Ketua Dewan Pengawas Syariah  
Chairman, Sharia Supervisory Board

**Dewan Pengawas Syariah sangat mengapresiasi seluruh jajaran manajemen yang secara aktif dan responsif melakukan langkah antisipasi pada Bank Muamalat melalui peningkatan dalam proses bisnis serta tata kelola yang baik.**

Sharia Supervisory Board highly appreciates all levels of management who are active and responsive in taking anticipatory steps at Bank Muamalat through improvements in business processes and good governance

*Assalamualaikum Warohmatullahi Wabarokatuh  
Bismillaahirrohmaanirrohiim*

*Alhamdulillah Rabbi 'Aalamin, Wa Shalatu Wa Salamu 'Ala Nabiyyina Muhammad, Wa 'Ala Aalihi Wa Ashabihi. Amma Ba'du.*

**Para Pemegang Saham dan Pemangku  
Kepentingan yang Terhormat,**

Puji dan syukur kita panjatkan kehadiran Allah Subhanahu Wa Ta'ala atas rahmat dan karunia-Nya yang telah diberikan kepada kita semua. Selawat serta salam semoga tercurah untuk baginda Rasulullah SAW, beserta seluruh keluarga dan kerabatnya.

Dalam kesempatan ini, perkenankan kami selaku Dewan Pengawas Syariah (DPS) menyampaikan laporan atas tugas dan fungsi yang telah dijalankan sepanjang tahun buku 2022. Dengan ridho Allah Subhanahu Wa Ta'ala, tepat pada tanggal 4 Februari 2022, Badan Pengelola Keuangan Haji (BPKH) telah resmi menjadi pemegang saham utama PT Bank Muamalat Indonesia Tbk ("Bank Muamalat", "BMI", "Bank"). Kehadiran BPKH merupakan tonggak sejarah bagi perkembangan Bank Muamalat ke depannya, terutama untuk penguatan struktur permodalan Bank Muamalat dan mendukung target bisnis yang telah dicanangkan.

**Dear Esteemed Shareholders and  
Other Stakeholders,**

Praise and gratitude to Allah Subhanahu Wa Ta'ala for His mercy and grace that has been given to all of us. Prayers and peace be upon the Prophet Muhammad SAW, all his family, and his companions.

On this occasion, please allow us, as the Sharia Supervisory Board (SSB), to present a report on the duties and functions that have been carried out throughout the 2022 fiscal year. With the blessing of Allah Subhanahu Wa Ta'ala, on 4 February 2022, the the Hajj Financial Management Agency (BPKH) had officially become the main shareholder of PT Bank Muamalat Indonesia Tbk ("Bank Muamalat," "BMI," "Bank"). The presence of the Hajj Financial Management Agency is a milestone for the future development of Bank Muamalat, especially for strengthening the capital structure of Bank Muamalat and supporting the business targets that have been set.

Dewan Pengawas Syariah berpandangan, kekuatan aset dan permodalan Bank yang baik akan membuat ruang gerak Bank Muamalat menjadi semakin leluasa dalam industri perbankan dan daya jangkau Bank juga semakin luas dengan sebaran jaringan kantor yang luas.

Namun begitu, menghadapi kemungkinan adanya kenaikan tingkat inflasi dan risiko resesi pada tahun 2023 akan memberikan tantangan yang tak mudah bagi industri perbankan dan manajemen untuk merespons dan beradaptasi.

Dalam situasi seperti itu, DPS berharap manajemen Bank Muamalat senantiasa menjaga unsur kehati-hatian dalam menjalankan kegiatan usahanya. DPS sangat mengapresiasi seluruh jajaran manajemen yang secara aktif dan responsif melakukan langkah antisipasi pada Bank Muamalat melalui peningkatan dalam proses bisnis serta tata kelola yang baik. Begitu juga dengan penerapan prinsip-prinsip syariah terhadap produk dan proses bisnis yang dijalankan.

## FOKUS 2022

Pada tahun 2022, Dewan Pengawas Syariah Bank Muamalat memiliki sejumlah fokus dalam pemenuhan aspek syariah sebagai rekomendasi DPS kepada manajemen, baik terkait dengan operasional, maupun bisnis Bank.

Dari sisi produk dan layanan, DPS memberikan opini terhadap usulan produk/aktivitas baru Bank Muamalat serta melakukan kaji ulang produk-produk dan layanan *existing* Bank untuk memastikan kesesuaian produk dan Layanan dengan prinsip syariah. Dalam implementasi aspek syariah, Dewan Pengawas Syariah dibantu oleh *Sharia Compliance Officer* melakukan *review* dan penyempurnaan terhadap kebijakan, prosedur, dan *Standard Operational Procedure* (SOP) Bank Muamalat dalam rangka memenuhi prinsip-prinsip syariah. Adapun untuk memastikan kepatuhan dalam tataran implementasi, Dewan Pengawas Syariah melakukan uji petik di 14 (empat belas) kantor cabang secara periodik dan bergiliran. Selain hal tersebut, DPS juga melakukan pengembangan pada perangkat analisa dan pengawasan terhadap aspek syariah agar dapat memberikan masukan-masukan yang tepat dan implementatif kepada manajemen.

The Sharia Supervisory Board believes that the strength of the Bank's assets and good capital will create opportunities for Bank Muamalat to become more flexible in the banking industry and to expand its reach with extensive office networks.

Nevertheless, the banking industry and its management will face difficult challenges in responding and adapting to the possibility of an increase in the inflation rate and the risk of a recession in 2023.

In such a situation, SSB hopes that the management of Bank Muamalat will always maintain prudential principles in implementing its business activities. SSB highly appreciates all levels of management who are active and responsive in taking anticipatory steps at Bank Muamalat through improvements in business processes and good governance. Likewise, with the application of sharia principles to the products and business processes that are carried out.

## FOCUS 2022

In 2022, the Sharia Supervisory Board of Bank Muamalat focused on fulfilling sharia aspects as SSB recommendations to management related to Bank Muamalat's operations and business.

Regarding products and services, SSB provides insights on proposed new products/activities to Bank Muamalat and reviews the Bank's existing products and services to ensure their compatibility with sharia principles. In implementing sharia aspects, the Sharia Supervisory Board is assisted by the Sharia Compliance Officer to review and refine the Bank's policies, procedures, and Standard Operational Procedure (SOP) in order to comply with sharia principles. As for ensuring compliance at the implementation level, the Sharia Supervisory Board conducts sampling tests at 14 (fourteen) branch offices periodically and in rotation. In addition, the Sharia Supervisory Board also develops analytical and monitoring tools on sharia aspects in order to provide appropriate and implementable inputs to management.

Terkait dengan sisi sumber daya manusia, DPS telah meminta kepada manajemen untuk meningkatkan *skill* dan *knowledge* seluruh jajaran karyawan pada segala level dalam hal pengetahuan tentang produk/aktivitas layanan perbankan syariah, baik secara konsep maupun implementasi. DPS juga menyelenggarakan kegiatan Dirasat Islamiyah sebanyak dua kali pada tahun 2022 sebagai media untuk *sharing knowledge* terkait aspek syariah ke jajaran manajemen Bank Muamalat. Selanjutnya, DPS juga menekankan insan Bank Muamalat untuk terus memberikan *service excellence* pada setiap layanan yang diberikan untuk menjaga dan meningkatkan *competitiveness* bisnis Bank, khususnya di dunia perbankan syariah.

### PENGAWASAN TERKAIT PENERAPAN DAN KEPATUHAN PRINSIP-PRINSIP SYARIAH

Aktivitas pengawasan Dewan Pengawas Syariah mencakup pengawasan terhadap pelaksanaan prinsip syariah dalam kegiatan penghimpunan dana dan penyaluran dana serta pelayanan jasa. Pelaksanaan fungsi pengawasan DPS dibantu oleh Unit Sharia Compliance yang berada di bawah Direktur Kepatuhan. Pengawasan tersebut dilakukan melalui rapat rutin setiap bulan, memberikan opini atas produk/aktivitas dan program baru yang diterbitkan oleh unit bisnis, melakukan uji petik terhadap kegiatan operasional penyaluran dan penghimpunan dana, memberikan *sharing knowledge* terkait aspek syariah secara berkala ke semua level serta memberikan *advise* dalam hal peningkatan akhlaqul karimah. Detail atas pengawasan DPS selanjutnya termuat secara rinci dalam Bab Laporan Tata Kelola Perusahaan dalam laporan tahunan ini.

Ke depan, DPS berharap agar Bank dapat tumbuh lebih baik dari tahun sebelumnya. Peningkatan kinerja tersebut tidak terbatas pada kinerja pendapatan, melainkan juga berkenaan dengan layanan dan produk. Selain itu, diharapkan adanya peningkatan profesionalisme dalam kerangka implementasi prinsip syariah secara komprehensif pada seluruh rangkaian kinerja Bank. DPS beserta *unit sharia compliance* juga berencana untuk terus menyempurnakan kebijakan, prosedur, dan *Standard Operational Procedure* (SOP) Bank Muamalat sesuai dengan prinsip-prinsip syariah serta tata kelola perusahaan yang baik, agar dapat menjaga integritas Bank Muamalat sebagai Bank murni syariah pertama di Indonesia.

Regarding the human resources side, SSB has requested the management to improve the skills and knowledge of all employees at all levels related to the knowledge of sharia banking product/service activities, both in concept and implementation. SSB also organized Dirasat Islamiyah activities twice in 2022 as a medium for sharing knowledge related to sharia aspects to the management of Bank Muamalat. Furthermore, SSB also emphasizes Bank Muamalat personnel to continue to provide excellent service in every service provided to maintain and increase the competitiveness of the Bank's business, especially in the world of sharia banking.

### SUPERVISION RELATED TO THE IMPLEMENTATION AND COMPLIANCE OF SHARIA PRINCIPLES

The supervisory activities of the Sharia Supervisory Board include supervising the implementation of sharia principles in raising funds and channeling funds, and providing services. The implementation of the SSB supervisory function is assisted by the Sharia Compliance Unit, which is under the Director of Compliance. Supervision is conducted through regular monthly meetings, providing opinions on new products/activities and programs issued by business units, conducting sampling on operational activities of channeling and raising funds, providing knowledge sharing related to sharia aspects on a regular basis to all levels, and providing advice in regards to the improvement of akhlaqul karimah (noble character). Further details on SSB supervision are contained in detail in the Corporate Governance Report Chapter of this annual report.

In the future, SSB hopes that the Bank can grow better than the previous year. The performance improvement is not limited to revenue performance but also with regard to services and products. Furthermore, it is expected that there will be an improvement in professionalism within the framework of a comprehensive implementation of sharia principles in all of the Bank's performance series. SSB and the Sharia Compliance Unit also plan to continue improving Bank Muamalat's policies, procedures, and Standard Operational Procedures (SOP) pursuant to sharia principles and good corporate governance to maintain Bank Muamalat's integrity as the first pure sharia bank in Indonesia.

Atas kinerja yang telah ditunjukkan pada tahun 2022, DPS juga menyampaikan rekomendasi ke depan dalam rangka pemenuhan prinsip-prinsip syariah serta kepatuhan terhadap peraturan perundang-undangan yang berlaku. DPS berharap manajemen selalu berkomitmen dalam peningkatan profesionalisme serta dapat melakukan tindak lanjut terhadap hal-hal yang perlu dilakukan dalam rangka penyempurnaan produk dan implementasi dari aspek-aspek syariah.

## REALISASI KEGIATAN DPS

Sepanjang tahun 2022, Dewan Pengawas Syariah telah melaksanakan 12 (dua belas) kali rapat rutin. Seluruh kegiatan pengawasan DPS telah dikoordinasikan dengan Dewan Komisaris dan Direksi melalui rapat rutin. #### **Para Pemegang Saham dan Pemangku Kepentingan yang Terhormat,**

Berkat nikmat dan karunia Allah SWT, PT Bank Muamalat Indonesia Tbk ("Bank Muamalat", "BMI" "Bank") mampu melewati tahun 2022 dengan kinerja yang lebih baik dibandingkan tahun sebelumnya. Tentu pencapaian itu tidak mudah, mengingat kondisi perekonomian global yang mengalami ketidakpastian seperti ekonomi Amerika Serikat (AS) dan Eropa menghadapi perlambatan.

Dinamika global itu disebabkan oleh terganggunya rantai pasok perdagangan global akibat perang Rusia dan Ukraina, sehingga menyebabkan kenaikan harga. Lonjakan inflasi pun tak terhindarkan, sehingga mendorong bank sentral di banyak negara, seperti bank sentral AS, The Federal Reserve (The Fed), menaikkan suku bunga acuan. Belakangan, Bank Indonesia mengambil kebijakan serupa untuk meredam inflasi dan mengendalikan nilai tukar rupiah yang melemah.

#### **Distinguished Shareholders and Stakeholders,**

Thanks to the favor and grace of Allah SWT, PT Bank Muamalat Indonesia Tbk ("Bank Muamalat", "BMI", or "the Bank") was able to navigate through 2022 with better performance than the previous year. This was a challenging achievement, given the uncertain global economic conditions as manifested in, for example, the economic slowdown in the United States (US) and Europe.

The global dynamic was caused by the disruption of the global trade supply chain due to the Russia-Ukraine conflict, causing price increases. A spike in inflation was inevitable, prompting central banks in many countries, such as the US central bank, The Federal Reserve (The Fed), to raise benchmark interest rates. Later, Bank Indonesia adopted a similar policy to curb inflation and control the weakening rupiah exchange rate.

Namun demikian, perekonomian Indonesia tetap tangguh menghadapi perkembangan global yang terjadi. Badan Pusat Statistik (BPS) mencatat pertumbuhan ekonomi Indonesia mencapai 5,31% secara tahunan (*year on year/ yoy*). Bahkan lebih tinggi dari pencapaian 2021 yang sebesar 3,70%. Konsumsi rumah tangga yang menjadi penopang perekonomian nasional, tumbuh 4,93% (*yoy*). Investasi dan ekspor juga tumbuh positif.

Sejalan dengan kondisi perekonomian yang membaik, fungsi intermediasi perbankan juga bergerak positif. Pertumbuhan kredit perbankan pada Desember 2022 tumbuh 11,35% (*yoy*), sementara tahun sebelumnya hanya 5,24% (*yoy*). Peningkatan pertumbuhan kredit terjadi merata pada seluruh sektor ekonomi dan jenis kredit, terutama Kredit Investasi dan Kredit Modal Kerja.

Pemulihan fungsi intermediasi bank juga terjadi pada perbankan syariah, dengan pertumbuhan pembiayaan pada 2022 sebesar 20,1% (*yoy*). Pencapaian itu lebih tinggi dibandingkan tahun sebelumnya yang sebesar 6,6% (*yoy*).

Dalam situasi yang dinamis tersebut, kinerja Bank Muallamat juga bergerak positif. Pencapaian laba sebelum pajak (PBT) tahun 2022 tercatat tumbuh sebesar 315,67% dibandingkan tahun sebelumnya.

Pencapaian tersebut tentu patut disyukuri. Karena itu, Dewan Komisaris menghargai kerja keras Direksi dalam hal pemenuhan strategi Rencana Bisnis Bank 2022 serta hasil yang dicapai. Dewan Komisaris berpandangan bahwa sepanjang tahun buku 2022, Direksi telah bekerja dengan cukup baik.

Sejalan dengan hal tersebut, Dewan Komisaris berharap adanya keberlanjutan pemulihan ekonomi di periode-periode yang akan datang. Dengan demikian, kegiatan usaha, termasuk kegiatan bisnis Bank, dapat kembali berjalan dengan normal dan mampu menghasilkan nilai tambah bagi seluruh pemangku kepentingan.

## PENILAIAN TERHADAP KINERJA DIREKSI

### Dasar Penilaian

Penilaian Dewan Komisaris terhadap kinerja Direksi didasarkan pada pencapaian finansial dan non-finansial. Dalam pencapaian finansial, di antara faktor yang diukur adalah pemenuhan target-target yang telah ditetapkan dalam Rencana Bisnis Bank. Misalnya, dari sisi pencapaian nilai aset, penyaluran pembiayaan, Dana Pihak Ketiga (DPK), biaya operasional, dan pendapatan operasional.

However, the Indonesian economy remained resilient in the face of global developments. The Central Statistics Agency (BPS) recorded that Indonesia's economic growth reached 5.31% on an annual basis (*year on year / yoy*). This was even higher than 2021's achievement of 3.70%. Household consumption, which supports the national economy, grew by 4.93% (*yoy*). Investments and exports also grew positively.

In line with improving economic conditions, the banking intermediation function is also moving positively. The position of bank credit in December 2022 has grown by 11.35% (*yoy*), compared to only 5.24% (*yoy*) in the previous year. The increase in credit growth occurred evenly across all sectors of the economy and types of credit, especially in Investment Credit and Working Capital Credit.

The recovery of the banking intermediary function also occurred in the Islamic banking sector, with financing growth of 20.1% (*yoy*) in 2022. This achievement was higher than the previous year, which amounted to 6.6% (*yoy*).

In this dynamic situation, Bank Muallamat's performance also moved positively. The Bank recorded a growth of 315.67% in Profit Before Tax (PBT) over the level in the previous year.

This achievement is undoubtedly something to be grateful for. Therefore, the Board of Commissioners appreciates the hard work of the Board of Directors in successfully implementing the 2022 Bank Business Plan strategy and the results achieved. The Board of Commissioners believes that the Board of Directors has taken the correct actions throughout the 2022 financial year.

Alongside this development, the Board of Commissioners expects a sustained economic recovery in the coming periods. Thus, business activities, including those of the Bank, can return to normal and generate added value for all stakeholders.

## ASSESSMENT OF THE PERFORMANCE OF THE BOARD OF DIRECTORS

### Basis of Assessment

The Board of Commissioners' assessment of the performance of the Board of Directors is based on financial and non-financial achievements. Among the factors measured in terms of financial achievements is the fulfillment of targets in the Bank Business Plan. This includes asset value, financing disbursement, Third Party Funds (DPK), operating expenses, and operating income.

Pencapaian finansial lain yang menjadi perhatian Dewan Komisaris adalah rasio-rasio penting seperti *Non-Performing Financing* (NPF), *Return on Asset* (ROA), *Return on Equity* (ROE). Untuk pencapaian non-finansial, misalnya terkait dengan penerapan tata kelola perusahaan yang baik atau *Good Corporate Governance* (GCG).

Dalam menjalankan tugasnya, Dewan Komisaris selalu memastikan terselenggaranya pelaksanaan prinsip-prinsip GCG dalam setiap kegiatan usaha Bank Muamalat pada seluruh tingkatan atau jenjang organisasi. Dewan Komisaris juga memantau pelaksanaan seluruh rencana dan strategi yang telah ditetapkan Bank seperti tertuang dalam Rencana Bisnis Bank PT Bank Muamalat Tbk Tahun 2022.

## HASIL PENILAIAN

Mengacu pada sejumlah pertimbangan tersebut, Dewan Komisaris berpandangan bahwa secara umum, kinerja Direksi pada tahun buku 2022 cukup baik. Hal itu tercermin dari beragam pencapaian yang diperoleh Bank.

Dari sisi finansial misalnya, Bank Muamalat berhasil mencapai pertumbuhan aset, pembiayaan, dan profitabilitas yang positif. Dibandingkan tahun sebelumnya, aset Bank tumbuh 4,18%, pembiayaan naik 4,33%, dan laba sebelum pajak (PBT) lebih tinggi 315,67%.

Sementara jika dilihat dari sisi penghimpunan dana, pada tahun 2022 jumlah Dana Pihak Ketiga (DPK) Bank mengalami penurunan sebesar Rp728 miliar. Namun hal ini tidak banyak mempengaruhi kinerja Bank secara keseluruhan. Pencapaian finansial Bank yang positif tersebut didukung oleh berbagai inisiatif Bank dalam berbagai hal di antaranya inisiatif penguatan modal serta inisiatif dalam *digital banking*.

