan mampu menyerap CO<sub>2</sub>. Gedung Kantor Pusat juga memanfaatkan lampu-lampu LED untuk mengurangi konsumsi listrik serta dilengkapi sensor gerak dalam pengelolaan aktivasi pencahayaan. Gedung juga dilengkapi dengan *roller blinders* untuk fleksibilitas dalam mengatur kebutuhan pencahayaan alami dari luar guna mengoptimalkan pemanfaatan cahaya alami serta meminimalkan penggunaan partisi *blocking* di area kantor.

## PENGELOLAAN ENERGI

Bank Muamalat Indonesia menyadari bahwa penggunaan energi sangat penting dalam menjalankan kegiatan operasional. Bank menggunakan dua jenis sumber energi untuk mendukung kegiatan operasional, yakni tenaga listrik yang seluruhnya dipasok oleh PLN, dan BBM untuk kendaraan operasional dalam rangka mendukung mobilitas pegawai dalam menjalin interaksi tatap muka dengan para nasabah, maupun calon nasabah. **[GRI 3-3]**

Bank Muamalat Indonesia berkomitmen secara berkelanjutan melakukan upaya efisiensi energi di setiap kegiatan operasional. Untuk itu, Bank menerapkan berbagai langkah upaya pengelolaan energi dengan menerapkan kebijakan dan inisiatif hemat energi sebagai berikut: **[OJK F.7][OJK F.12]**

- Inisiatif *cost efficiency* melalui program “*Reduction of electricity cost*” & “*Utilization of Muamalat Tower*” pada:
  - o Barang - barang elektronik seperti dispenser, kulkas, mesin fotokopi dan lain-lain dipadamkan dan dicabut setelah jam operasional mulai pukul 18.00 WIB dan saat hari libur.
  - o Mematikan komputer dan perlengkapan elektronik lainnya saat tidak digunakan.
  - o Mematikan AC dan lampu pada area kerja yang tidak digunakan, serta memanfaatkan cahaya matahari untuk membantu penerangan ruangan pada saat siang hari dengan mengatur posisi tirai/*roller blind*.
  - o Mengoptimalkan penggunaan tangga darurat untuk naik/turun ke lantai terdekat.

did not receive a single complaint regarding environmental issues and did not receive fines and non-monetary sanctions for non-compliance with environmental laws and regulations throughout 2023. **[GRI 307-1]**

## GREEN BUILDING

The Bank has implemented environmentally friendly operational principles through various efforts in the work environment. Such as the use of special double glass as a cover for the facade of the Bank Muamalat Indonesia Head Office building, which can save electricity usage in the building by maximizing sunlight.

Another effort made by the Bank is that the head office area is also equipped with various types of plants that produce O<sub>2</sub> and are able to absorb CO<sub>2</sub>. The Head Office Building also utilizes LED lights to reduce electricity consumption and is equipped with motion sensors to manage lighting activation. The building is also equipped with roller blinds for flexibility in managing natural lighting needs from outside to optimize the use of natural light and minimize the use of blocking partitions in office areas.

## ENERGY MANAGEMENT

Bank Muamalat Indonesia realizes that energy consumption is crucial in carrying out operational activities. The Bank uses two types of energy sources to support operational activities, namely electricity supplied entirely by PLN, and fuel for operational vehicles in order to support employee mobility in establishing face-to-face interactions with customers and potential customers. **[GRI 3-3]**

Bank Muamalat Indonesia is committed to continuously carrying out energy efficiency efforts in every operational activity. Accordingly, the Bank carries out various energy management measures by implementing the following energy saving policies and initiatives: **[OJK F.7][OJK F.12]**

- Cost efficiency initiatives through the “*Reduction of electricity cost*” and “*Utilization of Muamalat Tower*” programs on:
  - o Electronic items such as dispensers, refrigerators, copiers, and others are turned off and plugged out after operating hours, starting at 18.00 WIB and on holidays.
  - o Turning off computers and other electronic equipment when not in use.
  - o Turn off the air conditioner and lights in the work area that are not in use and take advantage of sunlight to help brighten the room during the day by adjusting the position of the blinds/*roller blinds*.
  - o Optimizing the use of emergency stairs to go up/down to the nearest floor.