Dalam hal inisiatif terkait *digital banking*, Bank terus melakukan pengembangan *digital* melalui Muamalat Digital Islamic Network (MDIN). Inisiatif tersebut merupakan respons terhadap perkembangan kebutuhan nasabah akan perbankan digital serta pesatnya pertumbuhan transaksi *digital* sejak pandemi COVID-19.

Hingga kini, telah terdapat berbagai fitur unggulan dalam MDIN, seperti fitur *biometric login*, fitur *auto read One Time Password*, fitur konten Islami, dan fitur pembayaran dengan menggunakan QR Code. Fitur ini terhubung dengan *Quick Response Code Indonesian Standard* (QRIS).

Other financial achievements that are of concern to the Board of Commissioners are key ratios such as *Non-Performing Financing* (NPF), *Return on Asset* (ROA), and *Return on Equity* (ROE). Non-financial achievements, for example, are related to implementing good corporate governance (GCG).

In carrying out its duties, the Board of Commissioners always ensures the implementation of GCG principles in every business activity of Bank Muamalat at all levels of the organization. The Board of Commissioners also monitors the performance of all plans and strategies set by the Bank as stated in the Bank Business Plan of PT Bank Muamalat Tbk Year 2022.

## RESULT OF ASSESSMENT

Based on these considerations, the Board of Commissioners believes that in general, the performance of the Board of Directors in fiscal year 2022 was outstanding. This is reflected in the various achievements obtained by the Bank.

In terms of finances, for example, Bank Muamalat managed to achieve positive growth in assets, financing, and profitability. Compared to the previous year, the Bank's total assets grew by 4.18%, financing rose by 4.33%, and profit before tax (PBT) was 315.67% higher.

Meanwhile, regarding fund collection, the amount of the Bank's Third Party Funds (DPK) in 2022 decreased by Rp728 billion. However, it did not affect the Bank's overall performance. The Bank's positive financial achievements were supported by various initiatives in various areas, including capital strengthening initiatives and initiatives in digital banking.

Regarding digital banking initiatives, the Bank continues to develop its digital capabilities through the Muamalat Digital Islamic Network (MDIN). This initiative is a response to the trend of customer preferences for digital banking and the rapid growth of digital transactions since the outbreak of the COVID-19 pandemic.

To date, the MDIN offers a variety of excellent features, such as biometric login, One Time Password auto-read, Islamic content features, and payment features using QR Code. This last feature is connected to the Quick Response Code Indonesian Standard (QRIS).

Inisiatif *digital banking* Bank tersebut telah mendapat pengakuan dari pihak eksternal seperti yang ditunjukkan dalam berbagai penghargaan yang diterima. Salah satu penghargaan dalam hal *digital banking* yang diterima Bank adalah "The Best Bank in Digital Services" dalam ajang TEMPO Financial Award (FTA) 2022.

## PENGAWASAN TERHADAP PERUMUSAN DAN IMPLEMENTASI STRATEGI

Dewan Komisaris telah melakukan *review* terhadap perumusan strategi Bank yang disusun oleh Direksi seperti tertuang dalam Rencana Bisnis Bank. Direksi juga telah menyampaikan kepada Dewan Komisaris terkait aspek kepatuhan terhadap seluruh peraturan dan perundang-undangan yang berlaku, termasuk kepatuhan terhadap aspek syariah. Oleh karena itu, Dewan Komisaris mengapresiasi kinerja Direksi dalam pemenuhan target dari RBB tersebut.

Terdapat 3 (tiga) pilar strategis yang telah dilakukan oleh Direksi yang mendorong pencapaian kinerja BMI tahun 2022. ## KONDISI PEREKONOMIAN

Sepanjang tahun 2022, negara-negara di dunia dihadapkan pada ketidakpastian ekonomi serta kesulitan untuk menjaga stabilitas ekonominya. Ketidakseimbangan politik dan ekonomi membawa dampak negatif bagi rantai pasok global yang pada akhirnya memicu kenaikan harga energi dan pangan. Dana Moneter Internasional (*International Monetary Fund/IMF*) memperkirakan inflasi mencapai 8,8%.

Untuk meredam lonjakan inflasi, bank sentral di banyak negara menaikkan suku bunga acuan. The Federal Reserve, bank sentral Amerika Serikat (AS) mendorong suku bunga hingga ke posisi 4,25-4,50% pada Desember 2022, dari di bawah 1,00% di Januari 2022.

Kebijakan yang agresif itu telah ikut menekan nilai tukar rupiah terhadap dolar AS. Pada akhir Desember 2022, kurs rupiah mencapai level Rp15.655 per Dolar AS, sementara di akhir Desember 2021 berada di level Rp14.265.

Sebagai respons atas kondisi tersebut serta upaya mengendalikan inflasi, Bank Indonesia mengeluarkan berbagai kebijakan. Dari kenaikan suku bunga acuan hingga Giro Wajib Minimum (GWM). Bahkan pada Desember 2022, Bank Indonesia masih menaikkan suku bunga acuan, yaitu BI 7-Day Reverse Repo Rate (BI7DRR) sebesar 25 bps, menjadi 5,50%. Kebijakan ini berpotensi mempengaruhi biaya dana dan strategi pengumpulan DPK.

Sementara kewajiban GWM rupiah untuk bank umum syariah dan unit usaha syariah naik menjadi 7,5% mulai 1 September 2022. Kebijakan peningkatan GWM ini berpotensi mempengaruhi tingkat likuiditas Bank serta optimalisasi profitabilitas. Selanjutnya, pada bulan yang sama, Lembaga Penjamin Simpanan (LPS) meningkatkan suku bunga penjaminan simpanan dalam rupiah di bank umum menjadi 3,75% yang juga berdampak pada beban biaya dana secara umum.

## PENCAPAIAN KINERJA USAHA 2022

### Target Pasar

Mencermati kondisi yang berkembang pada tahun 2022, secara umum Bank fokus pada implementasi model bisnis yang bersifat *customer centric* atau menyesuaikan dengan kebutuhan nasabah. Bank berkomitmen untuk meningkatkan profitabilitas melalui pembiayaan di sektor yang prospektif dengan *yield* yang tinggi namun rendah risiko.

strong and healthy financial foundation. This important change is also the Bank's first step in carrying out a turnaround plan aimed at increasing the Bank's profitability.

## ECONOMIC CONDITION

Throughout 2022, countries around the world were faced with economic uncertainty and difficulties in maintaining economic stability. Political and economic imbalances had a negative impact on the global supply chains, which in turn triggered an increase in energy and food prices. The International Monetary Fund (IMF) expects inflation to reach 8.8%.

To curb the surge in inflation, central banks in many countries raised their benchmark interest rates. The Federal Reserve, the United States (US) central bank, pushed interest rates up to 4.25-4.50% in December 2022, from below 1.00% in January 2022.

This aggressive policy has contributed to depressing the rupiah exchange rate against the US dollar. At the end of December 2022, the rupiah exchange rate was at the level of Rp15,655 per US Dollar, compared to Rp14,265 at the end of December 2021.

In response to these conditions and efforts to control inflation, Bank Indonesia (BI) issued various policies, ranging from the increase in the benchmark interest rate to the increase in Minimum Statutory Reserves (GWM). In December 2022, BI further raised its benchmark interest rate, the BI 7-Day Reverse Repo Rate (BI7DRR), by 25 bps to 5.50%. This policy has the potential to affect the cost of funds and DPK collection strategies.

Meanwhile, the rupiah GWM for sharia commercial banks and sharia business units increased to 7.5% starting on 1 September 2022. This policy of increasing the reserve requirement has the potential to affect the level of bank liquidity and optimum profitability. Furthermore, in the same month, the Deposit Insurance Corporation (LPS) increased the rupiah deposit guarantee interest rate at commercial banks to 3.75%, which also had an impact on cost of funds in general.

## BUSINESS PERFORMANCE IN 2022

### Target Market

In view of conditions that developed in 2022, the Bank mainly focuses on implementing a customer-centric business model or adapting to customer needs. The Bank is committed to increasing profitability through financing in prospective sectors with high yields but low risks.

Lebih lanjut, pada segmen *wholesale banking*, pembiayaan Bank mengarah ke segmen yang memiliki Aset Tertimbang Menurut Risiko (ATMR) yang rendah. Selain itu, pada korporasi yang memiliki peringkat kredit baik.

### Kendala dan Tantangan

Di tengah kondisi yang bergerak dinamis pada tahun 2022, pemerintah dan regulator di bidang perbankan merespons dengan kebijakan yang memberikan tantangan bagi kalangan perbankan, termasuk Bank Muamalat. Kebijakan Bank Indonesia (BI) yang menaikkan suku bunga acuan. Kebijakan ini berpotensi mempengaruhi biaya dana dan strategi pengumpulan DPK.

BI juga meningkatkan GWM yang berpotensi mempengaruhi tingkat likuiditas Bank serta optimalisasi profitabilitas. Sementara keputusan LPS meningkatkan suku bunga penjaminan simpanan dalam rupiah di bank umum menjadi 3,75% yang juga berdampak pada beban biaya dana secara umum.

Tantangan lain yang dihadapi Bank, adanya perubahan ketentuan Rasio Intermediasi Makroprudensial (RIM) yang dikeluarkan oleh BI, yaitu PADG No. 24/14/PADG/2022 tentang Perubahan Kelima atas PADG No. 21/22/PADG/2019 tentang Rasio Intermediasi Makroprudensial dan Penyangga Likuiditas Makroprudensial bagi Bank Umum Konvensional, Bank Umum Syariah, dan Unit Usaha Syariah.

Kendati demikian, Bank berhasil meraih sejumlah pencapaian. Di antaranya, pada Januari 2022, Bank telah menyelesaikan Penawaran Umum Terbatas (PUT) VI sebesar Rp1,19 triliun serta penerbitan Sukuk Subordinasi Mudharabah sebesar Rp2,0 triliun pada tanggal 15 Maret 2022.

Furthermore, in the wholesale banking segment, the Bank's financing is directed towards segments that have low level of Risk Weighted Asset (RWA) as well corporations with good credit ratings.

### Impediment and Challenges

In the midst of dynamic conditions in 2022, the government and banking sector regulators have responded with policies that posed a challenge for banks, including Bank Muamalat. These include Bank Indonesia (BI) policy of raising its benchmark interest rate, which has the potential to affect the cost of funds and DPK collection strategies.

BI also increases the Minimum Statutory Reserves which has the potential to affect the level of bank liquidity and optimum profitability. Meanwhile, LPS's decision to increase the deposit guarantee rate in rupiah at commercial banks to 3.75% also had an impact on the cost of funds in general.

Another challenge faced by the Bank is the change in the provisions for the Macroprudential Intermediation Ratio (RIM) issued by BI, namely through PADG No. 24/14/PADG/2022 concerning the Fifth Amendment to PADG No. 21/22/PADG/2019 concerning Macroprudential Intermediation Ratio and Macroprudential Liquidity Buffer for Conventional Commercial Banks, Islamic Commercial Banks, and Islamic Business Units.

Nevertheless, the Bank managed to post several achievements. Among them, in January 2022, the Bank has completed the Limited Public Offering (PUT) VI of Rp1.19 trillion, and issued Rp2.0 trillion worth of Subordinated Mudharabah Sukuk on 15 March 2022.

## Strategi dan Kebijakan Strategis

Di tengah tantangan inflasi dan dinamika perekonomian lainnya, Bank tetap fokus pada strategi pencapaian dana murah dengan cara meningkatkan tabungan dan giro, serta *fee based income*. Upaya tersebut dilakukan melalui pengembangan produk-produk *digital* hingga *wealth management*, serta transformasi organisasi.

Bank juga fokus pada penguatan portofolio melalui penyaluran pembiayaan pada sektor yang prospektif dan berisiko rendah. Pengetatan manajemen risiko untuk perbaikan kualitas portofolio juga terus dilakukan.

Pada saat bersamaan, Bank Muamalat merealisasikan strategi dan kebijakan seperti tertuang dalam Rencana Bisnis Bank (RBB) tahun 2022 yang telah disampaikan kepada pemegang saham di Rapat Umum Pemegang Saham Tahunan (RUPST). ### **Business Performance**

With the right strategies and policies, Bank Muamalat managed to get through 2022 by recording positive performance, despite the uncertain economic conditions. The Bank's total assets reached Rp61.4 trillion, an increase of 4.18% (yoy), but lower than the set target.

In terms of profit before tax, the Bank managed a growth of 315.67% (yoy), from Rp12.5 billion in 2021 to Rp52.0 billion in 2022. The increase in profit before tax was driven by an increase in other operating income which grew by 88.07% (yoy), reaching Rp1.1 trillion, from Rp584 billion the previous year. This is in line with the strategic focus for 2022 to "Drive Profitable Business".

Meanwhile, revenues from fund disbursement amounted to Rp1.8 trillion, down 17.55% (yoy). Profit sharing revenue reached Rp1.4 trillion, an increase of 4.37% (yoy), resulting in a Net Rewards (NI) of 0.66%. Details of other performance achievements are:

- Realization of financing disbursement of Rp18.8 trillion or an increase of 4.33% (yoy). This increase was driven by the direction and focus of the Bank's financing targeting business organizations and Islamic financial institutions, as well as the types and pipelines that have low risk that can be executed properly. However, the achievement was still below the set target.

- Bank senantiasa memperhatikan prinsip kehati-hatian dalam penyaluran pembiayaan, sehingga kualitas asetnya terjaga dengan baik. Hal itu tercermin dari rasio pembiayaan bermasalah (*Net Performing Finance/NPF*) *gross* dan *nett* yang rendah, yaitu masing-masing di level 2,78% dan 0,86%.
- Untuk penghimpunan DPK tercatat sebesar Rp46,1 triliun, DPK tersebut masih di bawah target yang telah ditetapkan. Begitu juga dibandingkan tahun sebelumnya, turun 1,55%. Hal itu dikarenakan oleh arah strategi Bank melakukan *funding reprofiling*, baik pada segmen *retail* maupun *wholesale*. Untuk segmen *retail*, penetrasi pada komunitas menjadi program peningkatan CASA dengan menawarkan program Tabungan Prima berhadiah serta giro berhadiah. Kemudian, akuisisi dana murah dari ekosistem haji dan umroh. Sementara di segmen *wholesale*, melalui program aktivasi MADINA sebagai *platform* transaksi nasabah serta digital. Strategi tersebut telah membantu meningkatkan tabungan dan deposito, masing-masing 0,55% dan 1,84% dibandingkan kinerja tahun 2021.
- Bank dapat menurunkan rasio Beban Operasional Terhadap Pendapatan Operasional (BOPO), dari 99,29% pada tahun 2021 menjadi 96,62% di 2022. Secara umum, rasio keuangan Bank terus membaik. *Return on equity* (ROE) menjadi 0,53% pada 2022, dari tahun sebelumnya yang 0,20%. *Return on Assets* (ROA) mencapai 0,09% dari tahun sebelumnya 0,02%. Rasio kecukupan permodalan (KPMM) tercatat 32,70%, dari 23,78% di tahun 2021.
- Komitmen Bank terhadap Usaha Mikro, Kecil dan Menengah (UMKM) terealisasi dengan baik. Sepanjang tahun 2022, Bank telah menyalurkan pembiayaan kepada UMKM sebesar Rp2,6 triliun, namun jika dibandingkan tahun sebelumnya, lebih rendah 19,53%. Nilai realisasi tersebut setara dengan 14,04% terhadap total pembiayaan Bank di tahun 2022. Dari sisi NPF, tercatat 0,14%, lebih baik dibandingkan NPF UMKM perbankan syariah nasional, yaitu 4,74% per November 2022.
- The Bank always pays attention to the principle of prudence in disbursing financing in order to maintain asset quality. This is reflected in the low gross and net non-performing financing (NPF) ratios of 2.78% and 0.86%, respectively.
- The collection of DPK was recorded at Rp46.1 trillion, lower than the set target. Compared to the previous year, it declined by 1.55%. This was due to the direction of the Bank's strategy for DPK reprofiling, both in the retail and wholesale segments. For the retail segment, community penetration into CASA enhancement program by offering the Prima Savings program with prizes and current accounts with prizes. Next is the acquisition of low-cost funds from the Hajj and Umrah ecosystem. Meanwhile, in the wholesale segment, through the program in the form of MADINA activation as a customer and digital transaction platform. This strategy has helped increase savings and deposits, respectively by 0.55% and 1.84%, compared to the performance in 2021.
- The Bank was able to reduce the ratio of Operating Expenses to Operating Income (BOPO), from 99.29% in 2021 to 96.62% in 2022. In general, the Bank's financial ratios continue to improve. Return on Equity (ROE) was 0.53% in 2022, from 0.20% the previous year. Return on Assets (ROA) reached 0.09% from 0.02% the previous year. The capital adequacy ratio (CAR) was recorded at 32.70%, from 23.78% in 2021.
- The Bank's commitment to Micro, Small and Medium Enterprises (MSMEs) sector is well realized. Throughout 2022, the Bank has distributed Rp2.6 trillion of financing to MSMEs, a decline of 19.53% from the previous year. Financing to MSMEs accounted for 14.04% of the total financing by the Bank in 2022. In terms of NPF, it was recorded at 0.14%, which was better than the average NPF of national Islamic banking MSMEs of 4.74% as of November 2022.

## PROSPEK USAHA

Sejumlah lembaga internasional memperkirakan kondisi perekonomian di tahun 2023 akan mengalami tekanan bahkan hingga resesi, sebagai imbas dari kenaikan suku bunga acuan yang agresif di tahun 2022. Bahkan Bank Indonesia menurunkan proyeksinya terhadap pertumbuhan ekonomi global, dari semula 2,65% menjadi 2,3%.

Jika kondisi itu terjadi, situasi di negara berkembang termasuk Indonesia akan terdampak. Apalagi, pada tahun 2024 Indonesia akan menyelenggarakan hajatan politik, yaitu Pemilu Legislatif dan Presiden yang berpotensi menciptakan ketidakstabilan politik.

## BUSINESS PROSPECTS

Several international institutions predict that economic conditions in 2023 will experience pressure and even a recession, as a result of the aggressive increase in the benchmark interest rate in 2022. Bank Indonesia even lowered its projection for global economic growth, from 2.65% to 2.3%.

This condition, should it materialize, will impact on the economy of developing countries including Indonesia. Moreover, in 2024 Indonesia will hold a political event, namely the Legislative and Presidential Elections which have the potential to create political instability.

Kendati demikian, tahun politik tersebut juga berpotensi memberikan dampak positif, yaitu peningkatan konsumsi secara agregat serta peningkatan ekspektasi pasar. Dengan demikian, pertumbuhan ekonomi Indonesia yang positif akan berlanjut pada tahun 2023, walaupun sedikit melambat ke kisaran 4,5-5,3%.

Tantangan lain yang dihadapi Bank adalah persaingan antara Bank Umum Konvensional (BUK) dan Bank Umum Syariah (BUS). Hingga tahun 2022, pangsa pasar perbankan syariah di Indonesia baru mencapai 7,03%, dengan porsi BUS hanya 66,14% terhadap total industri perbankan syariah. Sementara pangsa pasar perbankan konvensional di Indonesia sekitar 93% dari total pasar perbankan nasional. Untuk bisa menghadapi dominasi perbankan konvensional, perbankan syariah membutuhkan peningkatan efisiensi serta inovasi, sehingga memberikan keunggulan kompetitif. Pada saat bersamaan, literasi syariah masyarakat juga perlu terus ditingkatkan.

Dengan memperhatikan perkembangan berbagai dinamika ekonomi serta pencapaian tahun 2022, Bank akan terus mendorong melakukan pertumbuhan bisnis yang sehat secara lebih cepat pada tahun 2023. Dengan asumsi bahwa Bank mendapatkan persetujuan terhadap permohonan kelonggaran ketentuan Giro RIM Syariah, maka pertumbuhan bisnis akan dipercepat untuk mengejar ketertinggalan terhadap target *turn around plan* yang telah disampaikan kepada OJK.

Oleh karena itu, tema strategis RBB tahun 2023 adalah "Pertumbuhan Bisnis yang Sehat dan Profit yang Berkelanjutan". Tema ini merepresentasikan fokus pada percepatan pertumbuhan bisnis yang sehat, optimalisasi *recovery* serta peningkatan produktivitas di tengah dinamika geopolitik yang terjadi di Indonesia maupun di global. Tema Strategis tersebut dituangkan dalam bentuk 3 (tiga) aspek utama dengan penjelasan sebagai berikut:

#### 1. Business Refocusing

Pada aspek strategi ini, Bank akan melakukan *refocusing* pada nasabah Individu untuk meningkatkan *current account saving account* (CASA) melalui transaksi dan pembiayaan lebih dari 2 juta target *customer base*. Mengoptimalkan kebun-kebun *Enterprise* dan *Islamic Ecosystem* sebagai *entry gate* untuk nasabah individu, terdapat 39 Institusi dengan 20 institusi ber-*payroll* dan lebih dari 300 AUM Muhammadiyah untuk potensi nasabah retail. Memperluas kebun melalui penghimpunan dana dan pembiayaan kepada ASN dan BUMN, komunitas Sekolah negeri dan/atau swasta, pesantren, serta universitas dengan penekanan kuat pada prinsip-prinsip Islam, membangun ekosistem rumah sakit berbasis syariah dan teknologi yang terintegrasi produk halal, serta melakukan penetrasi kepada ekosistem perjalanan haji dan umrah melalui agen *tour & travel* yang berlisensi.

However, this political year also has the potential to have a positive impact, namely an increase in aggregate consumption and an increase in market expectations. As such, Indonesia's positive economic growth will continue in 2023, although it will slow down slightly to the range of 4.5-5.3%.

The Bank also faces another challenge in the form of competition between Conventional Commercial Banks (BUK) and Islamic Commercial Banks (BUS). Until 2022, the market share of the Islamic banking market in Indonesia has only reached 7.03%, with the share of BUS only 66.14% of the total Islamic banking industry. Meanwhile, the conventional banking market share in Indonesia is around 93% of the total national banking market. In the face of the dominance of conventional banking, the Islamic banking industry requires increased efficiency and innovation in order to become competitive. At the same time, public sharia literacy also needs to be improved.

Taking into account developments in various economic dynamics and achievements in 2022, the Bank will continue to push for higher healthy business growth in 2023. Assuming that the Bank obtains approval for the application for relaxation of the Sharia RIM Current Account provisions, business growth will be accelerated to catch up with target turn around plan that has been submitted to OJK.

Therefore, the strategic theme for the 2023 RBB is "Healthy Business Growth and Sustainable Profit". This theme represents a focus on accelerating healthy business growth, optimizing recovery, and increasing productivity amid the geopolitical dynamics in Indonesia and globally. The strategic theme is further outlined into 3 (three) major aspects as described below:

#### 1. Business Refocusing

In this aspect of the strategy, the Bank will refocus on individual customers to increase low cost funding (CASA) through transactions and financing of more than 2 million target customer base. In optimizing existing Enterprise and Islamic Ecosystem farms (?) as entry gates for individual customers, there are 39 institutions, of which 20 institutions have a payroll product, and more than 300 AUM Muhammadiyah for potential retail customers. Expanding farms through raising funds and financing to government employees and SOEs, public and/or private school communities, Islamic boarding schools, and universities with a strong emphasis on Islamic principles, building sharia-based hospital ecosystems and technology integrated with halal products, and penetrating into Hajj and Umrah travel ecosystem through licensed tour & travel agents.

Selain itu Bank Muamalat akan berupaya meningkatkan layanan dan jasa melalui penambahan *feature* & solusi untuk nasabah individual seperti produk cicil emas & solusi haji dan peningkatan layanan berbasis *digital banking*, dalam rangka meningkat pembiayaan dan *Fee-Based Income*.

Bank akan mengakselerasi penyelesaian pembiayaan berkualitas rendah melalui Novasi, *Cessie*/Pengalihan Hak Tagih, Likuidasi, Subrogasi, Penggunaan Jasa *Outsourcing*, Skema *Asset Settlement* dan Penyelesaian melalui Pihak Ketiga dan mengoptimalkan pendapatan melalui *recovery* untuk menopang pencapaian target keuangan Bank tahun 2023.

## 2. *Fixing The Fundamental*

Bank akan meningkatkan kapasitas dan kapabilitas Sumber Daya Manusia dan Teknologi Informasi sesuai dengan perkembangan tren perbankan saat ini, melalui perbaikan *mindset*, *capability*, dan *skill* sumber daya manusia, melakukan penyesuaian organisasi sesuai kebutuhan bisnis, meningkatkan keandalan teknologi informasi & layanan digital, memperbaiki Layanan dan Bisnis Proses pembiayaan yang lebih ramping, dan meningkatkan efisiensi dengan optimalisasi Gedung Muamalat Tower.

## 3. *Strengthening the Enablers*

Selain 2 aspek utama diatas, bank akan memperkuat *enabler* kinerja Bank melalui perbaikan Sinergi *Enterprise* dan *Ritel* untuk memperoleh kebun yang menghasilkan dan berkualitas, mengimplementasikan konsep pengukuran berbasis profit untuk jaringan dan kantor pusat, meningkatkan produktivitas & profitabilitas *channel* distribusi, melakukan kajian dan *opportunity* untuk *strategy non organic*, dan *unlocking ecosystem* haji Bersama BPKH.

## Hal Penting yang Berpotensi Terjadi di Masa Datang

Bank Muamalat berpandangan, ke depan masih ada tantangan yang harus diantisipasi. Selain tahun politik, skala usaha dan kemampuan bersaing dalam industri perbankan yang mengarah kepada digitalisasi juga menjadi tantangan.

Untuk merespons tantangan di depan, Bank akan meningkatkan inovasi, khususnya pengembangan layanan digital yang akan dilaksanakan pada tahun 2023. Sejalan dengan Visi Bank untuk menjadi bank syariah terbaik yang menyelenggarakan layanan transaksi sistem pembayaran secara *digital*, Bank berupaya membangun sinergi dan *Smart Banking Ecosystem* melalui akselerasi transformasi digital pada layanan sistem pembayaran.

In addition, Bank Muamalat will seek to improve products and services by adding features and solutions for individual customers such as gold installment products and Hajj solutions and improving digital banking-based services, in order to increase financing and Fee-Based Income.

The Bank will accelerate the settlement of low quality financing through Novation, *Cessie*/Transfer of Collection Rights, Liquidation, Subrogation, Use of Outsourcing Services, Asset Settlement Schemes, and Settlement through Third Parties, while optimizing revenue through asset recovery to support the achievement of the Bank's financial targets in 2023.

## 2. *Fixing the Fundamentals*

The Bank will increase the capacity and capability of its Human Resources and Information Technology in accordance with the development in current banking trends, through improving the mindset, capability and skills of human resources, making organizational adjustments according to business needs, increasing the reliability of information technology & digital services, streamlining the financing business process and services, and increasing efficiency by optimization of Muamalat Tower Building.

## 3. *Strengthening the Enablers*

In addition to the two major aspects discussed above, the Bank will also strengthen its business enablers by improving Enterprise and Retail Synergies to obtain productive and quality farms, implementing profit-based measurement concepts for branch networks and the head office, increasing productivity and profitability of distribution channels, conducting studies for non-organic strategy opportunities, and unlocking the hajj ecosystem with BPKH.

## Potential Significant Developments Anticipated in the Future

Bank Muamalat is of the view that in the future there will still be challenges that must be anticipated. Apart from the political year, the scale of business and the ability to compete in the banking industry that leads to digitalization is also a challenge.

To respond to the challenges ahead, the Bank will increase innovation, especially the development of digital services which will be implemented in 2023. In line with the Bank's vision to become the best Islamic bank that provides digital payment system transaction services, the Bank seeks to build synergy and Smart Banking Ecosystem through accelerating digital transformation in payment system services.

Langkah strategis yang akan dilakukan, antara lain: memperkuat penerapan teknologi digital dalam menyelenggarakan layanan sistem pembayaran; membuat layanan sistem pembayaran menjadi terintegrasi, simpel dan mudah; penambahan fitur dan layanan sistem pembayaran dalam berbagai kanal transaksi; dan menjalin kerja sama strategis dengan pihak ketiga untuk menambah dan meningkatkan layanan sistem pembayaran.

## **PENERAPAN TATA KELOLA PERUSAHAAN**

Bank Muamalat menyadari bahwa penerapan prinsip tata kelola perusahaan yang baik atau *Good Corporate Governance* (GCG) menjadi salah satu faktor fundamental yang sangat penting dalam pengelolaan perusahaan. Penerapan GCG akan memberikan dukungan kepada Bank untuk tumbuh secara berkesinambungan.

Bahkan saat ini, masyarakat melihat penerapan GCG sebagai salah satu indikator penting dalam menilai sebuah entitas, terutama terkait prospek kinerja berkelanjutan di masa mendatang. Hal itu didasari atas keyakinan bahwa GCG adalah prinsip yang mendasari proses dan mekanisme pengelolaan perusahaan berlandaskan kepatuhan terhadap peraturan perundang-undangan serta cerminan dunia usaha yang beretika.

Untuk itu, Bank melakukan penilaian penerapan GCG secara berkala untuk meningkatkan kualitas penerapan GCG yang antara lain tercantum dalam Peraturan Bank Indonesia No. 11/33/PBI/2009 tanggal 7 Desember 2009 tentang Pelaksanaan *Good Corporate Governance* bagi Bank Umum Syariah dan Unit Usaha Syariah serta Surat Edaran Otoritas Jasa Keuangan No. 10/SEOJK.03/2014 tentang Penilaian Tingkat Kesehatan Bank Umum Syariah dan Unit Usaha Syariah.

Pada tahun 2022, Bank Muamalat Indonesia melakukan penilaian sendiri (*self-assessment*) pelaksanaan GCG secara individual dan konsolidasi dengan hasil penilaian pada peringkat 2 (dua) yang mencerminkan manajemen Bank telah melakukan penerapan *Good Corporate Governance* yang secara umum baik. Hal ini tercermin dari penerapan atas prinsip-prinsip *Good Corporate Governance* maka secara umum kelemahan tersebut kurang signifikan dan dapat diselesaikan dengan tindakan normal oleh manajemen Bank.

The strategic steps that will be taken include: strengthening the application of digital technology in providing payment system services; providing integrated, simple and easy payment system services; adding payment system features and services in various transaction channels; and establishing strategic partnerships with third parties to add and improve payment system services.

## **IMPLEMENTATION OF CORPORATE GOVERNANCE**

Bank Muamalat realizes that the application of the principles of good corporate governance (GCG) is one of the most important fundamental factors in managing the company. The implementation of GCG will provide support for the Bank to grow sustainably.

Increasingly today, the public see the implementation of GCG as an important indicator in assessing a business entity, especially regarding the prospects for sustainable performance in the future. This is based on the belief that GCG is the principle that underlies the process and mechanism of company management based on compliance with laws and regulations and a reflection of an ethical business environment.

For this reason, the Bank periodically assesses its GCG practices to improve the quality of GCG implementation. This complies with, among others, Bank Indonesia Regulation No. 11/33/PBI/2009 dated 7 December 2009 concerning the Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units, and the Financial Services Authority Circular Letter No. 10/SEOJK.03/2014 concerning Soundness Rating of Sharia Commercial Banks and Sharia Business Units.

In 2022, Bank Muamalat Indonesia conducted a self-assessment of the implementation of GCG individually and consolidated with the results of the assessment at a rating of 2 (two) which reflects that the Bank's management has implemented Good Corporate Governance which is generally good. This is reflected in the implementation of the principles of Good Corporate Governance, in general, these weaknesses are not significant and can be resolved by normal actions by the Bank's management.

## PENGEMBANGAN TEKNOLOGI INFORMASI

Perkembangan digital di sektor perbankan dipercaya dapat meningkatkan efisiensi kegiatan operasional dan kualitas pelayanan Bank kepada nasabah dalam bertransaksi. Sebagai wujud dari komitmen tersebut, Bank merealisasikan program pelatihan, baik dari *soft skill* maupun *hard skill*. Pada tahun 2022, program pelatihan dan pendidikan dilakukan secara *hybrid*, mengingat masih terjadi pandemi COVID-19.

ALIF merupakan perusahaan keuangan syariah yang didirikan untuk memenuhi kebutuhan pembiayaan keuangan masyarakat Indonesia. Pada mulanya, ALIF ditujukan untuk melayani kebutuhan pembiayaan bagi komunitas bisnis Indonesia dan Asia Tenggara dengan menawarkan pembiayaan minimal sebesar Rp2 miliar per transaksi dan jasa konsultasi keuangan.

Namun sayangnya, krisis ekonomi global yang dimulai tahun 2010 lalu telah mendorong ALIF untuk mengubah fokus bisnis pada pembiayaan ritel. Kini, beragam jenis produk pembiayaan ditawarkan oleh ALIF, mulai dari pembiayaan komersial untuk investasi barang modal untuk keperluan usaha seperti mesin dan alat berat maupun pembiayaan konsumtif (ritel) seperti mobil dan sepeda motor. Semua produk pembiayaan tersebut mengacu pada prinsip keuangan syariah dengan menggunakan skema pembiayaan ijarah *muntahia bittamlik* (sewa dan beli), dan murabahah (jual dan beli). ALIF didirikan pada bulan November 2006 di Jakarta, ALIF memulai operasionalnya pada tanggal 27 Agustus 2007. Adapun modal awal yang disetorkan ialah sebesar Rp105 miliar, yang ditempatkan sama rata oleh tiga lembaga keuangan terkemuka Indonesia dan Timur Tengah, yaitu Bank Muamat Indonesia, Bank Boubyan Kuwait, International Leasing & Investment Company (ILIC). Unfortunately, the global economic crisis that hit in 2010 prompted ALIF to shift its business focus to retail financing. In addition to increasing funding sources, the new business focus is also aimed to take advantage of the huge growth in the consumption sector in Indonesia today and in the future.

Nowadays, ALIF offers various types of financing products, ranging from commercial financing to investing in capital goods for business purposes such as machinery and heavy equipment as well as consumer financings (retail) such as cars and motorbikes. All of these financing products refer to the principles of sharia finance using the ijarah *muntahia bittamlik* (lease and purchase) and murabahah (buy and sell) financing schemes. ALIF was established in November 2006 in Jakarta, ALIF started operations on August 27, 2007. The initial paid-up capital was Rp105 billion, which was placed equally by three leading Indonesian and Middle Eastern financial institutions, namely Bank Muamat Indonesia, Bank Boubyan Kuwait, International Leasing & Investment Company (ILIC). # Tinjauan Ekonomi

## Economic Overview

Kondisi perekonomian pada tahun 2022, baik secara global maupun nasional penuh dengan tantangan. Negara-negara di dunia dihadapkan pada ketidakpastian ekonomi dan geopolitik serta kesulitan untuk menjaga stabilitas ekonominya. Sementara ini, inflasi diberbagai negara juga masih berada pada level yang relatif tinggi. Perkiraan inflasi negara-negara maju mencapai 6,6% sementara inflasi negara-negara berkembang akan mencapai 9,5%. Sementara inflasi di Indonesia sendiri masih berhasil ditekan di level 5,51%.

Untuk merespons kondisi tersebut, pemerintah telah mengeluarkan sejumlah kebijakan. Di antaranya, kebijakan Bank Indonesia mengenai suku bunga acuan dan Giro Wajib Minimum (GWM) yang dapat mempengaruhi kondisi likuiditas

There are several difficulties in the economy in 2022, both globally and domestically. It is challenging for countries to preserve their economic stability as a result of economic and geopolitical conflicts. In the meantime, several countries still have relatively high inflation levels. Inflation in developed countries is predicted to be 6.6%, while it will be 9.5% in developing countries. While the rate of inflation in Indonesia itself was successfully kept at 5.51%.

The government has released a number of policies to address these issues. Among other things, Bank Indonesia's policy regarding reference interest rates and Minimum Statutory Reserves (GWM) may affect the liquidity conditions of Bank

 **5,31%**

**Ekonomi Indonesia tumbuh 5,31% (yoy) pada tahun 2022**  
Indonesia's economy to grow 5.31% (yoy) in 2022

 **20,1%**

**Dana Pihak Ketiga perbankan syariah tumbuh 20,1% (yoy)**  
Third-party funds from Islamic banks grew by 20.1% (yoy)

**Sejalan dengan kondisi perekonomian nasional yang kuat, kinerja perbankan di Indonesia turut mengalami pertumbuhan positif walaupun menghadapi sejumlah tantangan seperti tekanan pasar, perubahan regulasi, hingga ekspektasi perekonomian yang kurang stabil.**

In line with the strong national economic conditions, banking performance in Indonesia also experienced positive growth despite facing a number of challenges, such as market pressures, regulatory changes, and expectations of a less stable economy.

Bank Muamalat. Bahkan sepanjang tahun 2022, Bank Indonesia terus menaikkan BI *7-Day Reverse Repo Rate* (BI7DRR) hingga pada bulan Desember 2022, BI7DRR telah mencapai 5,50 persen. Kenaikan suku bunga ini akan sangat mempengaruhi biaya dana dan strategi penghimpunan DPK.

Selain itu, kewajiban GWM Rupiah untuk Bank Umum Syariah (BUS) dan Unit Usaha Syariah (UUS) naik menjadi 6,0% mulai 1 Juli 2022 dan menjadi 7,5% mulai 1 September 2022. Selanjutnya, efektif per 1 Oktober 2022 Lembaga Penjamin Simpanan (LPS) turut menaikkan suku bunga penjaminan simpanan dalam rupiah di bank umum menjadi 3,75%.

Kenaikan BI7DRR dan suku bunga penjaminan simpanan dalam rupiah di bank umum tersebut berdampak pada strategi penghimpunan DPK Bank secara umum. Tentu kondisi ini memberikan tantangan yang tak mudah bagi Bank Muamalat.

Muamalat. Bank Indonesia continued raising the BI 7-Day Reverse Repo Rate (BI7DRR) throughout 2022 until it reached 5.50% in December 2022. This increase in interest rates will have a significant impact on both the cost of funds and the strategy for collecting DPK.

In addition, starting on July 1, 2022, and continuing until September 1, 2022, the required GWM in Rupiah for Sharia Commercial Banks (BUS) and Sharia Business Units (UUS) increased to 6.0% and 7.5%, respectively. Moreover, the Deposit Insurance Corporation (LPS) increased the deposit guarantee rate in Rupiah at commercial banks to 3.75% as of October 1, 2022.

The cost of financing for banks generally was impacted by the increase in the BI7DRR and deposit collection strategy at commercial banks. Of course, this condition was a considerable challenge for Bank Muamalat.

# Tinjauan Industri Perbankan

## Banking Industry Review

Sejalan dengan kondisi perekonomian nasional yang kuat, kinerja perbankan di Indonesia turut mengalami pertumbuhan positif walaupun menghadapi sejumlah tantangan seperti tekanan pasar, perubahan regulasi, hingga ekspektasi perekonomian yang kurang stabil. Pada tahun 2022 rasio intermediasi perbankan Indonesia tercatat mengalami peningkatan.

Dalam kondisi penuh dengan tekanan, perekonomian Indonesia terbukti tetap tangguh. Badan Pusat Statistik (BPS) mencatat, ekonomi nasional pada tahun 2022 tumbuh 5,3%, lebih tinggi dari pencapaian tahun 2021 yang 3,70%.

Selain itu, pertumbuhan penyaluran kredit baru dan pertumbuhan Dana Pihak Ketiga (DPK) juga turut mengalami kenaikan masing-masing tumbuh 11,35% (yoy) dan 9,01% (yoy). Sementara untuk perbankan syariah, pembiayaan tercatat tumbuh sebesar 20,1% (yoy).