- o Menggunakan air secukupnya dan mengatur volume air keran setelah digunakan untuk menghemat listrik dari mesin pompa air.
  - o Meminimalkan frekuensi naik/turun lift.
  - o Mematikan lampu mushalla/masjid setelah digunakan.
  - o Di Muamalat Tower dengan efisiensi sebagian lampu tangga darurat dan sebagian sebagian lampu area basement mulai pukul 18.00 WIB.
  - o Di Muamalat Tower dengan mengefisienkan operasional 1 unit lift *low zone*, dan 1 unit lift parkir pada waktu tertentu.
  - o Di Muamalat Tower membatasi fasilitas AC setiap lantai dimatikan mulai pukul 17.00 WIB & lampu mulai pukul 19.00 WIB.
  - o Sedangkan di kantor cabang, mengatur timer (jika ada) lampu gedung facia "Bank Muamalat" agar menyala hanya sampai dengan pukul 22.00 WIB.
- Program "Reduction of gasoline cost" pada Inisiatif *cost efficiency*:
    - o Pengaturan penggunaan mobil operasional di Muamalat Tower & kantor cabang (hemat penggunaan bensin mobil operasional)
    - o Pengelolaan jam kerja, lembur driver sehingga mengurangi penggunaan bensin untuk mobil operasional dikarenakan waktu penggunaannya dibatasi.
    - o Pengaturan aktivitas tim sales & RCM, sebelum "New Normal" banyak aktivitas bertemu dengan nasabah atau pihak ketiga di luar kantor. Melalui implementasi "New Normal" aktivitas lebih banyak dilakukan melalui telepon atau media komunikasi elektronik lainnya, dan melakukan visit hanya diperlukan sehingga mengurangi aktivitas penggunaan mobil operasional.
- o Use enough water and adjust the volume of tap water after use to save electricity from the water pump machine.
  - o Minimizing the frequency of going up/down the elevator.
  - o Turning off the lights of the mushalla/mosque after use.
  - o At Muamalat Tower, with the efficiency of some of the emergency staircase lights and some of the basement area lights, starting at 18.00 WIB.
  - o At Muamalat Tower, by streamlining the operation of 1 low-zone lift unit and 1 parking lift unit at a certain time.
  - o At Muamalat Tower, air conditioning facilities are limited on each floor, starting at 17.00 WIB, and lights start at 19.00 WIB.
  - o Meanwhile, at the branch office, set the timer (if there is one) for the lights on the "Bank Muamalat" facia building to light up only until 22.00 WIB.
- The "Reduction of gasoline cost" program on the cost efficiency initiative:
    - o Managing the use of operational cars at Muamalat Tower and branch offices (efficient use of operational cars' gasoline)
    - o Management of working hours and overtime for drivers, thereby reducing the use of gasoline for operational cars due to limited usage time.
    - o Prior to the "New Normal," many activities of the sales and RCM teams were conducted with customers or third parties outside the office. More activities are carried out by telephone or other electronic communication media as a result of the implementation of the "New Normal," and visits are only required to reduce the activity of using operational cars.

Berbagai inisiatif yang diterapkan Bank tersebut membantu menekan jumlah konsumsi listrik maupun BBM meskipun masih lebih tinggi dibanding dengan tahun sebelumnya dikarenakan kebutuhan yang memang meningkat seiring aktivitas dan mobilitas yang juga meningkat pasca-pencabutan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) oleh pemerintah di awal tahun 2023. Hal tersebut dapat tercermin dalam tabel berikut.

The various initiatives implemented by the Bank have helped in reducing the amount of electricity and fuel consumption, although it is still higher compared to the previous year due to demand which has increased along with activity and mobility, which has also increased after the government lifted the Implementation of Community Activity Restrictions (PPKM) in early 2023. This can be reflected in the following table.

## PENGELOLAAN EMISI GRK

Bank berkomitmen menjalankan aktivitas operasional dengan menerapkan prinsip keberlanjutan dan mengimplementasikan program penghematan energi sebagai bentuk kepedulian terhadap keberlangsungan aspek lingkungan. Pengurangan emisi CO<sub>2</sub> merupakan salah satu fokus Bank yang selaras pada rumusan *Sustainable Development Goals* (SDGs). **[GRI 3-3]**

Bank berupaya mengelola emisi CO<sub>2</sub> atau Karbondioksida atau Gas Rumah Kaca (GRK), yang berasal dari pembakaran langsung bahan bakar fosil untuk BBM transportasi dan dari penggunaan listrik. Pengelolaan penggunaan energi yang telah dilakukan Bank dapat dilihat pada uraian sebelumnya.

Berdasarkan data pengelolaan atau konsumsi energi tersebut di atas, Bank telah menghitung besaran emisi CO<sub>2</sub> yang dihasilkan dan ditampilkan pada tabel-tabel berikut.