Selain itu, dukungan dari pemerintah untuk mendukung pertumbuhan ekonomi maupun penyediaan sumber dana pembiayaan jangka panjang turut membawa angin segar bagi kondisi perbankan secara keseluruhan. Kondisi industri perbankan tersebut membawa optimisme bagi Bank Muamalat Indonesia untuk terus meningkatkan kinerjanya.

In line with the strong national economic conditions, banking performance in Indonesia also experienced positive growth despite facing a number of challenges, such as market pressures, regulatory changes, and expectations of a less stable economy. In 2022, Indonesia's banking intermediation ratio was recorded as having increased.

The Indonesian economy has shown itself to remain resilient even under conditions full of pressure. According to the Central Statistical Agency (BPS), national economic growth in 2022 was 5.3%, up from 3.70% in 2021.

Furthermore, the growth of new loan disbursement and Third-Party Funds (DPK) increased by 11.35% (yoy) and 9.01% (yoy), respectively. Meanwhile, financing in Sharia Banking increased by 20.1% (yoy).

Furthermore, government support for economic growth, as well as the provision of long-term funding sources, has breathed new life into the overall banking situation. The condition of the banking industry has brought optimism for Bank Muamalat Indonesia to continue to improve its performance.

### Islamic Business dan Small Medium Enterprise

Islamic Business dan Small Medium Enterprise (IBS) merupakan salah satu strategi dari manajemen Bank Muamalat yang merupakan unit kerja yang fokus pada kegiatan komersial dan non komersial (sosial) sebagai berikut:

1. Fokus pada area yang menjadi kekuatan BMI sebagai Bank pertama syariah.
2. Segmentasi pada *target market* spesifik pada bank Syariah.
3. Aktivitas layanan keumatan di bidang zakat, infaq, sedekah (ZISWAF).

Adapun untuk memberikan pelayanan yang lebih maksimal untuk Haji dan Umrah, yang sebelumnya berada di bawah pengelolaan IBS, saat ini telah dipisah unit kerja sendiri yaitu Hajj & Umrah Services (HUS).

Potensi pasar yang sudah diidentifikasi oleh Bank dapat dikategorikan dalam dua kelompok yaitu: amal usaha yang menjadi bagian dari ormas dan yayasan-yayasan Islam mandiri baik yang menjadi bagian dari sebuah jaringan maupun yayasan-yayasan independen yang besar.

Berdasarkan strategi tersebut maka diharapkan IBS akan memberikan kontribusi terhadap pencapaian target yang telah ditentukan oleh manajemen melalui layanan nasabah yang fokus kepada *financing, funding*, maupun fasilitas transaksional pada sektor layanan berikut:

- Sektor Pendidikan
- Sektor Kesehatan
- Sektor Lembaga Keuangan Syariah
- Sektor Industri Halal
- Layanan Masjid dan ZISWAF

### Wealth Management dan e-Business Management

Bank telah menganalisa dan menyesuaikan strategi terhadap perubahan perilaku konsumen akibat *disruption* dari adaptasi teknologi baru pada transaksi keuangan dan juga dampak pandemi COVID-19. Untuk menyesuaikan strategi bisnisnya dengan perubahan ini, Bank berupaya untuk memperbarui infrastruktur teknologi informasinya. Salah satu yang paling penting adalah menyesuaikan *Mobile Banking* Muamalat DIN maupun *Internet Banking* dengan teknologi yang sesuai dengan kebutuhan nasabah. Saat ini, nasabah lebih mengutamakan kecepatan dalam transaksi dan mulai mengurangi transaksi fisik dengan cabang. Oleh karenanya, optimalisasi pada Muamalat *Mobile Banking* maupun *Internet Banking* untuk selalu terhubung ke ekosistem ekonomi digital merupakan langkah yang perlu diambil oleh Bank, melalui pengembangan fitur baru dan mitra strategis baru.

### Islamic Business and Small Medium Enterprise

Islamic Business and Small Medium Enterprise (IBS) is one of the management strategies of Bank Muamalat, which is a work unit that focuses on commercial and non-commercial (social) activities such as the following:

1. Focus on areas that are the strengths of BMI as the first Sharia bank.
2. Segmentation on specific target markets for Sharia banks.
3. Public service activities in the field of zakat, infaq, and sadaqah (ZISWAF).

In order to provide more optimal services for Hajj and Umrah, which were previously managed by IBS, they have now divided their own work units into Hajj & Umrah Services divisions (HUS).

The Bank has identified two types of market potential: business charities that are part of larger organizations and independent Islamic foundations that are either part of a network or large independent foundations.

Based on this strategy, it is hoped that IBS will contribute to meeting management's targets by providing customer service that focuses on financing, funding, and transactional facilities in the following service sectors:

- Education Sector
- Health Sector
- Sharia Financial Institution Sector
- Halal Industry Sector
- Mosque and ZISWAF Services

### Wealth Management and e-Business Management

The Bank has analyzed and adjusted strategies to account for changes in consumer behavior caused by disruptions in the adoption of new technology in financial transactions as well as the impact of the COVID-19 pandemic. The Bank intends to update its information technology infrastructure in order to adapt its business strategy to these changes. One of the most important is integrating Muamalat DIN Mobile Banking and Internet Banking with customer-specific technology. Customers are currently prioritizing transaction speed and are beginning to reduce physical transactions with branches. As a result, optimizing Muamalat Mobile Banking and Internet Banking so that they are always connected to the digital economic ecosystem is a step that the Bank must take through the development of new features and new strategic partners.

Bank Muamalat Indonesia juga senantiasa melakukan berbagai upaya guna mendukung Bank Indonesia dan OJK dalam meningkatkan transaksi non-tunai demi mewujudkan *cashless society*. Pengembangan *e-channel* terus dilakukan seperti penambahan fitur pembayaran tagihan dan pembelian seperti *top-up* Ovo dan GoPay, penambahan ini telah dilakukan di *Mobile Banking* dan ATM Bank Muamalat Indonesia sehingga memberi dampak positif pada meningkatkan jumlah transaksi keuangan nasabah sehari-hari. Pengembangan fitur ini mampu memenuhi kebutuhan nasabah yang pada akhirnya meningkatkan kesetiaan nasabah yang tercermin pada peningkatan saldo rata-rata rekening nasabah di Bank Muamalat Indonesia.

Bank Muamalat juga menghubungkan nasabah-nasabah BPRS ke ekosistem ekonomi digital melalui layanan *e-channel* yang terkoneksi antara sistem BPRS dan Bank. Diharapkan transaksi keuangan dan saldo rata-rata dari BPRS dapat meningkat dengan adanya koneksi ini.

Di samping itu, layanan *Automatic Teller Machine* (ATM) juga terus dioptimalkan kinerjanya, salah satunya adalah dengan melakukan strategi relokasi. Strategi tersebut sukses menaikkan *fee-based income* bagi Bank Muamalat Indonesia, terkhusus segmen ATM *Off Premises*. Pemilihan lokasi di luar kantor untuk penempatan ATM tetap menjadi perhatian agar tetap memfasilitasi kebutuhan transaksi nasabah secara praktis dan menyeluruh.

Adapun di dalam *Wealth Management*, dari segi produk Bank mencoba memberikan produk-produk yang bersaing dengan kompetitor sehingga dapat memberikan nilai tambah kepada nasabah sehingga nasabah merasa nyaman bertransaksi dengan Bank Muamalat. Adapun saat ini produk *Wealth Management* yang dapat ditawarkan kepada nasabah adalah produk-produk unggulan, seperti *Bancassurance* yang sudah bekerja sama dengan beberapa penyedia produk yang sudah dikenal baik oleh masyarakat dengan tujuannya adalah memberikan kenyamanan dan sebagai alternatif produk investasi bagi nasabah.

Selain itu, Bank juga memiliki produk-produk investasi dan simpanan seperti Sukuk Ritel, Sukuk Tabungan dan Sukuk Wakaf. Sebagai mitra distribusi yang telah ditunjuk oleh Kementerian Keuangan Republik Indonesia, Bank Muamalat selalu berpartisipasi dalam membantu pemerintah dalam pembangunan Negara Indonesia, kami juga berpartisipasi pada penjualan pertama kali Sukuk Wakaf bersama dengan beberapa Bank Syariah lainnya dalam membantu pemerintah dalam penanganan akibat COVID-19.

Ke depannya, Bank berupaya menyediakan produk investasi Reksadana Syariah yang bekerja sama dengan perusahaan fintech yang sudah memiliki lisensi APERD. Selain Reksa dana, BMI juga akan mengembangkan Layanan Emas Digital

Bank Muamalat Indonesia also continued to make various efforts to support Bank Indonesia and OJK in increasing non-cash transactions in order to create a cashless society. E-channel development is continuing, with the addition of bill payment and purchase features such as Ovo and GoPay top-ups. This enhancement was made to Bank Muamalat Indonesia Mobile Banking and ATMs in order to increase the number of customers' daily financial transactions. The development of this feature can meet customer needs, which increases customer loyalty, which is reflected in an increase in the average balance of customer accounts at Bank Muamalat Indonesia.

Bank Muamalat also links BPRS customers to the digital economic ecosystem via linked e-channel services between the BPRS system and the Bank. This connection is expected to increase financial transactions and the average balance of the BPRS.

Furthermore, the performance of the Automatic Teller Machine (ATM) service is being optimized, one of which is through the implementation of a relocation strategy. This strategy was successful in increasing Bank Muamalat Indonesia's fee-based income, particularly in the Off-Premises ATM segment. The placement of ATMs outside the office remains a concern in order to continue to meet practical and comprehensive customer transaction needs.

In terms of Wealth Management products, the Bank strives to provide products that compete with competitors in order to provide added value to customers and make them feel comfortable transacting with Bank Muamalat. Currently, the Wealth Management products that can be offered to customers are superior products, such as Bancassurance, which has collaborated with several well-known product providers to provide convenience and an alternative investment product for customers.

Moreover, the Bank offers investment and deposit products such as Retail Sukuk, Savings Sukuk, and Waqf Sukuk. Bank Muamalat has always participated in assisting the government in developing the State of Indonesia as a distribution partner designated by the Ministry of Finance of the Republic of Indonesia. We also took part in the first sale of Wakaf Sukuk alongside several other Sharia Banks to help the government in handling the COVID-19 pandemic.

Going forward, the Bank seeks to provide Sharia Mutual Fund investment products in collaboration with fintech companies that already have APERD licenses. Apart from mutual funds, BMI will also develop Digital Gold Services as an investment

sebagai salah satu alternatif investasi bagi nasabah sehingga dapat mendiversifikasikan kekayaannya pada aset pilihan.

### Strategi Tahun 2022

Pada tahun 2022, Bank Muamalat mengimplementasikan sejumlah strategi untuk mendorong kinerja segmen *treasury*. Di antaranya adalah:

1. Melayani jual beli sukuk *retail* dan sukuk pemerintah mata uang IDR dan USD untuk nasabah individu dan korporasi sebagai pilihan investasi.
2. Melayani transaksi *forex* baik tod, tom, *spot*, *hedging* dalam berbagai mata uang dan transaksi *Bank-Note* untuk mata uang USD, SGD, SAR, EUR, JPY.
3. Meningkatkan kerja sama *cross selling* dengan produk bank BMI lainnya, baik *wholesale* maupun ritel.
4. Melakukan pembelian sukuk untuk portofolio *trading* maupun *banking* yang memberikan imbal hasil yang optimal.

### Strategy for 2022

Bank Muamalat would implement a number of strategies to improve the performance of the Treasury segment in 2022. Others include:

1. Serving the retail and government sukuk trade in IDR and USD currency for individual and corporate customers as investment option
2. Serving forex transactions both tod, tom, spot, hedging in various currencies, and Bank-Note transactions for USD, SGD, SAR, EUR, and JPY.
3. Increase cross selling cooperation with other BMI bank products, both wholesale and retail.
4. Purchasing sukuk for trading and banking portfolios that provide optimal returns.

5. Mengoptimalkan cabang Kuala Lumpur dalam memberikan layanan transaksi *foreign exchange* untuk nasabah di Kuala Lumpur sendiri maupun nasabah yang terafiliasi ke Indonesia.

### Kinerja

Kinerja volume transaksi *forex* nasabah pada tahun 2022 sebesar USD1.007 juta, naik 135,56% dari posisi tahun 2021 yang sebesar USD743 juta. Pertumbuhan tersebut didorong oleh kembalinya aktivitas perekonomian selepas pandemi COVID-19 yang membuat kebutuhan mata uang asing, baik perorangan maupun korporasi juga kembali meningkat.

Kebutuhan tersebut tentunya didorong oleh aktivitas perdagangan untuk kebutuhan ekspor-impor maupun di bidang jasa. Hal yang sama terjadi pada volume transaksi sukuk nasabah yang pada tahun 2022 tercatat sebesar Rp300,9 miliar, meningkat 251,04% atau Rp181,1 miliar dari Rp119,9 miliar pada tahun 2021. Kenaikan volume sukuk nasabah ini disebabkan oleh sudah pulihnya minat investasi nasabah pada sukuk baik pasar IPO maupun di pasar sekunder.

5. Optimizing the Kuala Lumpur branch in providing foreign exchange transaction services for customers in Kuala Lumpur itself and customers affiliated to Indonesia.

### Performance

Customer forex transaction volume in 2022 was USD1,007 million, an increase of 135.56% from the position in 2021, which was USD743 million. This expansion was supported by the resumption of economic activity following the COVID-19 pandemic, which increased the demand for foreign currency among both individuals and corporations.

This requirement is certainly driven by trade activities for export-import needs as well as the service sector. The same thing happened to the volume of customer sukuk transactions, which reached Rp300.9 billion in 2022, an increase of 251.04%, or Rp181.1 billion from Rp119.9 billion in 2021. The increase in customer sukuk volume was due to a recovery of customer interest in customer investment in sukuk both in the IPO and the secondary markets.

The Sukuk FBI increased in line with the increase in the number and volume of customer transactions. Bank Sukuk FBI increased by 474.07% in 2022, to Rp25.6 billion, from Rp5.4 billion in the previous year. This is related to the activity of selling sukuk to manage liquidity.

## INFORMASI DAN FAKTA MATERIAL YANG TERJADI SETELAH YANGGAL LAPORAN AKUNTANSI

Tidak ada kejadian penting yang material dan relevan setelah tanggal 31 Desember 2022 sampai dengan tanggal Laporan Auditor Independen yang perlu diungkapkan dalam laporan tahunan ini.

## PROSPEK USAHA

Pertumbuhan ekonomi global pada tahun 2023 diperkirakan melambat. Bahkan Bank Indonesia menurunkan proyeksi pertumbuhan ekonomi dunia tahun 2023 menjadi 2,3% dari prakiraan sebelumnya sebesar 2,6%.

Tekanan yang terjadi pada perekonomian global akan berdampak bagi pertumbuhan ekonomi negara berkembang yang dalam pemulihan akibat dampak dari pandemi COVID-19 yang terjadi pada tahun 2020. Selain perang Rusia dan Ukraina yang belum berakhir, Indonesia juga akan memasuki tahun politik, yaitu menjelang Pemilihan Presiden dan Pemilihan Legislatif yang prosesnya sudah dimulai sejak 2023.

## MATERIAL INFORMATION AND FACTS SUBSEQUENT TO THE DATE OF ACCOUNTANT REPORT

No material and relevant significant events occurred after December 31, 2022, to the date of the Independent Auditor's Report that required disclosure in this annual report.

## BUSINESS PROSPECTS

Global economic growth is expected to slow in 2023. Bank Indonesia even reduced its forecast for global economic growth in 2023 to 2.3% from 2.6% previously.

The global economic pressure will have an impact on developing countries economic growth as they recover from the effects of the COVID-19 pandemic that occurred in 2020. Aside from the ongoing wars between Russia and Ukraine, Indonesia will enter a political year with the Presidential Election and Legislative Elections, for which the process has been underway since the beginning of 2023.

Tantangan lain yang dihadapi Bank adalah persaingan dengan Bank Umum Konvensional (BUK) maupun di antara Bank Umum Syariah (BUS). Hingga tahun 2022, pangsa pasar perbankan syariah di Indonesia baru mencapai 7,03 persen dengan total pangsa pasar Bank Umum Syariah sebesar 66,14% dari total industri perbankan syariah.

Dengan memperhatikan perkembangan berbagai dinamika ekonomi serta implementasi strategi tahun 2022, Bank akan terus mendorong pertumbuhan bisnis yang sehat secara lebih cepat pada tahun 2023. Dengan asumsi bahwa Bank mendapatkan persetujuan permohonan kelonggaran ketentuan Giro RIM Syariah, maka pertumbuhan bisnis akan dipercepat untuk mengejar keteringgalan terhadap target *turn around plan* yang telah disampaikan kepada OJK. Oleh karena itu, tema strategis Rencana Bisnis Bank Muamalat Tahun 2023 adalah "Pertumbuhan Bisnis yang Sehat dan Profit yang Berkelanjutan". Tema tersebut merupakan Pilar dalam *House of Strategy* akan menjadi fokus untuk mencapai goals 1 hingga 5 tahun ke depan, serta merepresentasikan fokus pada percepatan pertumbuhan bisnis yang sehat dan juga peningkatan produktivitas ditengah dinamika geo-politik yang terjadi di Indonesia maupun di kondisi geo-politik Global. Tema Strategis dan Kebijakan Manajemen tersebut dituangkan dalam bentuk 3 aspek utama.

#### 1. **Business Refocusing**

Pada aspek strategi ini, Bank akan melakukan *refocusing* pada nasabah Individu untuk meningkatkan *current account saving account* (CASA) melalui transaksi dan pembiayaan lebih dari 2 juta target *customer base*. Mengoptimalkan kebun-kebun *Enterprise* dan *Islamic Ecosystem* sebagai *Entry gate* untuk nasabah individu, terdapat 39 Institusi dengan 20 institusi ber-*payroll* dan lebih dari 300 AUM Muhammadiyah untuk potensi nasabah retail. Memperluas kebun melalui pengumpulan dana dan pembiayaan kepada ASN dan BUMN, komunitas Sekolah negeri dan/atau swasta, pesantren, serta universitas dengan penekanan kuat pada prinsip-prinsip Islam, membangun ekosistem rumah sakit berbasis syariah dan teknologi yang terintegrasi produk halal, serta melakukan penetrasi kepada ekosistem perjalanan haji dan umrah melalui agent *tour & travel* yang berlisensi.

Selain itu Bank Muamalat akan berupaya meningkatkan layanan dan jasa melalui penambahan *feature & solusi* untuk nasabah individual seperti produk cicil emas & solusi haji dan peningkatan layanan berbasis *digital banking*, dalam rangka meningkat pembiayaan dan *Fee-Based Income*.

Bank akan mengakselerasi penyelesaian pembiayaan berkualitas rendah melalui Novasi, *Cessie*/Pengalihan Hak Tagih, Likuidasi, Subrogasi, Penggunaan Jasa

Another challenge the Bank faces is competition from conventional commercial banks (BUK) and Islamic commercial banks (BUS). Until 2022, the market share of Sharia Banking in Indonesia was only 7.03%, with Sharia Commercial Banks accounting for 66.14% of the total Sharia banking industry.

Taking into account changes in various economic dynamics and the implementation of the 2022 strategy, the Bank will promote sound business growth at a faster pace in 2023. Assuming that the Bank's application for relaxation of the Sharia RIM Current Account provisions is approved, business growth will be accelerated in order to meet the target turnaround plan submitted to OJK. Therefore, the strategic theme of Bank Muamalat's 2023 Business Plan is "Sound Business Growth and Sustainable Profit". The theme is a pillar in the House of Strategy that will be the focus of the Company to achieve goals for the next 1 to 5 years, and represents the Company's focus on accelerating healthy business growth and increasing productivity amidst geo-political dynamics, both in Indonesia and in the world. The Strategic Themes and Management Policies are outlined in the form of 3 main aspects., namely:

## Bank berupaya terus meningkatkan produktivitas serta *engagement* karyawan, antara lain melalui kebijakan baru tahun 2022, yaitu Program Beasiswa bagi anak karyawan.

The Bank continues to improve employee productivity and engagement, among others through a new policy in 2022, namely the Scholarship Program for employees' children.

BMI secara konsisten terus memperhatikan pengelolaan dan pengembangan SDM melalui peningkatan produktivitas dan *engagement* terhadap Bank. Hal itu dilakukan dengan program yang lebih terstruktur, optimalisasi efektivitas biaya tenaga kerja, peningkatan skema *reward* dan *recognition* yang lebih terarah, peningkatan infrastruktur Human Capital (HC) yang juga mendukung penguatan nilai-nilai budaya perusahaan.

Dalam rangka motivasi SDM agar dapat meningkatkan produktivitas serta *engagement* kepada perusahaan, pada tahun 2022, Bank mengeluarkan kebijakan baru, yaitu Program Beasiswa bagi anak karyawan. Program ini berupa pemberian dukungan dana pendidikan kepada anak-anak karyawan yang berprestasi berdasarkan hasil seleksi prestasi akademik dan prestasi non-akademik.

Kebijakan tersebut untuk mendorong anak-anak karyawan berkompetisi mencapai prestasi dan bersekolah di institusi pendidikan terbaik. Dengan demikian, di kemudian hari mampu menjadi generasi unggul yang mampu bersaing dan memberikan kontribusi terbaik bagi lingkungannya.

Pemberian dukungan dana dalam bentuk beasiswa bagi anak karyawan merupakan salah satu upaya Bank meringankan beban biaya pendidikan yang harus dikeluarkan karyawan setiap tahun, sepanjang memenuhi ketentuan dan persyaratan yang ditentukan. Program ini juga menjadi wujud komitmen Bank dalam meningkatkan kesejahteraan karyawan dan keluarganya.

BMI prioritizes human capital management and development through increased productivity and bank engagement. This is accomplished through a more structured program, optimizing the effectiveness of labor costs, increasing targeted reward and recognition schemes, and improving Human Capital (HC) infrastructure, all of which contribute to strengthening corporate cultural values.

To encourage human capital to increase productivity and engagement with the company, the Bank implemented a new policy in 2022: the Scholarship Program for employees' children. This program provides educational funding support to employees' children who excel in various academic and non-academic achievements.

This policy encourages employees' children to compete for achievements and to attend the best educational institutions. Hence, they will become a superior generation capable of competing and making the greatest contribution to the environment in the future.

One of our efforts to lessen the financial burden of education costs that must be borne by employees each year, subject to the specified terms and conditions, is to provide financial support in the form of scholarships for the children of employees. This program also manifests the Bank's commitment to enhancing the well-being of its employees and their families.

## PERFORMANCE APPRAISAL SYSTEM

BMI employs a Performance Management System to implement an employee performance appraisal system (PMS). The assessment is based on the Most Important Goals (MIG) determined at the start of the year and then reviewed in the middle and end of the year via the Human Capital Information System (Muamalat Human Power/MHP).

Proses penilaian kinerja karyawan juga dilaksanakan secara berjenjang, mulai dari penilaian mandiri (*self-assessment*) oleh karyawan dan evaluasi atasan langsung (*manager-assessment*) kemudian dikaji dan dievaluasi oleh pimpinan unit kerja yang lebih tinggi sampai dengan Direksi. Sistem ini dibentuk dengan tujuan untuk memastikan kinerja karyawan selaras dengan kinerja Perusahaan, mendorong, memotivasi, dan mengarahkan karyawan untuk selalu meningkatkan kinerjanya, serta mewujudkan hubungan yang jelas antara pencapaian rencana karyawan dengan pengembangan karier karyawan (promosi jabatan).

### PENGEMBANGAN KARIER

Manajemen pengembangan karier BMI bertujuan untuk memastikan ketersediaan karyawan dengan kualifikasi dan pengalaman yang tepat. Kemudian, meningkatkan kepuasan kerja karyawan, serta membantu karyawan dalam memahami peluang karier dan menentukan jalur karier yang dipilih.

Pengembangan karier ini secara konsisten membantu karyawan dalam memahami potensi dan keahliannya, sehingga membantu pencapaian tujuan individu dan Bank sebagai hubungan timbal balik yang bermanfaat bagi kesejahteraan karyawan dan tujuan perusahaan. Terlaksananya manajemen pengembangan karier yang baik dapat menurunkan tingkat *turnover*, dan menurunkan biaya tenaga kerja, khususnya anggaran untuk mendidik karyawan baru.

BMI juga menerbitkan dan menerapkan kebijakan mutasi, promosi, dan demosi. Hal ini dilakukan agar seluruh karyawan mendapatkan informasi yang jelas dan transparan mengenai mekanisme pengembangan karier secara terperinci.

Dalam penerapannya, pengembangan karier karyawan telah didukung dengan sistem SDM berbasis teknologi yang dimiliki oleh BMI yaitu Muamalat Human Power (MHP). Salah satunya adalah menu *e-movement* yang dapat diakses manajer lini setiap karyawan. Dengan demikian, pengajuan mutasi dapat diproses dengan lebih efisien dan efektif karena berbasis digital. Adapun proses promosi dan demosi karyawan dilakukan melalui pengajuan dari pimpinan unit kerja terkait untuk selanjutnya dilakukan evaluasi dan/atau asesmen dengan mempertimbangkan kinerja dan kompetensi karyawan.

Employee performance is also assessed in stages, beginning with employee self-assessment and evaluation of direct superiors (manager assessment) and progressing to review and evaluation by heads of higher work units up to the Board of Directors. This system was developed with the goal of ensuring that employee performance is aligned with the Company's performance, encouraging, motivating, and directing employees to always improve their performance, and establishing a clear relationship between achieving employee goals and employee career development (position promotion).

### CAREER DEVELOPMENT

BMI's career development management aims to ensure the availability of qualified and experienced employees. Furthermore, increasing employee job satisfaction and assisting employees in understanding career opportunities and deciding on a career path.

This career development consistently helps employees understand their potential and expertise, assisting in achieving individual and Bank goals in a mutually beneficial relationship for employee welfare and corporate goals. Implementing good career development management practices can reduce turnover rates and labor costs, particularly the budget for training new employees.

BMI also publishes and implements policies on transfer, promotion, and demotion. This is done so that all employees receive clear and transparent information about the detailed career development mechanism.

In practice, employee career development has been aided by Muamalat Human Power (MHP), a technology-based HC system owned by BMI. One of them is the *e-movement* menu, which line managers can access for each employee. As a result of their digital nature, mutation applications can be processed more efficiently and effectively. Employees are promoted and demoted based on submissions from the heads of related work units for further evaluation and/or assessment, considering employee performance and competence.

## SERIKAT PEKERJA DAN HUBUNGAN INDUSTRIAL

Sejalan dengan peraturan perundang-undangan, BMI senantiasa menjunjung kebebasan karyawan untuk berkumpul, berserikat, dan mengemukakan pendapatnya. Pekerja dapat secara mudah mendaftarkan diri dan bergabung dalam keanggotaan Serikat Pekerja. Serikat pekerja Bank bernama Syarikat Pejuang Muamalat (SP Muamalat), yang telah tercatat pada Suku Dinas Tenaga Kerja Kotamadya Jakarta Selatan dengan nomor bukti pencatatan No. 804/SP/JS/II/2018 tanggal 28 Februari 2018.

Keberadaan Serikat Pekerja tersebut merupakan mitra strategis Bank dalam menciptakan hubungan industrial yang berkualitas dan harmonis. Serikat Pekerja dapat menjadi saluran komunikasi terbaik untuk menjaga dan memperhatikan hak-hak karyawan Bank serta menciptakan hubungan kerja yang harmonis, selaras dan berkeadilan di lingkungan Bank, sehingga dapat meningkatkan produktivitas dan *engagement*. Bank selalu memberikan dukungan baik atas setiap kegiatan-kegiatan Serikat Pekerja.

Bank mendasarkan pelaksanaan hubungan industrial pada prinsip kesetaraan, kewajaran, rasa keadilan serta nilai-nilai kemanusiaan. Prinsip-prinsip tersebut diwujudkan dalam suatu Perjanjian Kerja Bersama (PKB) atau yang disebut sebagai Ittifaq Muamalat yang disepakati bersama antara manajemen dan pihak karyawan yang diwakili oleh Serikat Pejuang Muamalat (Serikat Pekerja).

Jika terjadi perselisihan hubungan industrial terkait dengan ketenagakerjaan, penanganan kasusnya dilakukan melalui proses yang sesuai dengan ketentuan perundang-undangan. Penyelesaiannya diutamakan secara bipartit/ internal perusahaan tanpa melibatkan pihak ketiga. Pada tahun 2022, terdapat gugatan kepada BMI terkait dengan isu alih daya yang saat ini kasusnya sudah dinyatakan selesai, karena pada akhirnya pihak penggugat mencabut gugatannya. Mengambil pelajaran dari munculnya gugatan ini, BMI senantiasa melakukan peninjauan kembali terhadap penerapan alih daya agar senantiasa sejalan dengan peraturan perundangan yang berlaku.

## KETERLIBATAN KARYAWAN

Program keterlibatan karyawan atau *employee engagement* merupakan sarana BMI untuk melibatkan peran aktif karyawan dalam mengikuti beragam kegiatan yang bertujuan meningkatkan produktivitas, kedisiplinan, loyalitas karyawan, profitabilitas perusahaan, serta meningkatkan kepuasan dan loyalitas konsumen. Program ini direalisasikan dengan memanfaatkan teknologi digital, sehingga keterlibatan karyawan menjadi sangat luas di seluruh kantor perwakilan Bank.

## LABOR UNIONS AND INDUSTRIAL RELATIONS

In line with laws and regulations, BMI always upholds the freedom of employees to assemble, associate, and express their opinions. Workers can easily register and join the membership of Trade Union. The Bank's labor' union is Syarikat Pejuang Muamalat (SP Muamalat), registered with the South Jakarta Municipal Manpower Office with record number No. 804/SP/JS/II/2018 dated February 28, 2018.

The existence of Labor Union is a strategic partner of the Bank in establishing a quality and harmonious industrial relations. Labor unions can be the best communication channel for maintaining and paying attention to bank employees' rights, as well as creating harmonious and fair working relationships within the Bank to increase productivity and engagement. The Bank has consistently provided strong support for all Labor Union activities.

The Bank bases the implementation of industrial relations on the principles of equality, fairness, a sense of justice, and human values. These principles are embodied in a Collective Labor Agreement (PKB) or what is known as Ittifaq Muamalat, which is mutually agreed upon between management and employees represented by the Muamalat Fighters Union (Labor Union).

If there is an industrial relations dispute involving labor, the case is handled in accordance with statutory provisions. The resolution is prioritized bipartite/internally within the company without the involvement of third parties. In 2022, a lawsuit was filed against BMI regarding the issue of outsourcing, and the case was declared closed at the time because the plaintiff withdrew the lawsuit. Taking lessons from the emergence of this lawsuit, BMI always reviews the outsourcing application to ensure that it is always in accordance with the applicable laws and regulations.

## EMPLOYEE ENGAGEMENT

The employee engagement program allows BMI to engage employees in various activities aimed at increasing productivity, discipline, employee loyalty, company profitability, and customer satisfaction and loyalty. This program is implemented through digital technology, resulting in widespread employee participation in all Bank representative offices.

Keterlibatan seluruh karyawan dan jajaran Direksi dalam semua program *employee engagement* menjadi hal yang sangat penting. Karena itulah, setiap kegiatan dikomunikasikan kepada karyawan melalui semua kanal komunikasi. Upaya tersebut dilakukan untuk meningkatkan partisipasi karyawan.

Employees and members of the Board of Directors must participate in all employee engagement programs. For this reason, all activities are communicated to employees via all communication channels. These initiatives were undertaken in order to increase employee participation.

Dalam pelaksanaannya, program keterlibatan karyawan untuk mendukung tujuan utama dari *Employee Engagement* kemudian dibagi menjadi beberapa bagian: *Spiritual Engagement*, *Emotional Engagement*, dan *Rational Engagement*, yang dijelaskan dalam tabel di bawah ini.

In practice, the employee engagement program is divided into three sections to support the main goal of employee engagement: spiritual engagement, emotional engagement, and rational engagement, as shown in the table below.

## SISTEM DAN MEKANISME REWARD DAN PUNISHMENT KEPADA KARYAWAN

BMI senantiasa menelaah penerapan *reward and punishment* secara berkelanjutan agar setiap kebijakan yang dilakukan bukan hanya konsistensi terhadap penerapan sanksi atas kasus-kasus pelanggaran, namun mampu mendorong pertumbuhan kinerja Bank. BMI akan memberikan apresiasi kepada karyawan dengan kinerja sangat baik dan melebihi target yang ditentukan.

Selain *reward* yang sifatnya berupa remunerasi finansial, tetapi juga berupa *benefit* dan pengembangan karier bagi karyawan yang memberikan kontribusi kepada Bank. Pada sisi lain, Bank juga mempunyai Program *Performance Improvement Plan* (PIP) bagi para karyawan yang tidak mencapai target yang telah disepakati dan ditentukan sebelumnya. Dengan program ini, diharapkan setelah dilakukan pembinaan, monitoring dan evaluasi secara berkala karyawan dapat kembali mencapai target yang telah ditentukan.

## ASESMEN KARYAWAN

Bank telah memiliki kebijakan asesmen untuk karyawan dan dilakukan secara berkala setiap tahun demi kepentingan pemenuhan manajemen talenta dan suksesor dari posisi kunci untuk setiap unit kerja. Asesmen terdiri atas 2 (dua) besaran area, yakni penilaian kinerja (*performance*) yang dilakukan secara berkala setiap semester dan penilaian potensi yang berfokus kepada LEAD3A: - *Leadership, Ability, Agility & Ambition* yang dilakukan oleh pimpinan dengan persetujuan berjenjang sesuai dengan tingkatan organisasi.

Proses asesmen karyawan dilakukan untuk memastikan kompetensi dan kapabilitasnya sesuai kebutuhan Bank. BMI melakukan asesmen karyawan dengan pendekatan *Key Performance Indicators* (KPI), yang disusun berdasarkan target kinerja Bank, target kinerja unit terkait maupun individu yang diselaraskan dengan tujuan dan strategi Bank serta mempertimbangkan aspek risiko dan kepatuhan.

Asesmen karyawan dilakukan dalam beberapa siklus *human capital*, di antaranya dalam proses pengembangan karier dan identifikasi talenta. Dalam hal pengembangan karier, terdapat beberapa aspek yang digunakan sebagai acuan antara lain *job grade*, histori kinerja karyawan, kompetensi, catatan kedisiplinan karyawan serta hasil evaluasi dari pimpinan kerja terkait.

Adapun dalam proses identifikasi talenta, acuan yang digunakan adalah hasil penilaian kinerja akhir tahun dan evaluasi potensi yang dimiliki oleh karyawan. Identifikasi talenta dilakukan secara periodik 1 (satu) tahun sekali oleh seluruh pimpinan unit kerja terhadap subordinatnya masing-masing. Seluruh proses ini mengacu pada kebijakan promosi, demosi dan manajemen talenta yang berlaku di perusahaan.

## EMPLOYEE REWARD AND PUNISHMENT SYSTEM AND MECHANISMS

BMI constantly reviews the implementation of rewards and punishments to ensure that each policy implemented is consistent with the application of sanctions in cases of violations and capable of encouraging the Bank's performance to grow. BMI will appreciate employees who have excellent performance and exceed their goals.

In addition to rewards, there are benefits and career development opportunities for employees who contribute to the Bank. On the other hand, the Bank has a Performance Improvement Plan (PIP) Program for employees who fail to meet agreed-upon and predetermined targets. Employees should be able to return to achieving predetermined targets after regular training, monitoring, and evaluation under this program.

## EMPLOYEE ASSESSMENT

The Bank has an employee assessment policy that is followed on a yearly basis to fulfill talent management and succession for key positions in each work unit. The assessment consists of 2 (two) area sizes: performance assessment, which is periodically carried out on a semesterly basis, and potential assessment, which focuses on LEAD3A: Leadership, Ability, Agility, & Ambition and is carried out by the leadership with tiers of approval based on the organization's level.

The employee assessment process is carried out to ensure competence and capabilities in accordance with the Bank's needs. BMI conducts employee assessments using the Key Performance Indicators (KPI) approach, which is based on the Bank's performance targets and related unit and individual performance targets aligned with the Bank's goals and strategy and takes the risk and compliance aspects into account.

Employee assessment occurs throughout several human capital cycles, including career development and talent identification. Job grade, employee performance history, competency, employee disciplinary records, and assessment results from related work leaders are all used as references in terms of career development.

The results of year-end performance appraisals and evaluations of employee potential are used as a reference in the talent identification process. All heads of work units conduct talent identification for their subordinates once a year. This process refers to the company's promotion, demotion, and talent management policies.

## KECUKUPAN KEBIJAKAN DAN PROSEDUR MANAJEMEN RISIKO SERTA PENETAPAN LIMIT RISIKO

Dalam rangka mendukung penerapan manajemen risiko dan pengendalian internal yang memadai, Bank telah memiliki struktur organisasi yang layak, antara lain melalui pembentukan unit kerja Internal Audit dan SKMR. Bank memastikan bahwa kebijakan dan prosedur terkait manajemen risiko serta penetapan limit risiko telah memadai, sebagaimana penjelasan di bawah ini.

### Kebijakan dan Prosedur Manajemen Risiko

Penerapan manajemen risiko di BMI berpedoman pada Peraturan Otoritas Jasa Keuangan (POJK) No.65/POJK.03/2016 tanggal 28 Desember 2016 tentang Penerapan Manajemen Risiko bagi Bank Umum Syariah dan Unit Usaha Syariah. Penerapan manajemen risiko di internal Bank mengacu pada:

1. Kebijakan Umum Manajemen Risiko (KUMR), yang menjadi pilar dan acuan dasar dalam penyusunan seluruh ketentuan internal Bank;
2. Kebijakan Umum Sistem Pengendalian Internal;
3. *Good Corporate Governance* (GCG);
4. *Code of Conduct* (Kode Etik);
5. Budaya Perusahaan, yaitu Islami, Modern dan Profesional (IDEAL).

Hierarki atas ketentuan terkait manajemen risiko di BMI mengikuti hierarki ketentuan internal yang berlaku di Bank, dengan urutan sebagai berikut:

## ADEQUACY OF RISK MANAGEMENT POLICIES AND PROCEDURES AND RISK LIMIT SETTING

In order to support the implementation of adequate risk management and internal control, the Bank has an appropriate organizational structure, such as establishing an Internal Audit and Risk Management Work Unit. The Bank ensures that policies and procedures related to risk management and risk limit setting are adequate, as explained below.

### Risk Management Policies and Procedures

The implementation of risk management at BMI refers to the Financial Services Authority Regulation (POJK) No.65/POJK.03/2016, dated December 28, 2016, concerning the Implementation of Risk Management for Sharia Commercial Banks and Sharia Business Units. The implementation of risk management within the Bank refers to the following:

1. General Risk Management Policy (KUMR), which is a pillar and basic reference in drafting all of the Bank's internal regulations;
2. General Policy of Internal Control System;
3. Good Corporate Governance (GCG);
4. Code of Conduct;
5. Corporate Culture, namely Islamic, Modern, and Professional (IDEAL).

The hierarchy of provisions related to risk management at BMI follows the hierarchy of internal regulations applicable at the Bank, in the following order:

### 1. Level 1 – Kebijakan Umum

Merupakan kebijakan tertinggi yang bersifat *high level*, strategis dan jangka panjang (tidak cepat berubah), serta berisikan filosofi dan prinsip-prinsip dasar yang berlaku secara menyeluruh (*bank wide*) dan menjadi landasan bagi ketentuan di bawahnya.