## MANAGEMENT OF GHG EMISSIONS

The Bank is committed to carrying out operational activities by applying sustainability principles and implementing energy saving programs as a form of concern for the sustainability of environmental aspects. Reducing CO<sub>2</sub> emissions is one of the Bank's focuses, which is in line with the formulation of Sustainable Development Goals (SDGs). **[GRI 3-3]**

The Bank seeks to manage CO<sub>2</sub> or Carbon Dioxide or Greenhouse Gas (GHG) emissions, which is derived from direct burning of fossil fuels for transportation and electricity. The management of energy consumption that has been carried out by the Bank can be viewed in the previous description.

Based on the abovementioned energy management or consumption data, the Bank has calculated the amount of CO<sub>2</sub> emissions produced and is presented in the following table.

## PENGUNAAN AIR

Penggunaan air merupakan salah satu aspek penting dalam menjalankan aktivitas operasional. Pemenuhan kebutuhan sumber air bersih Bank Muamalat Indonesia berasal dari pihak ketiga (PDAM). Bank berkomitmen untuk tidak menggunakan air tanah dengan pertimbangan bahwa penggunaan air tanah secara berlebihan akan menyebabkan degradasi kuantitas maupun kualitas air tanah sehingga bisa memiliki dampak pada keseimbangan lingkungan sekitar.

Sebagai upaya dalam rangka penghematan penggunaan air, Bank terus mensosialisasikan dan mempromosikan gerakan “gunakan air secukupnya” untuk pemakaian air di toilet, masjid, kantin, taman, untuk mesin pendingin udara dan beberapa aktivitas lainnya.

Pada tahun 2023, konsumsi penggunaan air untuk fasilitas gedung Kantor Pusat Bank dapat dilihat pada tabel di bawah ini: **[OJK F.8] [GRI 303-3]**

## WATER CONSUMPTION

Water use is an important aspect in carrying out operational activities. Bank Muamalat Indonesia's supply of clean water comes from a third party (PDAM). The Bank is committed not to use groundwater with the consideration that excessive use of groundwater will lead to degradation of the quantity and quality of groundwater, which will ultimately have an impact on the balance of the surrounding environment.

As an effort to reduce water consumption, the Bank continues to socialize and promote the “use enough water” movement for water use in toilets, mosques, canteens, parks, for air conditioning machines and several other activities.

In 2023, water consumption for Bank Head Office building facilities can be viewed in the following table: **[OJK F.8] [GRI 303-3]**

Another sustainability effort related to water consumption efficiency is that the Bank has also maximized the use of water recycling technology in the Muamalat Tower Building, namely by using recycled water for tower cooling and garden watering in the Muamalat Tower building as well as other branch offices. **[GRI 303-1]**

## PENGUNAAN KERTAS

Penghematan kertas merupakan salah satu kebijakan yang dapat mendukung agenda pemerintah terkait aspek keberlanjutan lingkungan. Bank Muamalat Indonesia menyadari bahwa program penghematan kertas yang dilakukan secara tidak langsung berkontribusi dalam menjaga kelestarian alam, terutama kelangsungan hidup hutan. Oleh karena itu, Bank melaksanakan beberapa program sebagai wujud komitmen mengurangi pemakaian kertas yaitu dengan mendorong peningkatan penggunaan perangkat elektronik sebagai upaya mengurangi penggunaan kertas sehingga menciptakan instrumen perbankan yang ramah lingkungan.

Komitmen ini juga dalam rangka Bank mendukung gerakan melindungi hutan dengan meningkatkan kesadaran para karyawan agar tidak menggunakan kertas secara berlebihan. Salah satu program efisiensi pemakaian kertas adalah dengan menggunakan Multi Function Device (MFD) Apeosport V C3070 & HP Laserjet Managed MFP E72525DN untuk penggunaan *print* hitam putih di Kantor Pusat (sejak 2015), dan MFD HP M586 & Lexmark MX521ADE untuk di kantor cabang (sejak tahun 2017) dengan metode cetak *2-sided* atau *duplex printing*.

Penggunaan kertas untuk Kantor Pusat selama tahun 2023 dan perbandingannya dengan tahun 2022 dapat dilihat pada tabel berikut: [\[OJK F.5\]](#)

Therefore, the Bank is implementing several programs as a form of commitment to reduce paper use, namely by encouraging increased use of electronic devices in an effort to reduce paper use thereby creating environmentally friendly banking instruments.

This commitment is also in the context of the Bank supporting the movement to protect forests by increasing employee awareness not to use excessive paper. One of the paper usage efficiency programs is to use the Multi Function Device (MFD) Apeosport V C3070 & HP Laserjet Managed MFP E72525DN for black and white printing at the Head Office (since 2015), and the HP MFD M586 & Lexmark MX521ADE for branch offices (since 2017) with a 2-sided or duplex printing method.