### 2. Level 2 – terdiri dari:

- Prosedur** adalah ketentuan khusus dan alur proses dari awal hingga akhir (*end to end*) dari suatu aktivitas, kegiatan operasional, bisnis, maupun pengendalian sebagai bentuk penerapan kebijakan yang dijadikan acuan.
- Manual Produk** adalah ketentuan yang mengatur fitur, syarat dan ketentuan atas suatu produk dan jasa.
- Surat Edaran (SE) Direksi** merupakan media yang digunakan untuk menyampaikan program bisnis atau ketentuan internal yang bersifat mendesak untuk diberlakukan dari sisi waktu maupun urgensinya, di mana belum ada Prosedur atau Manual Produk yang mengatur.

### 3. Level 3 – Petunjuk Teknis

Merupakan ketentuan yang dapat disusun apabila diperlukan oleh unit pemilik ketentuan. Dalam petunjuk teknis dijelaskan secara teknis tata cara penggunaan suatu media, aplikasi, sistem dan atau *tools* lainnya untuk mempermudah unit unit kerja terkait melakukan suatu *proses* atau kegiatan atau penggunaan suatu *tools*. Ketentuan yang diatur dalam Petunjuk Teknis bersifat *risk-free*, artinya tidak diperkenankan mengandung risiko tambahan dari Ketentuan Internal yang telah diatur dalam Prosedur yang menjadi acuan.

### 1. Level 1 – General Policy

It is the highest policy, which is high level, strategic, and long term (cannot be amended quickly), and contains basic philosophy and principles that apply to the Bank as a whole (*bank wide*) and form the basis for provisions under it.

### 2. Level 2 – consists of:

- Procedures** are specific provisions and the process from start to finish (*end to end*) of an activity, operational activity, business, or control, as a form of implementation of the policy that is used as a reference.
- Product Manual** is a provision that regulates features and terms and conditions of products or services.
- Circular Letter (SE) of the Board of Directors** is the media used to deliver urgent business programs or internal provisions to be enforced immediately, since there are no specific Procedures or Product Manual.

### 3. Level 3 – Technical Instructions

It is a provision that can be compiled by the unit that owns the provision, if necessary. Technical instructions contain technical explanations of procedures for using a media, application, system, and/or other tools to make it easier for related work units to carry out a process or activity. The provisions regulated in Technical Instructions are *risk-free*, meaning that they are not allowed to carry additional risks from Internal Provisions that have been regulated in the Procedure that becomes the reference.

### Limit Risiko

Dalam menetapkan limit risiko, Bank menyesuaikan dengan tingkat risiko yang akan diambil, toleransi risiko, dan strategi Bank secara keseluruhan. Hal tersebut dilaksanakan dengan tetap memperhatikan kemampuan modal Bank untuk dapat menyerap eksposur risiko atau kerugian yang timbul, histori kerugian di masa lalu, kemampuan sumber daya manusia, dan kepatuhan terhadap ketentuan internal dan eksternal yang berlaku.

Limit tersebut dikomunikasikan dengan baik kepada setiap pihak yang terkait agar dapat dipahami secara bersama-sama. Penetapan limit dilakukan secara komprehensif atas seluruh aspek yang terkait dengan risiko, yang mencakup limit secara keseluruhan, limit per risiko, dan limit per aktivitas bisnis Bank yang memiliki eksposur risiko.

Limit risiko yang ditetapkan oleh Direksi diimplementasikan sebagai bagian dari pemantauan dan pengendalian risiko Bank. Untuk memastikan bahwa limit risiko yang diterapkan masih sesuai dengan *risk appetite* Bank dan perubahan lingkungan bisnis, maka Bank memastikan dilakukannya proses kaji ulang atas limit risiko secara berkala, sesuai dengan prosedur Bank yang berlaku.

### KECUKUPAN PROSES IDENTIFIKASI, PENGUKURAN, PEMANTAUAN, DAN PENGENDALIAN RISIKO SERTA SISTEM INFORMASI MANAJEMEN RISIKO

#### Proses Manajemen Risiko

Proses manajemen risiko yang baik bertujuan untuk mengelola risiko yang melekat pada aktivitas perusahaan dengan maksud memberikan nilai tambah yang berkelanjutan secara maksimal terhadap keseluruhan aktivitas. Proses manajemen risiko BMI digambarkan sebagai berikut:

### Risk Limits

In setting risk limits, the Bank makes adjustments based on the level of risk that can be taken, risk tolerance, and the Bank's overall strategy. This is carried out by considering the Bank's capital ability to absorb risk exposure or possible losses, previous losses in the past, human resources capacity, and compliance with applicable internal and external regulations.

These limits are notified to all related parties so there will be a mutual understanding. The limit setting is carried out comprehensively on all aspects related to risks, including general limits, limits for each risk, and limits on the Bank's business activities that have risk exposure.

These risk limits are determined by the Board of Directors and implemented as part of the Bank's risk monitoring and control. To ensure that the applicable risk limits are still in line with the Bank's risk appetite and changes in the business environment, the Bank makes sure that reviews of these risk limits are carried out periodically in accordance with applicable procedures at the Bank.

### ADEQUACY OF RISK IDENTIFICATION, MEASUREMENT, MONITORING, AND CONTROL PROCESS, AS WELL AS RISK MANAGEMENT INFORMATION SYSTEM

#### Risk Management Process

A good risk management process aims to manage risks inherent in the company's activities with the purpose of providing a maximum and sustainable added value to all activities. The BMI risk management process is described as follows:

### 1. Identifikasi Risiko

Bertujuan untuk mengetahui seluruh jenis risiko yang melekat pada setiap produk, aktivitas layanan dan aktivitas fungsional yang berpotensi merugikan Bank.

### 2. Pengukuran Risiko

Bertujuan untuk mengetahui besaran risiko yang melekat pada aktivitas Bank untuk dibandingkan dengan *risk appetite* Bank sehingga Bank dapat mengambil tindakan mitigasi risiko, dan menentukan modal untuk meng-cover residual risiko.

### 3. Pemantauan Risiko

Dilakukan dengan membandingkan limit risiko dengan eksposur risiko yang dihadapi.

### 4. Pengendalian Risiko

Bentuk pelaksanaan mitigasi atas potensi risiko yang ada.

## Sistem Informasi Manajemen Risiko

Dalam rangka mendukung proses identifikasi, pengukuran, pemantauan dan pengendalian risiko, Bank mengembangkan sistem informasi manajemen risiko secara berkesinambungan sesuai dengan meningkatnya perkembangan dan kompleksitas bisnis Bank.

Sistem informasi manajemen risiko yang dimiliki oleh BMI, antara lain diwujudkan dalam bentuk laporan internal Bank, Laporan Profil Risiko, Laporan Tingkat Kesehatan Bank berbasis Risiko, Laporan Penyediaan Modal Minimum sesuai Profil Risiko, Laporan Portofolio Pembiayaan secara *bankwide* dan per segmen bisnis, Laporan Risiko Operasional, *Liquidity Key Risk Indicator* (LKRI) untuk risiko likuiditas, dan laporan-laporan lainnya. Laporan-laporan tersebut dapat dijadikan sebagai sumber yang mendukung untuk pengambilan keputusan oleh manajemen.

## SISTEM PENGENDALIAN INTERNAL YANG MENYELURUH

Implementasi sistem pengendalian internal dilakukan melekat pada masing-masing unit kerja yang merupakan lini pertahanan pertama manajemen risiko. Pelaksanaan sistem pengendalian internal didukung oleh ketentuan dan kerangka yang dikembangkan oleh fungsi lini pertahanan kedua manajemen risiko. Kecukupan dan efektivitas sistem pengendalian internal dikaji ulang secara berkala oleh unit kerja audit internal yang merupakan lini pertahanan ketiga manajemen risiko.

Selama tahun 2022, peran dan efektivitas unit kerja audit internal untuk memberikan nilai tambah bagi proses bisnis dan operasional di antaranya:

These reports also serve as a source to support the management's decision-making process.

The implementation of an internal control system is supported by provisions and a framework developed by the second line of defense in risk management. The adequacy and effectiveness of the internal control system are reviewed periodically by the internal audit work unit, which is the third line of defense in risk management.

Throughout 2022, the role and effectiveness of the internal audit work unit in providing added value to business processes and operations include:

## EFEKTIVITAS SISTEM MANAJEMEN RISIKO

Penerapan sistem manajemen risiko di BMI telah berjalan efektif. Dewan Komisaris dan Direksi dibantu oleh komite di bawahnya serta DPS telah menjalankan perannya secara aktif. Secara berkala, seluruh organ tersebut melaksanakan pertemuan untuk membahas dan memberikan rekomendasi kepada Dewan Komisaris dan Direksi. Efektivitas sistem manajemen risiko di Bank dikaji berdasarkan hal-hal sebagai berikut:

1. Kebijakan, prosedur dan penetapan limit risiko telah dimiliki oleh Bank. Kebijakan dan prosedur diatur dalam hierarki ketentuan internal Bank di atas. Limit risiko telah diimplementasikan oleh Bank antara lain dalam bentuk limit risiko kewenangan memutus pembiayaan, limit alokasi pembiayaan untuk meminimalkan terjadinya risiko konsentrasi pembiayaan, limit *dealer* untuk melakukan transaksi treasury, dan limit lain terkait operasional Bank.
2. Perkembangan eksposur risiko yang dihadapi oleh Bank dipantau secara berkala dan dilaporkan kepada Direksi atau Dewan Komisaris dalam bentuk laporan dan atau presentasi di rapat Direksi atau Dewan Komisaris, atau rapat komite level Direksi dan Dewan Komisaris.
3. Proses identifikasi, pengukuran, pemantauan dan pengendalian risiko telah dilakukan oleh unit-unit kerja sesuai dengan tugas dan tanggung jawabnya masing-masing;
4. Sistem pengendalian internal yang menyeluruh telah dilaksanakan oleh unit Internal Audit dalam bentuk pelaksanaan audit berkala maupun audit tematik dan dilaksanakan juga dalam bentuk kajian independen yang

- f. Implementation of *Muamalat Internal Certification* (MIC) with topics related to risk management;
- g. Submission of *anti-fraud campaign* via email blasts and outreach.
3. Development  
The development of the Bank's risk culture is carried out through:
  - a. Holding risk forums in work units on a regular basis to discuss emerging risk issues and improvements that have been and will be carried out;
  - b. Developing operational risk tools such as conducting studies on Key Risk Indicators (KRI), Risk & Control Self Assessment (RCSA), and operational risk measurement parameters;
  - c. Updating internal provisions related to events such as credit risk, market risk, and operational risk;
  - d. Creating ORION awards in order to appreciate contributions and achievements that have been made by ORION in encouraging the implementation of risk culture in work units.

## THE EFFECTIVENESS OF RISK MANAGEMENT SYSTEM

The risk management system at BMI has been implemented effectively. The Board of Commissioners and the Board of Directors are assisted by several committees, and the DPS has actively carried out its roles. Periodically, these organs hold meetings to discuss and provide recommendations to the Board of Commissioners and Directors. The effectiveness of the Bank's risk management system is assessed based on the following matters:

1. The Bank has policies, procedures, and risk limit setting. The policies and procedures are regulated in the hierarchy of the Bank's internal provisions, as shown above. The Bank has applied risk limits, some of them in the form of risk limits on the authority for financing decisions, limits on financing allocation to minimize the risk of financing concentration, limits on dealers in treasury transactions, and other limits related to the Bank's operations.
2. The development of risk exposure faced by the Bank is regularly monitored and reported to the Board of Directors or the Board of Commissioners in the form of reports and/or presentations at meetings of the Board of Directors or Board of Commissioners, or meetings by committees under the Board of Directors and Board of Commissioners.
3. The processes of identifying, measuring, monitoring, and controlling risk have been carried out by work units, in line with their respective duties and responsibilities;
4. A comprehensive internal control system has been carried out by the Internal Audit unit through periodic auditing or thematic auditing and also in the form of independent reviews conducted by SKMR on products,

dilakukan oleh SKMR atas produk, program, proses dan aktivitas yang dilakukan oleh unit kerja pemilik produk, proses, program dan aktivitas.

Evaluasi atas efektivitas manajemen risiko juga dilakukan melalui laporan berkala yang dikirimkan kepada Dewan Komisaris, Direksi dan DPS dalam "Laporan Profil Risiko" dan "Laporan Tingkat Kesehatan Bank".

### Kebijakan dan Prosedur

BMI melakukan *review* efektivitas terhadap kebijakan dan prosedur secara berkala oleh pemilik ketentuan internal yang berkoordinasi dengan unit kerja terkait. Dalam pelaksanaannya, memperhatikan masukan dari hasil pemeriksaan unit internal audit dan auditor eksternal dalam rangka perbaikan proses dan prosedur internal.

Salah satu metode lainnya untuk melihat efektivitas atas kebijakan dan prosedur adalah pemeriksaan yang dilakukan oleh unit kontrol operasi yang secara berkala melakukan pemeriksaan secara *sampling* atas transaksi operasional. Atas kebijakan dan prosedur yang dipandang tidak efektif dan atau tidak relevan lagi berdasarkan *review* berkala, dilakukan penyempurnaan lebih lanjut yang dilakukan oleh pemilik ketentuan.

### Risk Appetite

Penetapan *risk appetite* dan *risk tolerance* dapat membantu Bank untuk mencapai target bisnis yang ingin dicapai. Dalam implementasinya, bisa dilakukan secara dua arah, yakni *bottom up* dan *top down*. *Risk appetite* dan *risk tolerance* Bank dituangkan dalam bentuk antara lain *target market*, *risk acceptance criteria* dan limit-limit risiko serta *threshold*.

Dalam menetapkan *risk appetite* dan *risk tolerance*, Bank mempertimbangkan strategi dan tujuan bisnis serta kemampuan dalam mengambil risiko (*risk bearing capacity*). Apabila terjadi perubahan atas kondisi Bank Muamalat dan atau kondisi eksternal, limit dapat disesuaikan lebih cepat sehingga selalu terbaru dan sesuai dengan kondisi yang dihadapi.

### Stress Test

*Stress test* atas risiko kredit, likuiditas, pasar dan operasional dilakukan secara berkala oleh SKMR. *Stress test* dimaksud dilakukan untuk melihat kerentanan kondisi permodalan Bank terhadap kondisi *stress* yang mungkin dihadapi. Asumsi yang digunakan dalam perhitungan *stress test* tahun buku 2022 antara lain:

1. *Stress test* atas risiko likuiditas dengan menggunakan asumsi adanya kebutuhan penyaluran pembiayaan, kemungkinan penarikan dana oleh nasabah dilihat dari *behaviour* maupun kontraknya.
2. *Stress test* atas risiko pasar antara lain dengan menggunakan asumsi perubahan nilai tukar tertentu terhadap Posisi Devisa Neto (PDN) Bank.

programs, processes, and activities of the work units that own the products, processes, programs, and activities.

The effectiveness of risk management is evaluated by submitting periodic reports to the Board of Commissioners, Directors, and DPS in "Risk Profile Reports" and "Bank Soundness Level Reports."

### Policies and Procedures

BMI periodically reviews the effectiveness of policies and procedures conducted by owners of internal provisions in coordination with related work units. The review considers inputs from internal and external auditors' audit findings to improve internal processes and procedures.

Another method for assessing the effectiveness of policies and procedures is an inquiry conducted by the operations control unit, which periodically conducts inspections by sampling operational transactions. For policies and procedures deemed ineffective and/or no longer relevant based on periodic reviews, further improvements will be made by owners of the provisions.

### Risk Appetite

Determining risk appetite and risk tolerance can help the Bank achieve its business targets. The implementation of risk appetite and risk tolerance can be done in two directions, namely bottom-up and top-down. The Bank's risk appetite and risk tolerance are conveyed in the form of, among others, target market, risk acceptance criteria, and risk limits and thresholds.

In determining risk appetite and risk tolerance, the Bank takes into account business strategies and objectives, as well as the ability to take risks (risk-bearing capacity). If there is a change in Bank Muamalat's conditions and/or external conditions, the limit can be adjusted more quickly so that it is always updated and in accordance with current conditions.

### Stress Test

Stress tests on credit, liquidity, market, and operational risks are conducted regularly by SKMR. The stress test is carried out to see the vulnerability of Bank capital conditions to the stress conditions that the Bank may encounter. The assumptions used in calculating stress test for the 2022 fiscal year include:

1. Stress test on liquidity risk with an assumption that there is a need to distribute finance, a possibility of customers withdrawing funds from the Bank, which is seen from the behavior and contracts.
2. Stress tests on market risk, by using the assumption of changes in certain exchange rates on Bank Net Open Position (NOP).

3. *Stress test* atas risiko kredit menggunakan asumsi kinerja nasabah pembiayaan yang terdampak maupun tidak terdampak COVID-19 dalam kondisi pandemi COVID-19 dan dampaknya terhadap permodalan Bank.
4. *Stress test* risiko operasional dengan melakukan kajian atas kesiapan *Data Recovery Center* (DRC) untuk menguji kerentanan atas sistem IT sehingga dapat mendeteksi kondisi eksternal yang membahayakan *data center*.

Pelaksanaan *stress test* yang dijalankan oleh Bank pada dasarnya menggunakan model yang dikembangkan dari data historis atau menggunakan pendekatan lainnya. Hasil *stress test* dilaporkan kepada Direksi dan dikoordinasikan dengan unit terkait untuk dilakukan mitigasi dan tindak lanjut untuk meminimalkan terjadinya kondisi terburuk.

## PERNYATAAN DIREKSI DAN/ATAU DEWAN KOMISARIS ATAU KOMITE AUDIT ATAS KECUKUPAN SISTEM MANAJEMEN RISIKO

BMI menerapkan sistem manajemen risiko untuk semua jenis risiko yang dihadapi Bank agar tingkat risikonya dapat dikelola dan diukur. Pada tahun 2022, Bank telah berupaya maksimal dalam memastikan kecukupan sistem manajemen risiko, antara lain melalui penerapan tata kelola manajemen risiko, hasil kajian, kerangka manajemen risiko, ketentuan internal, limit risiko yang dikaji secara berkala dan pelaksanaan pengendalian internal, yang didukung dengan infrastruktur yang memadai.

Penyampaian hasil pengelolaan manajemen risiko Bank kepada Direksi, Dewan Komisaris, dan DPS telah dilakukan melalui media yang tersedia secara konsisten dan tepat waktu sebagai sarana pengambilan keputusan.

Penerapan manajemen risiko di seluruh lini Bank dilaksanakan secara aktif dalam bentuk mengidentifikasi risiko inheren dan memastikan kecukupan kontrol telah dilakukan. Hal ini diperkuat dengan adanya budaya risiko yang secara berkelanjutan ditekankan, baik dalam aktivitas bisnis maupun operasional.

Dengan berbagai pertimbangan itu, Direksi, Dewan Komisaris, maupun DPS serta organ lain yang dalam organisasi manajemen risiko Bank, meyakini bahwa sistem manajemen risiko yang diterapkan oleh BMI telah memadai. Kendati demikian, Bank akan terus mengevaluasi penerapannya seiring dengan perkembangan usaha Bank serta industri.

3. Stress tests on credit risk, by making assumptions about the financing performance of customers affected or not affected by COVID-19 during the COVID-19 pandemic and the impact on the Bank's capital.
4. Stress test on operational risk, by conducting a review of the readiness of the Data Recovery Center (DRC) to test the vulnerability of IT systems so that they can detect external conditions that could harm the data center.

The Bank performs stress tests using models developed from historical data or other approaches. Stress test results are reported to the Board of Directors and coordinated with related units for mitigation and follow-up actions to minimize the occurrence of the worst conditions.

## STATEMENT OF THE BOARD OF DIRECTORS AND/OR THE BOARD OF COMMISSIONERS OR THE AUDIT COMMITTEE ON THE ADEQUACY OF THE RISK MANAGEMENT SYSTEM

BMI implements a risk management system for all types of risks faced by the Bank so the level of risk can be managed and measured. In 2022, the Bank made maximum efforts to ensure the adequacy of the risk management system, such as through the implementation of risk management governance, review results, risk management framework, internal provisions, and risk limits that are reviewed periodically, as well as the implementation of internal controls, supported by well-developed infrastructure.

Results of the Bank's risk management are submitted to the Board of Directors, the Board of Commissioners, and DPS through media that are available consistently and promptly as a means of decision-making.

The implementation of risk management across all of the Bank's business lines is actively carried out by identifying inherent risks and ensuring adequate controls have been applied. This is reinforced by a risk culture that is continuously emphasized, both in business and operational activities.

With these various considerations, the Board of Directors, the Board of Commissioners, DPS, and other organs within the Bank's risk management organization believe that BMI has implemented an adequate risk management system. Nevertheless, the Bank will continue to evaluate its implementation in line with the development of the Bank's business and industry.

- Mempercepat penyelesaian pembiayaan bermasalah dengan menetapkan strategi penyelesaian, didukung oleh infrastruktur dan sumber daya manusia yang memadai;
- Membentuk organisasi manajemen risiko kredit untuk mendukung pencapaian bisnis Bank;
- Mengimplementasikan proses pembiayaan yang sehat secara *end to end* antara lain dengan menetapkan dan atau memperbaiki *risk acceptance criteria* (RAC), melaksanakan proses inisiasi, analisis, pemutusan pembiayaan, pencairan pembiayaan dan pemantauan pembiayaan secara berkualitas;
- Menetapkan strategi manajemen risiko kredit melalui antara lain penetapan *Financing Allocation Limit* (FAL), limit pemutusan pembiayaan, dan ketentuan internal yang dikaji berkala;
- Menjaga kualitas pembiayaan dan melakukan pengelolaan risiko konsentrasi pembiayaan, melalui pemantauan pembiayaan secara individual atau portfolio, melakukan penetapan limit pembiayaan antara lain atas sektor ekonomi tertentu, dan eksposur pembiayaan pada nasabah dan atau grup nasabah.

### Kebijakan Pengelolaan Risiko Konsentrasi Pembiayaan

Bank melakukan pengelolaan risiko konsentrasi pembiayaan melalui melalui penetapan limit antara lain atas sektor ekonomi tertentu dan eksposur pembiayaan pada nasabah dan atau grup nasabah.

Beberapa data yang digunakan untuk pengelolaan risiko konsentrasi antara lain:

- Batas Maksimum Penyaluran Dana (BMPD) yang merupakan persentase maksimum penyaluran dana yang ditetapkan terhadap modal Bank bagi penyaluran dana kepada pihak terkait atau modal inti (*tier 1*) Bank bagi penyaluran dana kepada selain pihak terkait. Untuk kehati-hatian, Bank mengimplementasikan juga limit BMPD internal yang diterapkan pada persentase tertentu dari limit BMPD yang ditetapkan oleh regulator.

### Credit Risk Management Strategy

The Bank has carried out credit risk management strategies, some through risk limit setting, financing processes supported by adequate infrastructure, and updated internal systems and regulations.

In order to manage financing activities to minimize credit risk based on prudential principles in the banking sector, the Bank has implemented the following measures:

- Set up clear targets and measures in the financing direction, including quality financing for good bank and new bank, by targeting low-risk customers and financing for the Islamic segment;
- Accelerate the resolution of non-performing financing by establishing settlement strategy, supported by adequate infrastructure and human resources;
- Establish a credit risk management organization to support the Bank's business achievements;
- Implement an end-to-end sound financing process, such as by establishing and/or improving risk acceptance criteria (RAC) and carrying out a qualified initiation process, analysis, financing approval, financing disbursement, and financing monitoring;
- Establish a credit risk management strategy by determining Financing Allocation Limits (FAL), financing termination limits, and internal provisions, which are reviewed periodically;
- Maintain the quality of financing and manage the risk of financing concentration by monitoring individual or portfolio financing, setting up financing limits on certain economic sectors and on financing exposure to customers and/or groups of customers.

### Financing Concentration Risk Management Policy

The Bank manages the risk of financing concentration by setting up limits on certain economic sectors and on financing exposure to customers and/or groups of customers.

Some of the data used for concentration risk management include:

- Maximum Limit of Fund Distribution (BMPD), which is the maximum percentage of fund disbursement to the Bank's capital in distributing funds to related parties or the Bank's core capital (*tier 1*) for fund disbursement to other than related parties. As a precautionary measure, the Bank also implements internal BMPD limit, which is applied to a certain percentage of the BMPD limit set by the regulator.

- b. *Target Market* dan *FAL* yang merupakan batasan maksimum pembiayaan pada suatu sektor/sub sektor ekonomi tertentu dengan mempertimbangkan *risk appetite* Bank dan potensi serta risiko sektor/sub sektor ekonomi tersebut. *Tools* ini diimplementasikan oleh unit bisnis terkait pembiayaan dalam bentuk *target market* dan *risk acceptance criteria* (RAC) yang ditetapkan berdasarkan segmen pembiayaan atau sektor/sub sektor ekonomi tertentu.
- c. Bank juga menggunakan data analisis risiko pembiayaan yang digunakan untuk melengkapi perhitungan kecukupan permodalan sesuai profil risiko Bank.

- b. Target Market and FAL, which are the maximum financing limits in a particular economic sector or sub-sector by considering the Bank's risk appetite and the potential and risks of that economic sector/sub-sector. ### Pengukuran Risiko Kredit dengan Pendekatan Standar

Bank melakukan perhitungan ATMR untuk risiko kredit dengan mengacu pada POJK No. 21/POJK.03/2014 tentang Kewajiban Penyediaan Modal Minimum Bank Umum Syariah dan juga SEOJK No. 34/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum yang diubah dengan SE OJK No. 13/ SEOJK.03/2018 tentang Perubahan atas SE OJK No. 34/ SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum Syariah.

### Measurement of Credit Risk with Standard Approach

The Bank calculates Risk Weighted Assets (RWA) for credit risk by referring to POJK No. 21/POJK.03/2014 concerning Minimum Capital Adequacy Requirements for Sharia Commercial Banks and also OJK Circular Letter (SEOJK) No. 34/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Credit Risk by Using a Standard Approach for Commercial Banks, which was later amended by SEOJK No. 13/SEOJK.03/2018 concerning Amendments to SEOJK No. 34/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Credit Risk by Using a Standard Approach for Sharia Commercial Banks.

### Pengendalian Risiko Kredit

Pengendalian risiko kredit dilakukan antara lain melalui:

- a. Penguatan sistem pengendalian internal, mencakup pengawasan oleh Dewan Komisaris dan Direksi secara berkala dan budaya pengendalian risiko yang melibatkan seluruh unit kerja terkait pembiayaan, pemeriksaan internal secara berkala dilakukan oleh unit internal audit yang ditindaklanjuti oleh unit kerja terkait dan pemeriksaan oleh unit kerja kontrol operasional;
- b. Melakukan penutupan asuransi atas agunan, pembiayaan dan atau jiwa nasabah untuk menutup risiko kredit yang mungkin terjadi.

### Definisi Tagihan Jatuh Tempo dan Tagihan Mengalami Penurunan Nilai

Bank mendefinisikan tagihan yang telah jatuh tempo sebagaimana diatur pada SEOJK No. 34/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum Syariah yang diubah dengan SE OJK No. 13/SEOJK.03/2018 tentang Perubahan atas SE OJK No. 34/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum Syariah, yakni tagihan yang telah jatuh tempo lebih dari 90 (sembilan puluh) hari, baik atas pembayaran pokok dan/atau pembayaran bagi hasil atau margin atau ujarah.

### Pendekatan Pembentukan Cadangan Kerugian Penurunan Nilai (CKPN) Individual dan Kolektif

Perhitungan CKPN yang dilakukan oleh Bank hanya untuk eksposur dengan akad murabahah saja, sesuai dengan penerapan PSAK 50/55 (Revisi 2006) sementara PSAK Syariah tidak mengatur secara detail. Perhitungan CKPN dilakukan dalam 2 (dua) pendekatan, yaitu:

- a. CKPN Individual dihitung berdasarkan jumlah ekspektasi arus kas yang diterima di masa akan datang, dikurangi jumlah tercatat.
- b. CKPN Kolektif dihitung dengan mempertimbangkan *Probability of Default* dan *Loss Given Default* dengan menggunakan data historis 3 (tiga) tahun terakhir.

### Metode Statistik dalam Perhitungan CKPN

Penggunaan metode statistik dalam perhitungan CKPN sebagaimana dijelaskan pada butir sebelumnya hanya diperuntukkan pada perhitungan CKPN Kolektif. Metode statistik yang digunakan oleh Bank adalah:

- a. *Probability of Default*, yakni tingkat kemungkinan kegagalan nasabah memenuhi kewajiban, yang diukur menggunakan metode *Migration* untuk segmen Wholesale dan SME, sedangkan untuk segmen Consumer menggunakan metode *Net Flow Rate*.

### Credit Risk Control

The Bank carries out credit risk control by:

- a. Strengthening the internal control system, including regular oversight by the Board of Commissioners and Board of Directors and implementation of risk control culture that involves all work units related to financing. Internal control is carried out periodically by the internal audit unit, which is then followed up by related work units and inspection by the operational control work unit;
- b. Having insurance coverage on collateral, financing, and/or customers' life to cover credit risks that may occur.

### Definition of Accounts Due and Impaired Bills

The Bank's definition of maturing receivables is stipulated in SEOJK No. 34/SEOJK.03/2015 concerning the Calculation of Risk-Weighted Assets for Credit Risk Using a Standard Approach for Sharia Commercial Banks, which is amended by SEOJK No. 13/SEOJK.03/2018 concerning Amendments to SEOJK No. 34/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Credit Risk Using the Standard Approach for Sharia Commercial Banks. Maturing receivables are bills that are overdue for more than 90 (ninety) days, both in principal payments and/or profit-sharing payments or margin or ujarah.

### Approach to Establishing Allowance for Impairment Loss (CKPN), for Bank Only and Consolidated

The Bank calculates CKPN only for exposures under murabahah contracts, in accordance with the adoption of Accounting Standard (PSAK) 50/55 (2006 Revision). Meanwhile, Sharia PSAK does not have detailed provisions. The CKON calculation is performed in 2 (two) approaches, namely:

- a. Allowance for Impairment Losses (CKPN) – Bank Only, which is calculated based on expected amount of cash flows received in the future, less the carrying amount.
- b. CKPN – Consolidated, which is calculated by considering the Probability of Default and Loss Given Default using historical data for the last 3 (three) years.

### Statistical Methods in CKPN Calculation

The use of statistical methods in calculating CKPN, as explained in the previous point, is only intended for calculating consolidated CKPN. The statistical methods used by the Bank are:

- a. Probability of Default, which is the level of probability of customers' failure to fulfill their liabilities. It is measured by using Migration method for wholesale and SME segments and Net Flow Rate method for Consumer segment.

- b. *Loss Given Default*, yaitu tingkat kerugian yang diakibatkan oleh kegagalan nasabah memenuhi kewajibannya. Perhitungan dilakukan menggunakan metode *Collateral Short Fall*.

### Pengungkapan Mitigasi Risiko Kredit dengan Menggunakan Pendekatan Standar

Mengacu pada POJK terkait perhitungan ATMR untuk risiko kredit yang disebutkan sebelumnya, Bank juga mengakui keberadaan agunan, garansi, penjaminan atau asuransi kredit sebagai teknik mitigasi risiko kredit (MRK). Bank menggunakan Teknik MRK-Agunan dengan pendekatan sederhana untuk sebagian besar portofolionya, di mana jenis agunan keuangan yang diakui dalam Teknik MRK-Agunan mengacu kepada ketentuan yang berlaku.

Meskipun tidak diikutsertakan dalam perhitungan MRK, Bank juga menerima jenis agunan lainnya seperti tanah dan bangunan, kendaraan bermotor, mesin dan agunan/jaminan lainnya yang telah diatur dalam kebijakan Bank. Dalam ketentuan internal, juga diatur mengenai kecukupan agunan yang harus dipenuhi oleh nasabah, pihak yang melaksanakan penilaian dan pemeriksaan agunan, aturan dan prosedur penilaian baik internal maupun eksternal, serta frekuensi penilaian berdasarkan jenis agunan.

### Pengungkapan Sekuritisasi Aset

Penjelasan mengenai sekuritisasi aset dijelaskan lebih lanjut pada tabel eksposur risiko.

### Risiko Pasar

#### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Pasar

Risiko pasar adalah risiko pada posisi neraca dan rekening administratif akibat perubahan harga pasar, antara lain risiko berupa perubahan nilai dari aset yang dapat diperdagangkan atau disewakan.

Sebagai bank devisa, BMI memiliki portofolio valuta asing dimana nilai dari aset dan kewajiban tersebut selalu terkait dengan perubahan nilai tukar valuta asing terhadap rupiah. Selain itu, Bank juga menghadapi risiko pasar terkait dengan portofolio surat-surat berharga jenis *trading* yang dimiliki. Dampak terhadap kegiatan usaha Bank akibat perubahan nilai tukar valuta asing terhadap rupiah dan perubahan harga surat-surat berharga akibat adanya perubahan imbal hasil di pasar dapat berdampak pada kinerja Bank baik dalam hal tingkat profitabilitas atau kecukupan permodalan yang dimiliki oleh Bank.

#### Organisasi Manajemen Risiko Pasar

Organisasi manajemen risiko pasar untuk memastikan bahwa DPS, Dewan Komisaris dan Direksi beserta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya

- b. *Loss Given Default*, which is the level of loss caused by the customers' failure to fulfill their liabilities. The calculation is performed by using the *Collateral Short Fall* method.

### Disclosure of Credit Risk Mitigation by Using Standard Approach

Referring to the POJK regarding the RWA calculation for credit risk, as mentioned above, the Bank also recognizes the existence of collateral, guarantees, or credit insurance as credit risk mitigation techniques (MRK). The Bank uses the MRK-Collateral Technique with a simple approach for most of its portfolios, in which the types of financial collateral recognized in the MRK-Collateral Technique refer to applicable provisions.

Even though they are excluded from the Credit Risk Mitigation (MRK) calculation, the Bank also accepts other types of collateral, such as land and buildings, vehicles, machinery, and other collaterals stipulated in the Bank's policy. The Bank's internal provisions also regulate the adequacy of collateral that must be fulfilled by customers, the parties who perform assessment and inspection of the collateral, internal and external valuation procedures, as well as the frequency of valuation based on the type of collateral.

### Disclosure of Asset Securitization

Details on asset securitization are further explained in the risk exposure table.

### Market Risk

#### Disclosure of Market Risk Exposure and Implementation of Market Risk Management

Market risk is the risk on the balance sheet and administrative account positions due to changes in market prices, including risks triggered by changes in the value of assets that can be traded or leased.

As a foreign exchange bank, BMI has foreign currency portfolios where the value of these assets and liabilities is always related to the movement of foreign currency exchange rates against the rupiah. In addition, the Bank also faces market risk related to its tradable securities portfolios. The impact on the Bank's business activities due to the movement of the foreign currency exchange rate against the rupiah and changes in the price of securities following yield movement in the market can affect the Bank's performance, both in terms of profitability and the Bank's capital adequacy.

#### Market Risk Management Organization

The organization of market risk management ensures that the DPS, the Board of Commissioners, the Board of Directors, and their committees carry out their functions properly. The organization of risk management includes the formation of

unit kerja terkait dengan risiko pasar yang terdiri dari tiga lini pertahanan manajemen risiko dengan fungsinya masing-masing.

work units related to market risks, which consist of three lines of defense in risk management with their respective functions.

### Strategi Manajemen Risiko Pasar

Bank memiliki strategi manajemen risiko pasar sebagai berikut:

- Menjaga tingkat PDN pada level 5% atau lebih rendah daripada yang ditetapkan regulator;
- Memantau limit *dealer* untuk transaksi *foreign exchange*, *money market*, dan *fixed income*, baik terhadap limit utilisasi maupun kerugian;
- Memantau rasio PLN Bank agar tidak melanggar ketentuan regulator;
- Melakukan perbaikan *end to end treasury process* dengan memastikan fungsi *middle office* dan kaidah *four eyes principles*, termasuk di dalamnya melakukan perbaikan dan pengembang sistem *treasury*;
- Melakukan *stress test* risiko pasar secara berkala;
- Menentukan besaran *risk factor* untuk transaksi valuta asing.

### Market Risk Management Strategy

The Bank has several market risk management strategies as follows:

- Maintain the level of NOP at 5% or lower than the regulator's requirement;
- Monitor dealers' transaction limits, such as foreign exchange, money market, and fixed income, against utilization and loss limits;
- Monitor the Bank's Foreign Loan ratio so as not to violate regulatory provisions;
- Carry out end-to-end improvements in treasury process by ensuring the function of the middle office and the four-eyes principles, including upgrading and developing the treasury system;
- Conduct regular stress tests for market risk;
- Determine the amount of risk factor for foreign exchange transactions.

### Pengelolaan Portofolio *Trading Book* dan *Banking Book* Serta Metodologi Evaluasi

Risiko pasar *trading book* adalah risiko yang muncul dari potensi kerugian akibat aktivitas *trading book*, antara lain perubahan suku bunga dan nilai tukar. Pengelolaan risiko pasar Bank dilakukan dengan menerapkan prinsip *segregation of duties* yaitu memisahkan fungsi dan tanggung jawab secara independen atas transaksi treasury, yang terdiri dari:

- Front office*: unit treasury sebagai unit pelaksana transaksi treasury dan investasi.
- Middle office*: unit SKMR sebagai unit yang melakukan pemantauan, menilai serta menginformasikan risiko yang timbul dari kegiatan *trading* yang dilakukan oleh unit front office.
- Back office*: unit operasional treasury sebagai unit yang melakukan pencatatan dan valuasi terhadap seluruh eksposur pada aktivitas *trading* secara harian dengan menggunakan harga pasar dari sumber yang independen.

Risiko pasar *banking book* muncul akibat adanya perubahan suku bunga dan nilai tukar atas aktivitas *banking book* yang dapat berpengaruh pada profitabilitas Bank (*earning perspective*). Pengelolaan risiko pasar *banking book* Bank dilakukan dengan mengoptimalkan struktur neraca agar mendapatkan imbal hasil yang maksimal dengan tingkat risiko yang dapat diterima.

Dalam menghitung ATMR untuk Risiko Pasar, Bank mengacu pada POJK No. 21/POJK.03/2014 tentang Kewajiban Penyediaan Modal Minimum Bank Umum Syariah dan SEOJK No. 35/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Pasar dengan menggunakan Metode Standar bagi Bank Umum Syariah. Risiko pasar yang wajib diperhitungkan dalam beban modal untuk pendekatan standar adalah:

- Posisi instrumen keuangan dalam *trading book* yang terekspos risiko suku bunga.
- Posisi valuta asing dalam *trading book* dan *banking book* yang terekspos risiko nilai tukar.

Untuk keperluan perhitungan modal minimum menggunakan metode standar, Bank menghitung semua posisi instrumen keuangan dalam *trading book* yang terekspos risiko suku bunga seperti pada portofolio surat berharga, serta derivatif lainnya seperti *FX Forward* dan *FX Swap*. Untuk risiko nilai tukar, Bank menghitung seluruh posisi *on* dan *off balance sheet*, baik dalam *portfolio trading book* dan *banking book*.

Setiap harinya, SKMR melakukan pemantauan terhadap pelampauan *trading limit*. Penetapan limit berfungsi untuk membatasi konsentrasi eksposur risiko pada suatu posisi, jenis risiko, tipe instrumen dan/atau pasar tertentu.

### Trading Book and Banking Book Portfolio Management and Evaluation Methodology

Market risk in the trading book is the risk that arises from potential losses due to trading book activities, such as changes in interest rates and exchange rates. The Bank's market risk management is carried out by implementing the principle called segregation of duties, which separates functions and responsibilities in treasury transactions independently and consists of:

- Front office: the treasury unit as the managing unit for treasury and investment transactions.
- Middle office: SKMR unit as the unit that monitors, assesses, and informs risks that may rise from trading activities by the front office unit.
- Back office: the treasury operational unit as the unit that records and evaluates all exposures to trading activities on a daily basis, by using market prices from independent sources.

Banking book market risk arises due to changes in interest rates and exchange rates on banking book activities that can affect the Bank's profitability (earnings perspective). Market risk management in the Bank's banking book is carried out by optimizing the balance sheet structure to obtain maximum returns at an acceptable level of risk.

In calculating RWA for Market Risk, the Bank refers to POJK No. 21/POJK.03/2014 concerning Minimum Capital Adequacy Requirements for Sharia Commercial Banks and SEOJK No. 35/SEOJK.03/2015 concerning Calculation of Risk Weighted Assets for Market Risk using the Standard Method for Sharia Commercial Banks. Market risks that must be considered in the capital expense for the standard approach are:

- The position of financial instruments in the trading book that are exposed to interest rate risk.
- Foreign exchange positions in trading book and banking book that are exposed to exchange rate risk.

To calculate the minimum capital by using the standard approach, the Bank calculates positions of all financial instruments in trading book that are exposed to interest rate risk, such as securities portfolios and other derivatives like *FX Forward* and *FX Swap*. As for the exchange rate risk, the Bank calculates on and off balance sheet positions in the trading book and banking book portfolios.

SKMR monitors any excess on trading limits on a daily basis. Setting up the trading limits will curb the concentration of risk exposure in a particular position, the type of risk, and the type of instrument and/or market. The determination of this

Penetapan limit ini mengacu kepada *risk tolerance* Bank dengan mempertimbangkan *target profit* dan risiko dari aktivitas perdagangan.

limit refers to the Bank's risk tolerance by considering the targeted profit and risks from trading activities.

## Risiko Likuiditas

### Organisasi Manajemen Risiko Likuiditas

Organisasi manajemen risiko likuiditas untuk memastikan bahwa DPS, Dewan Komisaris dan Direksi beserta komite di bawahnya melaksanakan fungsinya dengan baik. The risk management organization includes establishing work units related to liquidity, which consist of three lines of defense in risk management with their respective functions.

Untuk meminimalkan risiko likuiditas sesuai dengan prinsip kehati-hatian perbankan, Bank telah memiliki manajemen risiko likuiditas sebagai berikut:

To minimize liquidity risk based on prudential principles in the Banking sector, the Bank has liquidity risk management as follows:

### Strategi Manajemen Risiko Likuiditas

Pada 2022, Bank telah melakukan strategi manajemen risiko likuiditas, di antaranya dengan:

- Menjaga likuiditas Bank tetap sehat yang dipantau secara harian;
- Menetapkan strategi peningkatan likuiditas dengan tetap menyesuaikan pada fokus strategi bisnis Bank di 2022, yaitu dengan fokus pada pertumbuhan dana murah dan mengoptimalkan pendapatan berbasis jasa;
- Memperkuat layanan perbankan elektronik dan meningkatkan aktivasi transaksi nasabah, melalui antara lain: tarik tunai tanpa kartu, *Customer on Board* (COB), subsidi dan promo untuk transaksi di *merchant* tertentu dan optimalisasi referal dari karyawan. Untuk nasabah non individu dan segmen Wholesale, Bank terus mengembangkan menambah fitur *cash management system*.
- Mengajukan kelonggaran RIM dan mengoptimalkannya setelah disetujui tanggal 27 Januari 2023.
- Pada akhir 2022, Bank melakukan inisiasi untuk menjadi Bank Penyalur Gaji (BPG) ASN, TNI dan Polri untuk meningkatkan volume dana murah dan *fee based income*.

### Teknik Mitigasi Risiko Likuiditas termasuk Indikator Peringatan Dini Permasalahan

Setiap harinya, Bank melakukan pemantauan atas risiko likuiditas melalui pelaporan atas pencapaian rasio-rasio likuiditas yang terangkum dalam *Liquidity Key Risk Indicator* (LKRI). Indikator-indikator yang masuk dalam laporan tersebut ialah parameter likuiditas yang menggambarkan fungsinya masing-masing, baik sebagai penyangga likuiditas, tingkat konsentrasi, ketergantungan pendanaan dan tingkat ekspansi bisnis Bank.

Penilaian atas kondisi likuiditas Bank diperoleh melalui hasil pemeringkatan secara komposit atas seluruh parameter, sehingga sebagai *output* penilaiannya akan diketahui tingkat risiko dari kondisi likuiditas Bank. Hasil penilaian atas kondisi likuiditas ini diinformasikan kepada Direksi secara harian sehingga ketika kondisi likuiditas terlihat menurun dapat diberikan arahan atas langkah-langkah pemulihan likuiditas yang harus dilakukan.

### Likuiditas dan Rencana Pendanaan Darurat

Dalam hal pemantauan dan pengelolaan risiko likuiditas saat kondisi krisis, BMI telah mempunyai kebijakan yaitu *Contingency Funding Plan* (CFP), yang pelaksanaannya direpresentasikan melalui pelaksanaan rapat *Liquidity Crisis Mitigation Team* (LCMT) yang lebih intensif.

Pelaksanaan rapat LCMT dijalankan dengan mempertimbangkan hasil pemantauan status kondisi likuiditas Bank yang tercantum pada laporan LKRI dengan kondisi tertentu. Rapat LCMT ini diharapkan dapat

### Liquidity Risk Management Strategy

In 2022, the Bank has implemented several strategies on liquidity risk management, such as:

- Keep the Bank's liquidity at a sound level and monitor it on a daily basis;
- Establish a strategy to increase liquidity while keeping it in line with the Bank's business strategies in 2022, by focusing on growing low-cost funds and optimizing service-based income;
- Strengthen electronic banking services and increase activation of customers' transactions through: cardless cash withdrawals, Customer on Board (COB), subsidies and promos for transactions at certain merchants and optimizing referrals from employees. For non-individual customers and the Wholesale segment, the Bank continues to develop additional features on cash management system.
- Propose relaxation on the Intermediary Macroprudential Ratio (RIM) and utilize the relaxation after obtaining approval on January 27, 2023.
- At the end of 2022, the Bank has initiated to become a Payroll Bank (BPG) for civil servants, military, and police to increase the volume of low-cost funds and fee-based income.

### Liquidity Risk Mitigation Techniques, including Early Warning Indicator on Problem

The Bank monitors liquidity risks on a daily basis through reports of liquidity ratio achievements, which are summarized in the Liquidity Key Risk Indicator (LKRI). Indicators included in the report are liquidity parameters, which describe their respective functions as a liquidity buffer, concentration level, funding dependence, and the Bank's level of business expansion.

The assessment of the Bank's liquidity condition is obtained through the results of a composite rating of all parameters, so the output of the assessment will determine the risk level of the Bank's liquidity condition. Results of the liquidity assessment are informed to the Board of Directors on a daily basis. Therefore, when liquidity conditions appear to be declining, the Board of Directors can give directions on measures that need to be taken to restore liquidity.

### Liquidity and Contingency Funding Plan

The Bank has a policy to monitor and manage liquidity risks during the crisis, called the Contingency Funding Plan (CFP), in which implementation is represented by holding more intensive meetings on Liquidity Crisis Mitigation Team (LCMT).

The LCMT meeting is held by considering the monitoring results of the Bank's liquidity conditions listed in the Liquidity Key Risk Indicator (LKRI) report under certain conditions. The LCMT meeting is expected to speed up the recovery

mempercepat proses pemulihan atas kondisi likuiditas Bank, terutama melalui perbaikan atas kinerja pendanaan dari sisi nasabah, maupun alternatif sumber pendanaan yang dapat diupayakan dari pasar uang.

#### Mekanisme Pengukuran dan Stress Test serta Pengendalian Risiko Likuiditas

*Stress test* likuiditas dilakukan oleh Bank sebagai salah satu metode manajemen risiko untuk mengevaluasi ketahanan modal, likuiditas dan kemampuan Bank dalam menyerap kerugian pada suatu kejadian krisis yang *exceptional but plausible*, serta mengidentifikasi langkah-langkah yang harus dilakukan untuk memitigasi risiko dan menjaga modal.

Ruang lingkup pelaksanaan *stress test* likuiditas mencakup *regular issue* dan juga *forward looking scenario* yang mengacu pada kondisi terkini seperti kondisi pasar dan lingkungan bisnis dan dampaknya terhadap bisnis Bank.

Dalam perhitungan *stress test* likuiditas, Bank mengidentifikasi potensi tekanan yang mungkin terjadi untuk menilai kecukupan likuiditas dan cadangan aktiva likuid yang dimiliki dalam menyerap tekanan yang timbul serta langkah pencegahan dan penanggulangan yang tercantum dalam CFP.

#### Risiko Operasional

##### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Operasional

Risiko operasional didefinisikan sebagai kerugian akibat ketidakcukupan dan atau tidak berfungsinya proses internal, kesalahan manusia, kegagalan sistem atau isu eksternal yang dapat mempengaruhi operasional Bank. Kerugian dari dampak risiko operasional dapat mempengaruhi kinerja keuangan dan mengganggu pencapaian visi dan misi bank.

Lemahnya pengendalian risiko operasional dapat menyebabkan dampak terhadap kegiatan usaha Bank yaitu meningkatnya biaya operasional dan pada akhirnya mengurangi laba usaha serta modal Bank. Selain itu, secara umum kelemahan ini akan mengakibatkan kelancaran operasional dan mutu pelayanan menjadi terganggu dan menurunkan kinerja dan daya saing BMI.

##### Organisasi Manajemen Risiko Operasional

Organisasi manajemen risiko operasional yang memastikan bahwa DPS, Dewan Komisaris dan Direksi serta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya unit kerja terkait dengan operasional yang terdiri dari 3 (tiga) lini pertahanan manajemen risiko dengan fungsinya masing-masing, sebagai berikut:

process of the Bank's liquidity conditions, especially through improvements in funding performance from the customers' side, as well as alternative sources of funding obtained from the money market.

#### Measurement and Stress Test Mechanism and Liquidity Risk Control

The Bank carries out liquidity stress tests as one of the risk management methods to evaluate capital resilience, liquidity, and the Bank's ability to absorb losses in an exceptional but plausible crisis event, as well as identify necessary measures to mitigate risks and maintain capital.

The scope of implementing liquidity stress tests is regular issues and forward-looking scenarios based on current conditions, such as market conditions, business environment, and their impacts on the Bank's business.

In calculating the liquidity stress test, the Bank identifies potential pressures that may occur to assess the adequacy of liquidity and liquid asset reserves to absorb pressures that arise and take preventive actions and countermeasures listed in the CFP.

#### Operational Risk

##### Disclosure of Exposure and the Implementation of Operational Risk Management

Operational risk is loss due to inadequate or non-functioning internal processes, human errors, system failures, or external issues that may affect the Bank's operations. Losses from the impact of operational risks can affect financial performance and disrupt the Bank's vision and mission achievements.

Weak operational risk control can affect the Bank's business activities, as it may increase operational costs, ultimately reducing the Bank's operating profit and capital. In addition, these weaknesses, in general, will disrupt smooth operations and service quality, as well as lower the Bank's performance and competitiveness.

##### Operational Risk Management Organization

Organization of operational risk management ensures that the DPS, the Board of Commissioners, the Board of Directors, and the committees carry out their functions properly. The risk management organization includes the establishment of work units related to operations, which consist of 3 (three) lines of defense in risk management with their respective functions, as follows:

### Strategi Manajemen Risiko Imbal Hasil

Bank telah melakukan strategi dalam pengelolaan manajemen risiko imbal hasil yang dilakukan dengan:

- Mengontrol *cost of funds* dan *Net Profit Margin* dengan melakukan evaluasi pada Hi-1000 untuk menentukan bagi hasil nasabah.
- Melakukan penyesuaian perhitungan Hi-1000 pada *core banking system*, ditujukan agar setiap ada perubahan kembali ketentuan GWM dari regulator bisa langsung disesuaikan pada perhitungan sistem.
- Menjaga *margin income* untuk menjaga tingkat imbal hasil yang dibayarkan Bank kepada nasabah melalui pemantauan atas *yield* dan *cost of funds* pada level tertentu sebagaimana dibahas pada rapat ALCO secara berkala.
- Sejalan dengan perbaikan proses manajemen risiko likuiditas, Bank terus berupaya menurunkan konsentrasi pada nasabah besar dengan *pricing* yang mahal untuk mengoptimalkan profitabilitas sesuai dengan *bankwide strategy*.

### Mekanisme Pemantauan dan Pengendalian Risiko Imbal Hasil

Dalam hal pencapaian imbal hasil, Bank memiliki target yang telah dirumuskan dan tertuang dalam rencana bisnis Bank. Rencana bisnis Bank terkait dengan imbal hasil ini menjadi acuan utama bagi Bank dalam mengevaluasi pencapaiannya secara berkala. Hasil dari evaluasi pencapaian imbal hasil biasanya akan disampaikan dalam ALCO, atau dapat juga ditindaklanjuti melalui rapat *ad hoc* antar unit kerja ALMA dan unit bisnis.

### Rate of Return Risk Management Strategy

The Bank has implemented strategies in managing rate of return risks, including:

- Controlling the cost of funds and Net Profit Margin by evaluating the Hi-1000 to determine profit sharing with customers.
- Making adjustments to the Hi-1000 calculation in the core banking system, so every time there is a change in the GWM provisions from the regulator, it can be directly adjusted to the system calculation.
- Maintaining margin income to retain the rate of return paid by the Bank to customers by monitoring yields and cost of funds at a certain level, as discussed at ALCO's regular meetings.
- In line with improvements in the liquidity risk management process, the Bank continues its efforts to reduce concentration on large customers with high pricing to optimize profitability, in line with a bankwide strategy.

### Rate of Return Risk Monitoring and Control Mechanism

Regarding the rate of return achievement, the Bank has targets formulated and outlined in the Bank's Business Plan. The Bank's Business Plan related to the rate of return acts as the main reference for the Bank in evaluating its achievements regularly. The evaluation results will usually be submitted to ALCO or followed up through ad hoc meetings between ALMA work units and business units.

## Risiko Investasi

### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Investasi

Risiko investasi (*investment risk*) adalah risiko akibat Bank ikut menanggung kerugian usaha nasabah yang dibiayai dalam pembiayaan bagi hasil berbasis *profit and loss sharing*. Risiko ini timbul apabila Bank memberikan pembiayaan berbasis bagi hasil kepada nasabah dimana Bank ikut menanggung risiko atas kerugian usaha nasabah yang dibiayai (*profit and loss sharing*). Dalam hal ini, perhitungan bagi hasil tidak hanya didasarkan atas jumlah pendapatan atau penjualan yang diperoleh nasabah namun dihitung dari keuntungan usaha yang dihasilkan nasabah. Dampak terhadap kegiatan usaha Bank apabila usaha nasabah mengalami kebangkrutan, maka jumlah pokok pembiayaan yang diberikan Bank kepada nasabah tidak akan diperoleh kembali.

### Organisasi Manajemen Risiko Investasi

Organisasi manajemen risiko investasi memastikan bahwa DPS, Dewan Komisaris dan Direksi beserta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya unit kerja terkait risiko investasi yang terdiri dari tiga lini pertahanan manajemen risiko dengan fungsinya masing-masing.

Untuk meminimalkan risiko investasi sesuai dengan prinsip kehati-hatian perbankan, Bank telah memiliki organisasi manajemen risiko investasi yang mencakup:

## Investment Risk

### Disclosure of Exposure and Implementation of Investment Risk Management

Investment risk is associated with the Bank bearing a portion of a customer's business losses that are financed under profit- and loss-sharing financing. Such risk emerges when the Bank provides profit-sharing-based financing to customers, where the Bank also bears the risk of losses from the customer's financed business (profit and loss sharing). In this case, the profit-sharing calculation is based not only on the amount of income or sales earned by the customer but also on the operating profit generated by the customer. If the customer's business goes bankrupt, then the Bank will no longer receive the principal amount of financing provided to the customer.

### Investment Risk Management Organization

The investment risk management organization ensures that the DPS, the Board of Commissioners, the Board of Directors, and the committees carry out their functions properly. The risk management organization includes establishing a work unit related to investment risk, which consists of three lines of defense of risk management with their respective functions.

To minimize investment risk based on prudential principles in the banking sector, the Bank has an investment risk management organization that includes:

## POLICY ON THE IMPLEMENTATION OF CORPORATE GOVERNANCE

The implementation of GCG principles is the cornerstone of thinking and acting that is inherent in all employees of Bank Muamalat when carrying out their duties and responsibilities. The internalization of GCG principles in every policy will enable the Bank's management to run clearly, structured, openly, fair, accountable, and independently.

The Company's Articles of Association thus far have served as a reference and foundation in applying GCG principles, the preparation of which is sourced from the Law and regulatory regulations in accordance with Bank Muamalat's business activities.

The Governance Framework in the implementation of Bank Muamalat's GCG is as follows:

### 1. Governance Commitment

The first stage in implementing GCG is to build commitment from all levels of the Bank to be part of the implementation of corporate governance. The form of commitment implementation begins with forming a foundation that forms the basis for implementing implementation commitments such as the Company's Articles of Association, the Company's Vision and Mission, and the Code of Conduct.

### 2. Governance Structure

The Bank is committed to equipping and placing the right resources in the corporate structure and improving various supporting infrastructures to ensure the governance process can run properly.

### 3. Governance Mechanism

#### 4. Sosialisasi dan Evaluasi

Guna memastikan seluruh jajaran Perseroan dapat menerapkan prinsip-prinsip tata kelola yang telah diinternalisasi dalam sistem perusahaan maka tahapan selanjutnya adalah melakukan sosialisasi kepada seluruh jajaran Perseroan. Pelaksanaan sosialisasi ditujukan agar seluruh jajaran perusahaan dapat memahami dan menerapkan GCG pada setiap implementasi tugas dan tanggung jawabnya. Adapun evaluasi dilakukan untuk mengontrol sejauh mana implementasi telah dilakukan dan guna membenahi kelemahan untuk perbaikan penerapan GCG selanjutnya.

#### 4. Socialization and Evaluation

The implementation of socialization is intended so that all levels of the Company can understand and apply GCG in every implementation of their duties and responsibilities. The evaluation is carried out to control the extent to which the implementation has been carried out and to fix weaknesses for further improvement of GCG implementation.

| Principle 1:<br>Increasing the value of holding a General Meeting of Shareholders (GMS). | 1.1. Public companies have technical methods or procedures for voting, both open and closed, which promote independence.     | Each share with voting rights issued has one voting right (one share one vote). Shareholders can use their voting rights when making decisions, especially when making decisions by voting. However, the decision-making mechanism by means of open and closed voting has not been regulated in detail.<br><br>Public companies are recommended to have voting procedures in making decisions on a GMS agenda. The voting procedure must maintain the independence or freedom of the shareholders. For example, in open voting, voting is carried out by raising hands in accordance with the choice instructions offered by the chairman of the GMS. Meanwhile, closed voting is carried out on decisions that require confidentiality or at the request of shareholders, by using a voting card or by use of electronic voting. | <b>Has Been Applied</b><br>The Bank already has provisions on procedures for making decisions through voting at GMS, both open and closed which prioritizes independence and the interests of shareholders. These provisions are regulated in the Bank's Articles of Association and GMS Implementation Procedures as follows:<br>1. GMS decisions are taken based on deliberation to reach a consensus.<br>2. In the event that a decision based on deliberation to reach a consensus is not reached, the GMS decision is valid if it is approved by more than 1/2 (one half) of the total number of shares with voting rights present at the GMS, except for statutory regulations and/or the Articles of Association. The basis determines that a decision is valid if it is approved by a greater number of affirmative votes.<br>3. Voting on individuals and voting on other matters is regulated as follows:<br>a. person's self is carried out in writing with a closed vote that is not signed;<br>b. regarding other matters carried out verbally, unless the chairman of the GMS determines otherwise without any objections from 1 (one) or more shareholders present at the GMS. |
